TACO Metals

Celebrating Over 50 Years of Innovation, Quality & Supply Chain Management

Founded in 1959, TACO Metals has become a global leader in the recreational marine industry as the most trusted source for rub rail, pipe and tubing, sport fishing products, specialty marine hardware and seat and table pedestal systems. TACO designs, engineers and manufactures more than 1,000 marine products through a global network developed over the past five decades. The Miami-based company has established a reputation for innovation, quality and supply chain partnering at the highest level. Boat builders, marine accessory manufacturers, dealers, distributors and retailers know they can rely on TACO for premium products, distribution expertise and unsurpassed customer support.

TACO is known for its new product development, design and manufacturing. Utilizing the latest tools, TACO's sales and engineering teams work closely with customers to create solutions that provide best total value, enhanced product performance and uncompromising quality. TACO's new modern manufacturing facility in Sparta, Tennessee is centrally located to service most customers within one day. TACO's regional distribution centers provide inventory management programs and just-in-time delivery for an unparalleled service experience from start to finish.

Rub

TACO METALS Rub Rail has long been the choice of professional boat builders worldwide for its superior design and quality. TACO supplies rub rail for boats 13 feet and up, including fishing boats, cruisers, cuddy cabins, ski boats, pontoon boats and sailboats. You name it and TACO has a rub rail product to fit the need.

QUALITY MATERIALS

TACO uses the finest high-grade materials for in-house vinyl extrusion. Prime virgin resins, compounded with UV inhibitors, plasticizers, fungicides and impact modifiers are used to ensure outstanding weather-ability and optimum performance.

VINYL CO-EXTRUSION

TACO's in-house vinyl extrusion operations continue to expand. The addition of co-extrusion lines has allowed TACO to offer a selection of innovative rub rail products that offer savings in time and labor without sacrificing appearance or performance.

WEATHER SEAL RUB RAIL

TACO offers rigid vinyl rub rail with a flexible vinyl inlay, co-extruded and drilled in-line. These innovative Weather Seal rub rails seal out water and eliminate the need for secondary caulking. As a result boat builders enjoy a savings in material and labor costs.

FLEXIBLE VINYL CHROME INSERTS

TACO also offers co-extruded vinyl inserts that combine the elegant look of stainless steel with the advantages of flexible vinyl. TACO extrudes flexible vinyl, and a specially-formulated chrome mylar that is applied and laminated in-line to the surface of flexible vinyl rub rail. The result is a flexible vinyl insert with the elegant look of stainless steel. Supplied in a continuous coil, the insert is easy to handle and store and installs without fasteners for a one piece smooth and seamless appearance.

TACO STOCKING INVENTORY PROGRAM

All rub rails featured in this catalog are a part of TACO's industry-leading stocking program offering competitive pricing, a wide assortment of product, and stocked inventory to ensure ready availability.

CUSTOM REQUIREMENTS

To meet custom requirements, TACO's rub rail experts work closely with customers to design and engineer exclusive profiles for new boat designs. Open dies are also available for production runs in custom colors and lengths as needed to meet specific requirements. Contact your TACO representative to discuss your custom requirements.

Rigid Vinyl

- Exceptionally tough, durable and long-lasting even in the most adverse conditions
- Color and gloss levels are carefully matched to blend with hull and deck
- Heat required for radius forming
- Cuts and drills like wood

FEATURE PRODUCT

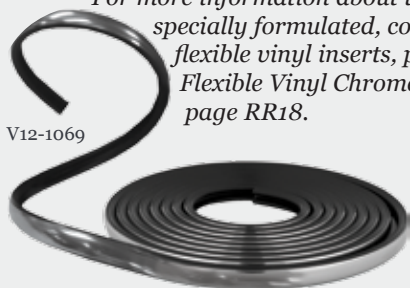

Rigid Vinyl with Flexible Vinyl Chrome Insert

Now available with select rigid and semi-rigid rub rail, TACO introduces a line of flexible vinyl chrome inserts that offer the elegant look of stainless while maintaining the easy-handling, flexibility and cost savings of flexible vinyls.

Flexible inserts install without fasteners for a clean smooth look.

For more information about these specially formulated, co-extruded flexible vinyl inserts, please see Flexible Vinyl Chrome Insert, page RR18.

FEATURE PRODUCT

Co-Extruded Rigid & Flexible Vinyl Rub Rail

TACO offers a line of co-extruded rub rails that feature a primary rigid vinyl rub rail with flexible vinyl inlays. These unique rub rail products seal and protect, offering time and cost savings.

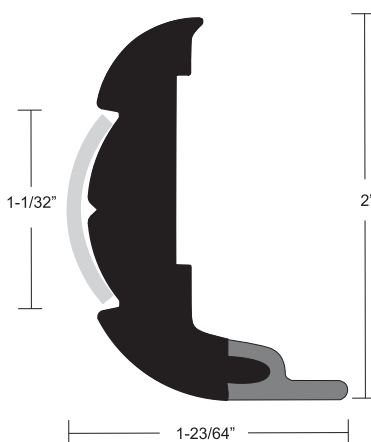

The flexible vinyl performs as a seal to prevent water from getting behind the rail, eliminating the need for caulking during rub rail installation. In addition to time and cost savings associated with the elimination of caulking, the typical yellowing and peeling seen with aging caulk is also eliminated. These inlays also help to absorb the initial impact felt when the boat hits the dock or pylon, protecting the gel-coat from cracking.

Co-Extruded Rigid Vinyl with flexible vinyl leg adapts to hull contour minimizing the need for caulking.

Co-Extruded Rigid Accepts Stainless Steel

- Drilled and countersunk on 6" centers

Moulding

TACO Metals supplies quality trim, weather seal and hatch tape that is designed to protect boat interiors and exteriors from the harsh marine environment.

TRIM & MOULDING

Trim and moulding products provide finish, protection and structural integrity. TACO trim and moulding products are the best in the industry and are used extensively throughout boat interiors and exteriors.

TACO offers an assortment of trim and moulding products; each ideally suited for a wide range of applications - from aluminum door frames and transom trim to vinyl channels, corners and edge moulding for cabinets. TACO hatch tapes and weather seals are well suited for use in live wells, hatches and other enclosures.

MATERIALS

Depending on the product line, TACO's trim and moulding products are offered in aluminum, vinyl and specially formulated rubber compounds. TACO insists on using prime billet 6000 series aluminum alloys to ensure superior structural strength, precise bending and long-lasting performance. Vinyl and plastic products are made from prime resin and warranted for 5 years. TACO weather seal and hatch tape products are made of specially formulated rubber compounds, designed and engineered to provide maximum sealing capacity and protect against weathering and vibration.

TACO STOCKING INVENTORY PROGRAM

All TACO trim and moulding products featured in this catalog are part of TACO's industry leading stocking program, which offers competitive pricing, a wide assortment of product and stocked inventory to ensure ready availability.

Hinges & Latches

TACO Metals offers and inventories a wide array of hinges and latches for use in a variety of applications. Product offerings include:

- » Continuous or piano hinges
- » Cast hinges
- » Stamped hinges
- » Latches
- » Specialty hardware

CUSTOMIZED CONTINUOUS HINGES

TACO offers a variety of custom fabrications available to provide design flexibility and meet custom specifications. Custom fabrications include: Custom cut lengths; custom hole diameters, centers and locations; swaging to form hinge leaves for a variety of configurations. A variety of custom finishes are available as well, including painting, aluminum anodizing, stainless steel polishing and sanding. Contact your TACO representative for information.

INNOVATIVE DESIGNS

TACO's design and engineering team strive to develop innovative new products that will help to make our customers' jobs easier. Whether it is designing, building or selling boats.

BALL & SOCKET PIVOT DESIGN

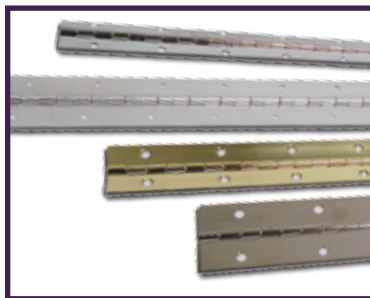

The newest TACO innovation is the Intelli-Hinge. This unique innovation offers boat designers unprecedented design flexibility and versatility. The unique ball and socket pivot point permits hinging on a variety of surfaces regardless of the contour, including concave, convex and multiple plane surfaces. The unique design of the Intelli-Hinge allows it to perform in applications where conventional hinges simply cannot function.

TACO STOCKING PROGRAM

All TACO hinges, latches and accessories featured in this catalog are part of TACO's industry leading stocking program, which offers competitive pricing, a wide assortment of product and stocked inventory to ensure ready availability. For specialized applications TACO will design or customize a hinge or latch to meet specific requirements.

Utility Hinges

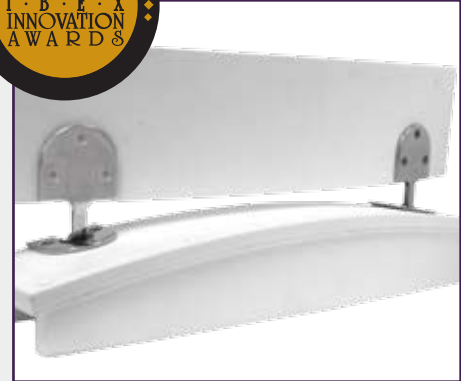

- Features stainless steel type 304 and 316
- Offered in a variety of styles and gauges

FEATURE PRODUCT

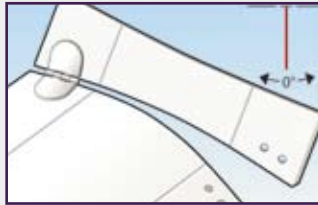

Intelli-Hinge

Patent-pending design offers unprecedented flexibility.

- › *Integrated ball-&-socket pivot point allows pivoting on concave, convex and multiple-plane surfaces*
- › *Hinges from any two sides, unlike conventional fixed-axis hinges*
- › *Low-profile Euro styling enhances the look of any boat*
- › *Polished stainless steel type 316 and Delrin insert prevent corrosion, galling and eliminates rattling*

Intelli-Hinge permits hinging concave surfaces

Conventional hinge unable to perform

Lifting Handles - LATCH-tite™

- Complete line of high performance, trouble-free, anti-rattle handles
- Excellent water penetration protection
- Perfect for dry storage, electronics boxes and hatches of all types

FEATURE PRODUCT

LATCH-tite™

LATCH-tite™ handles have been designed to provide high performance, trouble free use in the most hostile conditions.

The latches are made from stainless steel type 316 or injection molded glass reinforced nylon.

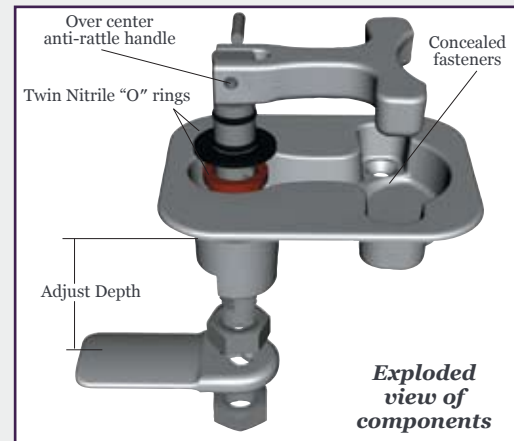

All shafts and tongues are made from stainless steel type 316.

Round, square and rectangular designs enhance any marine craft. Latches can be installed vertically or horizontally, making them ideal for any opening.

The LATCH-tite series is for applications that require a heavy-duty, high performance construction and high quality appearance.

- › Unique patented stainless steel shaft with bushing and twin Nitrile "O" rings for greater protection against water penetration
- › Over center anti-rattle handles provide quiet operation
- › Concealed fasteners available
- › Mold plugs available upon request for boat builders

Fabrication

TACO Metals knows “metals”. For over 50 years, TACO has supplied boat builders and marine fabricators with high quality metal products. From tower to deck, bow to stern, TACO products can be found on boats world wide.

All products use the finest materials including prime billet anodized aluminum and marine grade stainless steel type 304 and 316 to ensure consistency, high quality and longevity.

- » Pipe and Tube is available in aluminum and marine grade stainless steel
- » Top and Tower Hardware including anodized aluminum angles, pads, pins and extrusion plates
- » Weld-On and Accessory-Ready Rod Holders offered in a variety of sizes for accessorizing tops, towers, arches and poling platforms
- » Accessory-Ready Adapters and Accessories offer unprecedented accessorizing capabilities
- » Canvas Top Fittings and Upholstery Hardware including polished stainless steel Ball and Socket rattle-free fittings
- » Complete Fabrications including T-tops and Leaning Posts
- » Stainless Steel Railing and Rail Fittings in a variety of materials

COMPLETE FABRICATIONS

TACO Metals has expanded its marine fabrication products to include complete fabrications that enable customers to add to their product lines without increasing overhead costs. TACO's Neptune product line includes OEM-quality Leaning Posts and T-tops that allow fabricators to offer additional quality fabrications and focus their time, labor and materials on other custom products.

ACCESSORY-READY™

Accessory-Ready is an innovative approach to boat accessorizing that offers unprecedented flexibility for the fabricator, boat dealer and ultimately the boater. Accessory-Ready includes a comprehensive group of adapters that can be incorporated into new or existing fabrications and offers interchangeable accessorizing and personalization of a boat.

Patent-pending male and female Accessory-Ready adapters are designed with specially engineered “splines” which mate for secure mounting of accessories and allow for adjustable positioning and removability.

T-top & Tower

- Structured extrusions and machined pads and pins
- High-quality anodized aluminum materials in a variety of finishes

FEATURE PRODUCT

TACO's Outrigger-Ready Program

Available for use on all tops.

- › Pre-drilled, weld-on extrusion plates save time and add value through the distribution channel
- › Eliminate the need for special-order packages and reduce boat inventories

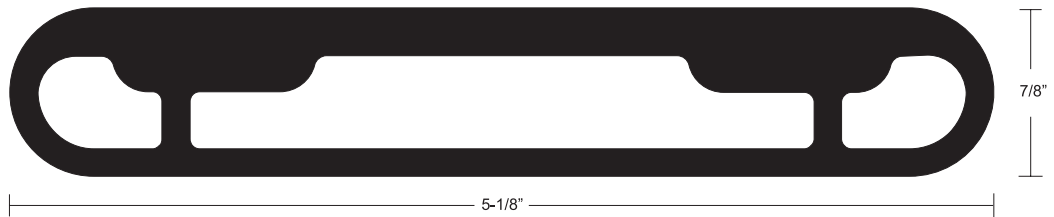

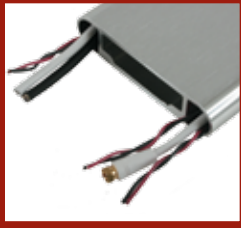

Structural – Aluminum

Multi Function T-top Extrusion Plates

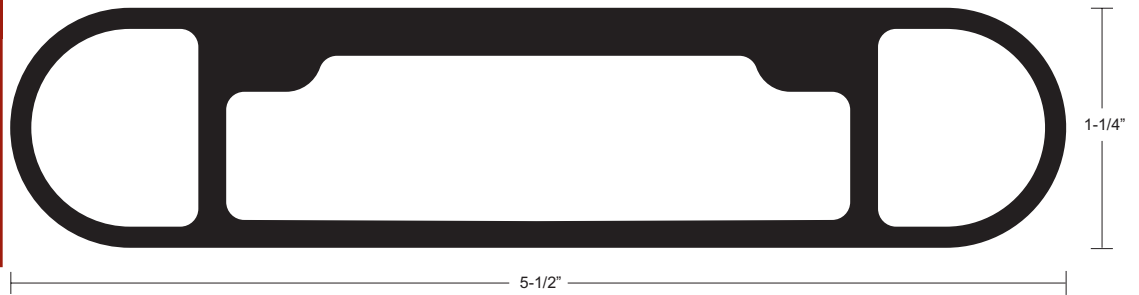

- Heavy-duty, suited for a variety of applications and widely used for outrigger mounts
- Offered pre-drilled for easy mounting of Grand Slam 270 and 370 outrigger mounts
- Choice of low profile and T-top pipe height
- Conceals wiring
- Sold in pairs

The GSE-1940

features larger channels for running all co-axial and power cables from T-top lighting, antennas and electronics.

Rod Storage

- Rod storage for all size rods
- Offered in single and multiple rod storage
- Variety of materials and finish

FEATURE PRODUCT

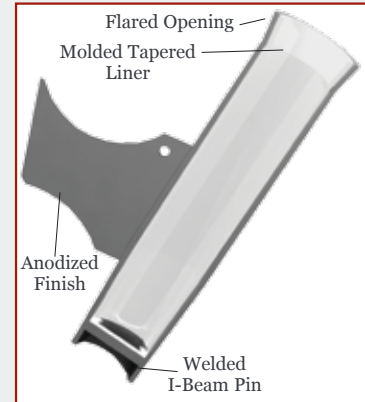

TACO's Rod Holders - Superior by Design

TACO anodized aluminum rod holders are stocked in a variety of styles, sizes and finishes.

All TACO rod holders are anodized for lasting protection. Available in polished and brushed finish.

TACO rod holders with flared design allow for easy rod placement. Welded I-Beam pin construction seats rod butt securely in place and is proven to be 2-1/2 times stronger than competitive rod holders.

Specially formulated, fungal-resistant vinyl liners are tapered to fit snugly with rod holders.

Rod Holders - Aluminum

Flared Weld-On

- Weld to towers, T-tops, radar arches, railings and leaning posts
- Welded I-Beam securely seats rod butt
- Anti-fungal vinyl liners
- 6463 aluminum, brite anodized

Shades & T-tops

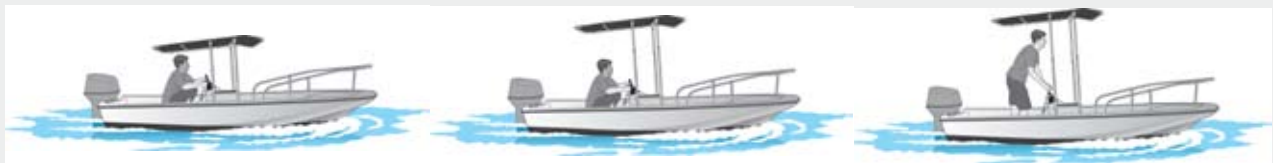

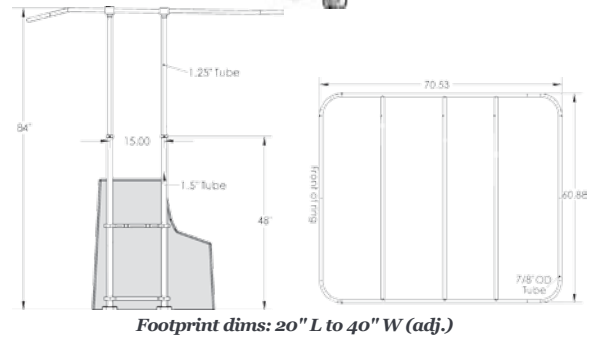

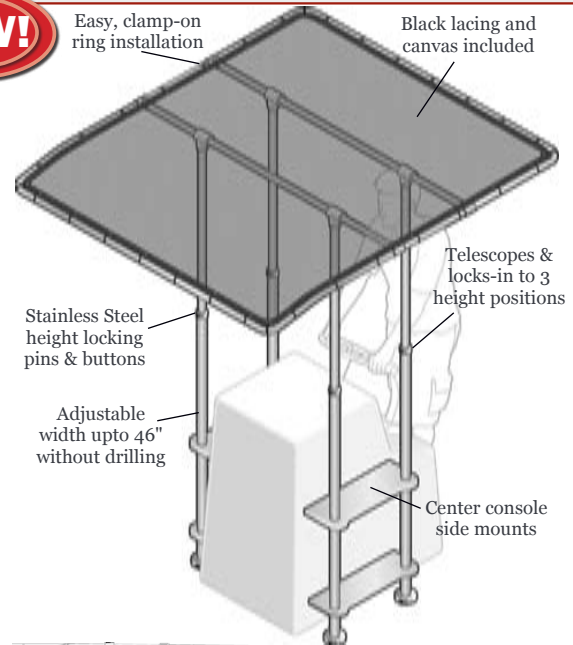

- Neptune anodized aluminum tops for center consoles
- Lightweight adjustable-height canvas tops for shade
- Rugged OEM-style adjustable width T-tops for fishing boats
- Individually boxed and labeled for readily identifiable product contents and attractive retail merchandising

FEATURE PRODUCT

Neptune Adjustable Tele-Shade

- Combines the walkaround benefits of a T-top with the lightweight adjustability of a "Bimini Top"
- Add shade without obstructing deck & gunnels
- Mounts to center console for full walkaround access
- Telescopes from 4-1/2' to 7' for use with low profile consoles & boat storage
- Stainless steel locking buttons & pull pins for easy and secure height adjustments
- Adjust to fit consoles up to 46" W x 48" H
- Unique clamp-on assembly offers do-it-yourself installation with minimal tools required
- Anodized aluminum with satin finish for use in salt and freshwater environments
- Weighs only 30lbs.

Neptune
By TACO

Fully retracted
for low profile consoles, trailer and storage

Intermediate height

Full height
for higher consoles

Neptune Tele-Shade

- Anodized aluminum • Satin finish • Stainless steel buttons and locking pins • Clamp-on assembly
- UV-resistant black canvas • Adjustable height

TACO Metals sport fishing

products lead the way in innovation, quality and performance. TACO's highly qualified engineering staff and fishing enthusiasts work together to develop industry-leading products. All products are tested to ensure they meet TACO's high standards and are backed by an industry-best 3-year warranty.

TACO Sport Fishing products include:

OUTRIGGER MOUNTS

- » A full line of outrigger mounts for tops and gunnels
- » Well-known in the industry, TACO Grand Slam series outrigger mounts are the leaders in performance and reliability

TELE-OUTRIGGERS™

- » Anodized aluminum with stainless steel type 316 spring buttons and eyelets offer superior strength, durability and smooth operation
- » Offered in a variety of sizes and colors

ROD HOLDERS

- » TACO offers an extensive array, from clamp-on to surface mount. TACO rod holders are offered in a variety of sizes, materials, colors and finishes
- » Available in stainless steel type 316, anodized aluminum, glass-reinforced nylon and UV-stabilized polyethylene

ROD STORAGE

- » Wide variety for use on boats of all sizes and types - fishing, cruising, sport, and pleasure
- » Products designed for transoms, consoles, gunnels and fly-bridges
- » Available in stainless steel type 316, anodized aluminum and UV-stabilized polyethylene

FEATURE PRODUCT

Grand Slam 370

- › Fully adjustable from under the top for safe operation
- › Versatile design for use on soft tops and hard tops up to 2" thick
- › Rugged, rotator handle pulls-down and locks-in 12 fishing positions
- › Offset 30° rotator handle offers added hand clearance
- › Crank handle adjusts trolling height and folds up for added under top clearance
- › Lay down arm position for safe navigation under bridges, trailering and storage
- › Bolt-down installation in minutes with Outrigger-Ready plates
- › Installs in minutes with Outrigger-Ready plates
- › Ideally suited for 35' - 45' center console and express boats

Fully Adjustable from Under Top

Grand Slam 370 Outrigger Mount

- Top mount • Brushed anodized aluminum body • Polished stainless type 316 steel arm • Accepts 1-1/2" butt end diameter, heavy-duty outriggers • 4" x 6" mounting base • Sold in pairs

Mounting Plates

- Easy clamp-on installation
- Fits 1-1/16" and 1-5/16" O.D. pipe and oval pipe
- Available pre-drilled or undrilled

Clamp-On Mounting Plate

Anodized Aluminum

- Easy clamp-on installation • Fits 1-1/16" and 1-5/16" O.D. pipe and oval pipe
- Available pre-drilled and undrilled • Modular design allows plate to be cut-to-size to fit all tops

Retail	Description	Length	Units
GSE-1001-1	Universal Clamp-On Mounting Plate	30"	Each
GSE-1002-1	Grand Slam & Sport Slam Clamp-On Mounting Plate	30"	Pair

Clamp-On Mounting Plates make a boat "Outrigger Ready" in an instant, without welding! TACO offers pre-drilled models for mounting TACO Grand Slams and undrilled for mounting lights, radars and antennas.

TACO's clamp-on plates are designed for 1-1/16" & 1-5/16" O.D. pipe and 1" x 1-1/2" oval pipe, common on most T-top outer rings and arches.

Recessed screw design allows the clamp to capture both the T-top pipe and the special mounting plate.

Clamp Assembly

Pedestal Systems

TACO METALS partners with Netherlands-based Zwaardvis, a leader in Europe recognized for supplying quality, engineered marine pedestals systems. The European design, engineering, and workmanship is readily apparent.

Zwaardvis seat and table pedestals are constructed from strong, corrosion-resistant materials and carry a 3-year warranty. Marine grade stainless steel, anodized aluminum alloys and injection molded resins ensure long lasting protection from constant exposure to the harsh elements of sun and saltwater.

TACO's pedestal systems include a wide range of interchangeable columns, supports, bases and accessories needed to create table and seat pedestal systems in a variety of sizes and styles to suit the application.

SEAT PEDESTAL SYSTEMS

TACO's Poseidon seat pedestal systems are designed for ease of use and lasting performance. Poseidon pedestals are constructed using the finest premium materials and components. Anodized aluminum columns with marine grade stainless steel components, Delrin bearings, and gas-assisted height adjustment combine to offer superior quality and performance. The addition of a TACO seat support and slide assembly components allow for full 360° swivel and fore/aft slide.

TABLE PEDESTAL SYSTEMS

Zwaardvis pedestals are offered in a variety of sizes and styles. The exclusive new Triton 3-stage table pedestal system offers three locking height positions. Strong stainless steel locking mechanisms with single-motion clamps to secure positioning.

TACO also offers a line of removable side mount table pedestal systems. These polished stainless steel table pedestals are designed for easy removal and storage when not in use. The new line of adjustable side mount table pedestals offer adjustable tilt table mounts and telescoping locking leg for a table pedestal system that adapts to the angle of any boats gunnel, regardless of the contour.

CUSTOM REQUIREMENTS

For requirements outside the stocked products offered in this catalog, TACO will customize columns to the fixed or adjustable height needed to match specific boat designs.

Seat & Accessories

Poseidon Seat Pedestal Systems

- Solid anodized aluminum and stainless steel construction
- Available with adjustable and fixed height options
- Power-Matic model features effortless gas-assist height adjustments
- Full range of adjustments including height, fore/aft and 360° swivel

FEATURE PRODUCT

Poseidon Seat Pedestal Systems

Precision engineered and built to last, the Poseidon anodized aluminum pedestal with optional Pacific Helm chair is extremely durable, comfortable and functional.

Poseidon adjustable pedestal systems feature anodized aluminum column with polished stainless steel lock-in clamps. Power-Matic pedestals offer effortless gas-assisted seat height adjustments.

Seat support and slide assembly with Delrin bearings provide smooth fore/aft slide and 360° full rotation with locking seat positions every 15°. All Zwaardvis-designed seat pedestals comply with ABYC H-31 requirements.

Poseidon pedestal with Power-Matic Column and Pacific Helm chair

Seat Columns Assembly

Poseidon Power-Matic Column & Seat Slide

- Anodized aluminum
- Satin finish seat support and tapered base (100mm/76mm)
- Seat support features Delrin bushings for smooth 360° rotation and 6" fore/aft slide
- Stainless steel locking clamps and collar
- Power-Matic, gas-assist seat height adjustments for effortless control

Z20-3760

The Zwaardvis adjustable seat pedestal line is designed for the medium to large cruiser market. All columns are single tapered on the bottom to permit a secure fit into the base while allowing for easy removal and storage. Adjustable columns are available in manual or Power-Matic variations. Power-Matic pedestals contain gas-assisted cylinders for the ultimate in precise and convenient adjustment.

The seat support allows for full, 360° rotation and contains an internal locking mechanism for a secure fit to the pedestal.

For custom requirements, TACO will customize pedestals to fit specific boat designs. Pedestals can be engineered and manufactured for fixed heights or adjustable to a custom height range.

76mm (3") Fixed Table Pedestal Systems

Table Support

- Aluminum • Bow-tie design provides superior table support in a shallow profile for increased leg room

Fixed Height System (Dual Taper)

Fixed Height System (Single Taper)

The Zwaardvis 76mm Fixed Table Pedestal line is designed for the medium cruiser market. All columns are single tapered on the bottom to permit a secure fit into the base while allowing for easy removal and storage.

Table support options allow for fixed or leaf tables. Fixed tables are designed to receive a dual tapered column while the leaf supports receive a single tapered column. Both styles permit removal of the table surface for convenient storage.

The Zwaardvis table pedestal systems provide a wide array of base options to cover most applications. All bases are designed to accept the innovative Zwaardvis tapered column for convenient removal and storage.

For custom requirements, TACO will customize pedestals to fit specific boat designs. Pedestals can be engineered and manufactured for fixed heights and adjustable to a custom height range.

Fixed Height System

The Zwaardvis 60mm Fixed Table

Pedestals are engineered with aluminum extrusions and a variety of castings specifically for the small cruiser market where space is at a premium. All columns are tapered on the bottom to permit a secure fit into the base while allowing for easy removal and storage.

TACO columns are available with smooth, contemporary surface or traditional ribbed surface.

Table support options allow for fixed table tops receiving a dual tapered top column. The 60mm system is ideal for smaller diameter table tops in particularly tight quarters.

TACO introduces the new Z10-4086, base with a shorter cup design, ideal when space is limited below the deck.

The Zwaardvis table pedestal systems provide a wide array of base options to cover

Accessories

TACO Metals offers a wide variety of marine accessories designed to offer convenience and enhance the overall boating experience.

The emergence of LED lights has revolutionized lighting by offering an efficient alternative to fluorescent and halogen lighting. LED lighting provides long-lasting, high output light with little or no radiant heat. TACO introduces its LUMA line of marine LED lights, designed and tested specifically for use in the marine environment. TACO offers low-draw, 12-28V DC hard-wired spot lights, deck lights, spreader lights and white/red switchable T-top lights. TACO also offers portable, rechargeable LED lights that charge quickly and last up to 3+ hours on a single charge.

The Pelican file table line includes file tables for docks and gunnels. The rugged Dock Side file table is a heavy-duty, permanent mounting file table with a generous size UV-resistant file table supported by stylish and durable polished anodized aluminum legs. TACO also offers a wide range of portable, gunnel mounting file tables featuring adjustable tilt and fixed angle tables.

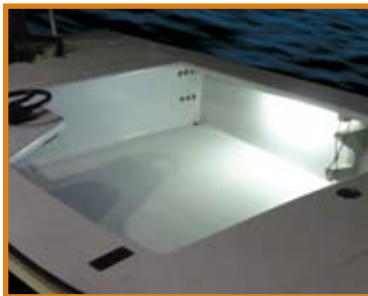

Accessorizing boats has never been easier with TACO's durable UV-stabilized polyethylene tool holders and drink holders.

When it comes to replacing wood, laminates or plastic accessories on boats, or creating new ones, leading boat experts know they can count on TACO's Marine Lumber to last the lifetime of the boat. Marine Lumber is a UV-stabilized marine grade polymer sheet with excellent resistance to sun and saltwater and is maintenance free. Marine Lumber can be easily cut, routed, shaped, and drilled with standard woodworking tools and making it the ideal material to use for making marine accessories.

- High output, low heat
- Waterproof (non-submersion)
- Offered in hard-wired and rechargeable
- Variety of styles and mounting options

FEATURE PRODUCT

LED Marine Lighting

TACO introduces LUMA LED lights; a complete line of high efficiency LED lighting designed and tested* for use in the marine environment.

- › **Waterproof:** All connections, lenses, and housings are sealed to protect and prevent water penetration for non-submerged applications.
- › **Non-Corrosive:** Anodized aluminum, stainless steel and high grade plastic polymers were chosen for their non-corrosive attributes and ability to withstand harsh marine environment. All lights are salt water tested for 100 hours ensuring they meet TACO standards.
- › **Durable:** Shock/vibration-resistant; ideal for withstanding the pounding of high seas and the vibration from constant motor operation.

*All test results in accordance with IESNA LM-79-2008

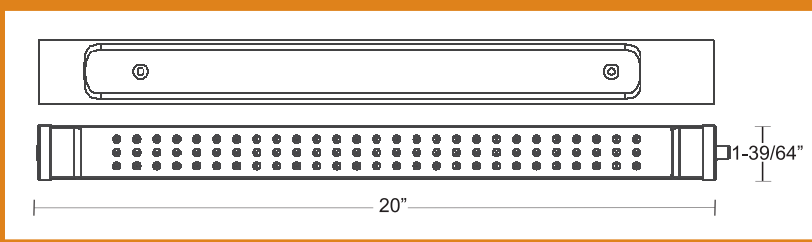

Hard-Wired LED Lighting

T-top Lights

- Low < 1 amp draw • UV and impact-resistant polycarbonate lens • Switchable white/red light
- Bright, 300 lumens white light • Low glare, 150 lumens red light

LED T-top Lights feature 108 LEDs for bright, long-lasting white light ideal for lighting up T-tops, bridges, engine rooms, lockers, enclosures. Switch to red light for low glare chart reading.

A lengthy 18' of wiring cable to accommodate most tops and bridges. Pre-drilled housing or mounting clips offer fast and easy mounting to tops.

F38-2050-1

F38-2060-1

Bulk/Retail	Description	LEDs	Peak Lumens (l)	Length
F38-2050-1	LED T-top Light w/Polished Anodized Aluminum Housing	108 (72 White, 36 Red)	300l (White); 150l (Red)	20"L x 2" Diameter
F38-2060-1	LED T-top Light w/Mounting Clips	108 (72 White, 36 Red)	300l (White); 150l (Red)	20"L x 1-5/8" Diameter

Hard-Wired LED Lighting (Cont'd)

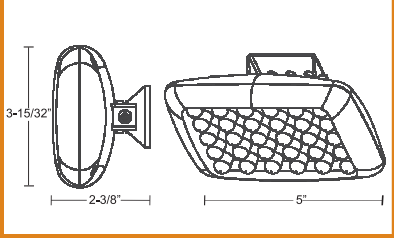

Deck & Spreader Lights

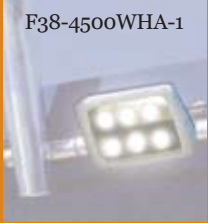

- Low < 1 amp draw • Universal 12 - 28V DC operation • Impact-resistant, sealed white housing with polycarbonate lens • Stainless steel tilt mounting bracket • Available with adjustable nylon clamp for clamp-on assembly to standard 1-1/16" & 1-5/16" O.D. T-top outer rings

Light up decks with LED Deck and Spreader Lights. High output bright white light provides 100,000 hours of operation that won't drain batteries, drawing less than 1 amp. Choice of output power for use on boats of all size. Waterproof to withstand saltwater spray and wash downs.

Rechargeable LED Lighting

Rechargeable LED Lighting operate up to 3 hours on a single charge for long-lasting bright white light. Lightweight and portable for hands-free operation. TACO rechargeables also offer versatile mounting for use anywhere on board.

Bright Stick, Deep Drop, Work Light

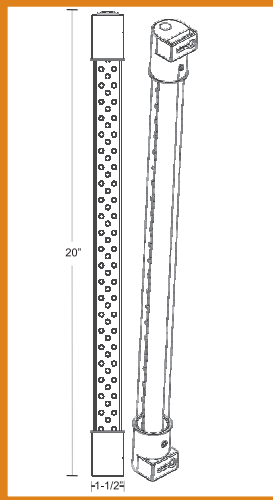

- Up to 3+ hours on a charge • Includes AC/DC charger and lighter adapter • Variety of styles offered with various mounting options

The Bright Stick

include suction cups, mounting clips and magnets for use down below or on windshields, gunnels, lockers and Bimini tops.

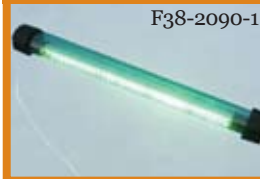

F38-2020-1

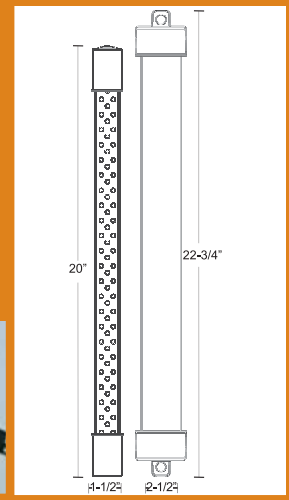

The Deep Drop Float Light

with bright green light enhances fish activity. Water-tight outer tube is naturally buoyant for surface use. Add weight for use in depths to 100'.

F38-2090-1

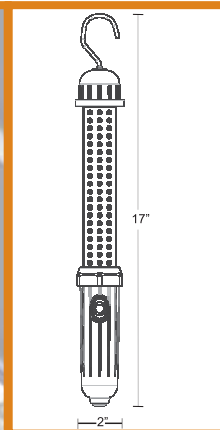

The Blue Work Light

is a great task light offering heavy-duty grip and stainless steel swivel hook ideal for work in small, confined areas.

Filet Tables

- UV-stabilized, high density polyethylene
- FDA approved tables
- Dock-side table for permanent mounting
- Gunnel tables mount securely in gunnels

Dock Side Filet Table

- Permanently mounts on dock side
- Six 3/8" x 2.5" lag bolts secure each leg to the dock
- Water nozzle holder for convenient use and clean-up
- Drink holder mounts to the side
- Filet plier and knife holder slots
- Mounting hardware included
- 48" L x 37" H x 21" W
- Holds up to 250lbs.

P01-4821W

Adjustable Poly Filet Table

- Adjustable tilt
- FDA-approved table
- Includes stainless fasteners
- Slotted for plier and knife holder and drainage
- Rugged engineered nylon tilt mount
- Folds flat for storage
- Fits into any rod holder
- The mount locks at any angle

P01-2120W

Fixed Poly Filet Table

- FDA-approved table slotted for plier and knife holder and drainage
- Fixed angle mount
- Durable, anodized aluminum and UV-stabilized, high density polyethylene
- Stainless fasteners
- Offered in two sizes

P01-2120FW

Removable Bait Filet Board

- Stores flat
- Everything needed for mounting included
- Holds pliers and knife
- Heavy-duty, UV-stabilized polyethylene construction

P01-1613W

Retail	Description	Dimension	Color/Finish

Accessory-Ready™ Poly Accessories

- Includes female adapters
- Fits Neptune III Leaning Post and all male adapters
- FDA approved tables
- Drink holders

FEATURE PRODUCT

Accessory-Ready™ Poly Accessories

Accessorizing is easy with TACO's Accessory-Ready file table, fishing plier and knife holder and drink holders. The included Accessory-Ready female adapter makes these convenient poly accessories easy to add and remove, requiring only a standard Allen wrench .

Designed for use with the Neptune III Leaning Post (page MF58), these Accessory-Ready accessories can also be used in conjunction with TACO's Accessory-Ready male adapters (page MF55) for universal use on any T-tops, poling platforms and railing. Add a surface mount male adapter and add to gunnels and bulkheads.

Poly Filet Table

- Mounts horizontally • Fits Neptune III Leaning Post • Fits all male adapters • Includes female adapter mount
- FDA-approved table slotted for plier and knife holder and drainage • Durable, anodized aluminum and UV-stabilized, high density polyethylene • Offered in two sizes

Finish Specifications

Finishes specified in this catalog reflect TACO's stock finishes. Other finishes are available provided minimum quantity requirements are met and sufficient lead-time is given.

ANODIZED ALUMINUM FINISHES

Anodizing is an electrolytic process that redeposits a protective coating on an aluminum surface. This coating becomes an integral part of the aluminum and will not peel or flake.

The following is a complete list of anodized finishes available either from stock and/or special order. Please refer to our finish codes when specifying a particular finish.

Brite Dip Finishes

BLY: Silver Brite Dip and Anodized
Anodized finish for chrome like appearance. Withstands corrosive environments. Extrusion flow lines may appear through the anodized finish.

Premium Brite Dip Finishes

BXY: Polished, Brite Dip Anodized
Simulated stainless steel finish for corrosive and highly aesthetically critical environments requiring the most blemish-free aluminum extrusion available. Most extrusion flow lines are removed during the polishing process.

BLS: Brite Dip, Mechanically Linear Sanded and Anodized Fine wire brush and anodized finish. The mechanical

brushing masks unsightly scratches that occur from contact and handling during fabrication or everyday use.

BSA: Silver Brite Dip, 320 Grit
Mechanically spiral sanded and anodized, for round tube and pipe. Mechanically sanded and anodized finish for products with corrosive, high traffic exposure. The mechanical brushing masks unsightly scratches that occur from contact and handling during fabrication or everyday use.

BSS: Silver Brite Dip, 320 Grit
Mechanically spiral sanded and anodized, for round pads. Mechanically sanded and anodized finish for products with corrosive, high traffic exposure. The mechanical brushing masks unsightly scratches that occur from contact and handling during fabrication or everyday use.

BSY: Silver Brite Dip, 180 Grit
Mechanically spiral sanded and anodized, for extrusions. Mechanically sanded and anodized finish for products with corrosive, high traffic exposure. The mechanical brushing masks unsightly scratches that occur from contact and handling during fabrication or everyday use.

Standard Anodized Finishes

TAL: Polished, Clear Anodized
Mechanically buffed, semi-brite. A traditional anodized finish with a subtle polish. Most extrusion flow lines are removed during the polishing process.

VEL: Etch, Clear Anodized (satin)
A cost effective, matte finish. Provides the greatest corrosion protection for minimal aesthetically important exposure.

Painted Finishes

PCS: Silver Powder Coat
Pre-treated, painted and then baked for a durable finish. For moderately corrosive environments. Hardware components can be easily matched for a consistent appearance. Other colors are available upon request.

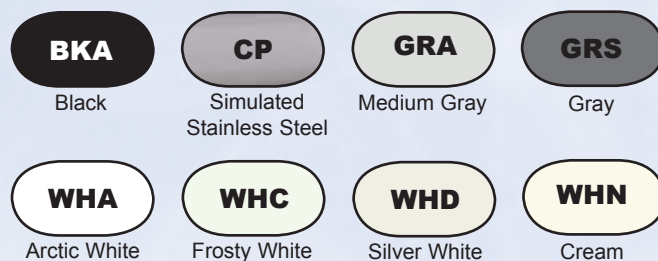

No Finish

AEY: Mill finish – as extruded
No secondary finishing. Primarily used for industrial applications or for third party finishing.

VINYL RUB RAIL COLOR GUIDE

Colors specified in this catalog reflect TACO's standard rub rail colors. Other colors are available provided minimum quantity requirements are met and sufficient lead-time is given.

DUE TO VARIATIONS IN VIEWING AND THE PRINTING PROCESS, COLOR MAY VARY SLIGHTLY FROM THE ORIGINAL PRODUCT. COLOR SAMPLES AVAILABLE ON REQUEST.

Terms & Conditions

LEAD TIMES

TACO's lead times are based on product availability and the time it will take to prepare and package products to avoid freight damage.

Unless otherwise stipulated, TACO will ship most stock orders the same day if they are received before 10:00 a.m. Orders received after 10:00 a.m. will ship the following day.

All orders will be confirmed via telephone call or fax by Customer Service. If a product is out of stock, you will be advised of the anticipated ship date.

FREIGHT PROGRAM

TACO offers Full Freight Allowance (FFA) for orders shipping to one location and meeting a minimum order value of \$3000. Orders eligible for FFA will ship freight prepaid on one of our preferred carriers or on TACO's own fleet of dedicated trucks.

TACO's freight program has been designed to minimize the amount of damage that can occur in transit while still ensuring efficient delivery time for your needs. The transportation options available are:

- **Common carrier.** Orders will ship freight collect on your carrier of choice. TACO can assist in recommending a carrier and providing approximate freight quotes.
- **UPS.** Orders will ship prepaid and freight charges will be added to the invoice. We will advise on weight and size limitations at the time shipping arrangements are being made. Acceptable UPS standards are less than 150 lbs, 130" in combined length and girth and/or 108" in length.
- Orders can also ship as "**consignee billing**" (recipient of goods will be paying for freight) or "third party billing". Each of these instances requires an open account with the chosen carrier.

TACO Shipping Program. This program allows a quick turn around on lineal profiles. Lineal profiles between 144" and 240" in length are available with delivery to anywhere in the continental U.S. For your convenience, freight charges will be prepaid and added to the invoice. The fee schedule for this program is based on package weight and dimensions, with a flat rate of \$130.00 up to 100 lbs. Residential deliveries will be charged an additional fee of \$50.00.

DAMAGE, LOSS AND/OR SHORTAGE

TACO exercises the utmost care when packaging and shipping products to ensure your order is received in good condition. Any visible damage or lost packages noticed at the time of delivery must be communicated to the freight carrier immediately and a claim should be filed (TACO recommends

adding a written note to the freight bill). TACO can assist with the process of filing a claim by providing information on the number of packages, shipment details and tracking but is unable to file a claim directly with the carrier once the goods have been received and accepted. It is also important that goods are inspected quickly to discover any hidden damages or shortages. Any additional shortages or damages should be communicated to Customer Service within five (5) days of receipt to ensure a replacement order is promptly processed.

RETURNED GOODS POLICY

TACO products are all carefully tested and inspected to ensure optimal levels of performance. It is the responsibility of the receiving party to check all materials to ensure form and fitness for the application for which product was purchased. In the event that material is not fit for application, TACO's liability is limited to material cost. Once product is altered in any fashion, TACO's liability ends. It is TACO's discretion whether product will be repaired or replaced without charge, subject to the performance guarantees stated in TACO's warranty.

All returns require prior authorization from Customer Service. An RM (Returned Materials) number will be issued for goods that appear to be defective or shipped in error. TACO will pay return freight and replace the goods in these two instances. On all other instances, a minimum restocking charge of 20% will be applied and TACO requires the goods to be shipped back freight prepaid. Please contact Customer Service for more information.

The following requirements are also applicable for returned goods:

- A copy of the original invoice must accompany all returns.
- TACO is unable to accept special order products (made to order, cut to length, etc.) for return or credit.
- Goods must be returned in original condition and packaging to avoid additional charges.

BUSINESS HOURS

Office hours are from 8:00 am to 5:00 pm, Eastern Standard Time, Monday through Friday.

PAYMENT TERMS

The accepted terms of payment are COD or Net 30 upon proper credit approval. To obtain a credit application and a list of credit requirements contact Customer Service.

PRICES

Products should be ordered in standard pack multiples (as defined in TACO's marine price sheets). All products ordered in less than standard pack quantities are subject to broken case pricing.

All prices listed on the price list are subject to change without prior notice

MINIMUM ORDERS

TACO does its best to be easy to do business with. Therefore, a minimum order requirement has been eliminated for marine trade customers. However, any orders below \$200 will be charged a \$20 handling fee. Additional charges may apply for cutting, coiling or special packaging.

SPECIAL ORDERS

As a service to TACO customers, products that have been deleted from this catalog can still be purchased if available from stock.

TACO will be pleased to provide pricing for unique lengths and colors of any extruded products listed in the catalog. Minimum quantities vary based on profile weight, material and finish requirements.

SAMPLE POLICY

TACO is pleased to provide free samples of any featured catalog items. To request a 2 to 6 inch sample of any lineal profile, please contact your TACO representative. Samples will ship freight prepaid via UPS-Ground or US mail within 48 hours of the original request.

TACO sells exclusively to marine trade customers.

TACO marine customers consist of marine manufacturers, including boat builders and accessory manufacturers, as well as marine wholesalers, major marine retailers and dealers and specialty marine mail order companies. Consumers and marine aftermarket repair customers are requested to visit the TACO Marine web site at tacomarine.com or contact Customer Relations at 800.653.8567 to locate retailers or distributors carrying TACO products on a regional basis.

POSSESSION OF THIS CATALOG DOES NOT ENTITLE THE BEARER THE RIGHT TO PURCHASE FROM THE COMPANY.

Warranty Information

TACO products are all carefully tested and inspected to ensure optimal levels of performance.

TACO warrants to the original purchaser of its products that should any product be proven defective in material or workmanship within one year of original purchase, they will be repaired or replaced without charge, subject to the performance guarantees stated in this warranty.

The TACO one year limited warranty applies to all products unless otherwise noted.

Five Year Limited Warranty:

TACO Rub Rail Products

TACO Trim and Moulding Products

TACO warrants to the original purchaser of its rub rail products that should any product be proven defective in material or workmanship within five years of original purchase, they will be repaired or replaced without charge, subject to the performance guarantees stated in this warranty.

These products are intended for pleasure crafts, used for recreation. Exposure to harsh marine environments requires all products to be rinsed with fresh water after use and be regularly maintained.

TACO guarantees the performance of these products as follows:

Aluminum Products are guaranteed against fading of anodized finish, corrosion, except for non-anodized surfaces resulting from cutting, machining, tight radius bending, scratching, metal to metal contact or other exposure of the base aluminum. This guarantee does not extend to corrosion resulting from galvanic reaction (improper electrical grounding). Slight fading or dullness of finish over time is a normal occurrence of weathering and does not constitute a defect.

Vinyl Extrusions are guaranteed against significant fading, cracking or swelling and significant reduction of plasticity, modulus, tensile strength and dimensional integrity. Slight color variation is a normal occurrence of weathering and does not constitute a defect.

Stainless Steel Products are guaranteed against loss of luster, corrosion and rust, except that resulting from cutting, machining, scratching or metal to metal contact. This guarantee does not extend to corrosion or rust from galvanic reaction (improper electrical grounding). Slight luster variation over time is a normal occurrence of weathering and does not constitute a defect.

TACO's liability and purchaser's exclusive remedy for damages shall not be greater than the purchase price of the actual product claimed to be defective and TACO shall not be liable for any indirect, incidental or consequential damages, including, but not limited to, present or prospective profits, reliance expenditures or commitments, reputation, goodwill or claims of third parties.

During this warranty period, your TACO product will either be repaired or replaced without charge to the original purchaser, when returned prepaid and insured with proof of purchase date. This warranty covers repair or replacement costs and freight back to the original purchaser-consumer.

This warranty does not apply to any product that has been damaged through alteration, mishandling, misuse, neglect or accident, unless otherwise stipulated. This warranty is in lieu of all other warranties, expressed or implied and no persons or representative is authorized to assume for the company any other liability in connection with the sale of this product. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitations of incidental or consequential damage, so the above limitations or exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights that vary from state to state.

Three Year Limited Warranty:

TACO Sport Fishing Products

TACO warrants to the original purchaser of TACO Sport Fishing products to be free from factory defects in materials and workmanship for a period of three years from the date of purchase. Should they be proven defective in material or workmanship within three years of original purchase, they will be repaired or replaced without charge, subject to the performance guarantees stated in this warranty.

These products are intended for pleasure crafts, used for recreation. Exposure to harsh marine environments requires all products to be rinsed with fresh water after use and be regularly maintained.

This warranty excludes the following:

Damage by collision, faulty or incorrect release clips, damage of components due to corrosive cleaners or lubricants, damage as a result of a combination of rough seas and high speeds, and failure to wash off salt water. This warranty is void if product has been damaged by neglect, unreasonable use, improper service or failure to follow maintenance guidelines.

TACO's liability and purchaser's exclusive remedy for damages shall not be greater than the purchase price of the actual product claimed to be defective and TACO shall not be liable for any indirect, incidental or consequential damages, including, but not limited to, present or prospective profits, reliance expenditures or commitments, reputation, goodwill or claims of third parties.

During this warranty period, your TACO product will either be repaired or replaced without charge to the original purchaser, when returned prepaid and insured with proof of purchase date. This warranty covers repair or replacement costs and freight back to the original purchaser-consumer.

Three Year Limited Warranty:

TACO Seat and Table Pedestal Products

TACO warrants to the original purchaser of TACO's Seat and Table Pedestal products to be free from factory defects in materials and workmanship for a period of three years from the date of purchase. Should they be proven defective in material or workmanship within three years of original purchase, they will be repaired or replaced without charge, subject to the performance guarantees stated in this warranty.

These products are intended for pleasure crafts, used for recreation. Exposure to harsh marine environments requires all products to be rinsed with fresh water after use and be regularly maintained.

This warranty does not include the following: Damage by misuse, overloading, faulty or incorrect installation, damage of components due to corrosive cleaners or lubricants, and failure to wash off salt water and otherwise provide proper care and maintenance. This warranty is void if product has been damaged by neglect, unreasonable use, improper service or failure to follow maintenance guidelines.

TACO's liability and purchaser's exclusive remedy for damages shall not be greater than the purchase price of the actual product claimed to be defective and TACO shall not be liable for any indirect, incidental or consequential damages, including, but not limited to, present or prospective profits, reliance expenditures or commitments, reputation, goodwill or claims of third parties.

During this warranty period, your TACO product will either be repaired or replaced without charge to the original purchaser, when returned prepaid and insured with proof of purchase date. This warranty covers repair or replacement costs and freight back to the original purchaser-consumer.

For prompt warranty service, return your TACO product with dated proof of purchase to the address below:
