 **MEGAFEND** MOORING PRODUCTS

FOCUS

Megafend products make yacht mooring or docking a safe, protected, crew-friendly experience. Each also compliments your vessel with an elegant look while you enjoy relaxing marina time.

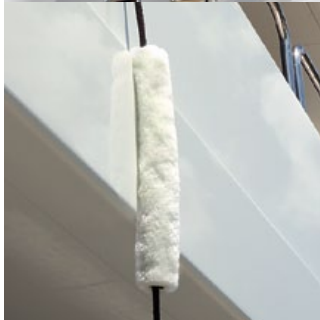

- We focus on creating mooring accessories that embody innovation, design simplicity, handcrafted quality and efficient functionality for a

World Class result.

Our creative implementation of advances in materials technology yields the marine industry's longest lasting, most cost effective protection for yacht surfaces.

- Contact us for custom handcrafted mooring products to match your exact needs, or for more information about our standard line of products built with the same extreme level of quality.
 - Personalized hands-on service and delivery dates are absolute.

When all is said and done, **commitment** to your satisfaction is our cornerstone.

Megafend Superyacht Boarding Platforms

- Carbon fiber for maximum strength
- Hypalon covering for high impact protection
- Lightweight closed cell construction
- Marine stainless steel railings & components
- Non-skid surface
- Custom configured to match your needs.

Megafend Transom Fenders—

(Right and facing page)
provide lasting protection and
safe access to tenders.

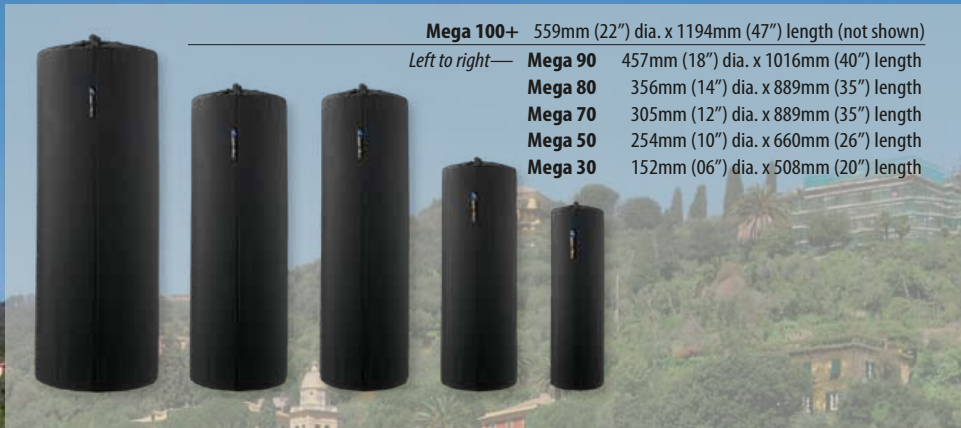

WORLD CLASS

Megafend Superyacht Transom Fenders

Expressly designed by Megafend to provide long lasting protection for superyacht transoms, tenders and water toys. Engineered tough, Megafend Transom Fenders are custom configured for your yacht and built in sections for easy install when needed and fast stowing after use.

INNOVATIVE

Mega 100+ 559mm (22") dia. x 1194mm (47") length (not shown)

Left to right— **Mega 90** 457mm (18") dia. x 1016mm (40") length

Mega 80 356mm (14") dia. x 889mm (35") length

Mega 70 305mm (12") dia. x 889mm (35") length

Mega 50 254mm (10") dia. x 660mm (26") length

Mega 30 152mm (6") dia. x 508mm (20") length

Megafend Solid-Core Fender Series— The perfect solution for storm conditions. Each is covered in durable Sunbrella® marine fabric (black standard). Over 100 custom colors available on request. All standard models use a 25 mm (1") pvc pipe through the center for hanging. An optional stainless steel center rod is available for conditions where extreme service is the rule. Our stainless kit is equipped with a ring over each end.

SOLID PROTECTION

Typical sizes—

- 10" dia x 26" long
- 14" dia x 36" long
- 16" dia x 60" long
- 18" dia x 45" long
- 20" dia x 52" long
- 24" dia x 48" long
- 24" dia x 58" long
- 26" dia x 65" long
- 36" dia x 48" long
- 38" dia x 75" long... also **custom sizes, colors and**
- 28," 38," 48," and 58" diameter round models

— all industry sizes available

Megafend EDW™ Extreme Duty Welded Inflatable Fender Series—

Light-in-weight, easily inflated, easily stowed in minimal space. EDW™ inflatable fenders are made with designed-in performance that can only be achieved by our state-of-the-art RF thermo-welded seam and end cap construction. No glue. Our new-gen nylon fabric is tougher, stronger, better looking material, with superior abrasion resistance, UV resistance and tear strength, yielding many more years of service. EDW™ fenders are backed by a peace-of-mind performance warranty.

Megafend Fender Hooks and Specialty Hook Applications

Hundreds of designs have been built for discerning clients 'round the world. Each is custom handcrafted to fit the rail profile of your yacht and many designs are ultimately patented. All assure perfect protection of varnished, painted, or stainless hand rails. Suspended fender lines remain clear of yacht surfaces.

Core structure is quality 316 stainless steel plate or **optional** carbon fiber, precisely formed.

Most styles feature a soft sheepskin liner covering the core's underside.

The outside is covered with premium grade **maintenance-free**, never-oil leather in popular marine colors. Hardware choices include custom D-rings, box-rings, cam cleats, stainless fairleads, threadless fairleads, spreader bars and rod holders among others. All of our hooks are built to exceed your rigorous criteria for superyacht mooring protection.

Never-Oil leather colors: brown, black, blue, green and white.

Typical configurations shown. Shape & hardware are configured to your exact needs.

CARBON FIBER —exclusive

Reverse side.

Materials innovation is a Megafend benchmark—

Our craftspeople, known for working magic in stainless steel, have taken that skill beyond the next level by using premium carbon fiber core in fender hooks and special purpose hooks. This outstanding strength/weight ratio material is formed to shape and available with decorative overlay, overlay with glistening clear-coat, an elegant teak overlay with clear-coat, or in our never-oil, maintenance-free leather covering.

Detail

All Megafend fender hook designs and specialty hooks are now available in carbon fiber.

Typical configurations shown. Shape & hardware are configured to your exact needs.

Acrylic

FenderCoat™ Inflatable Fender Covers— Beautiful FenderCoat™ covers help protect mega/superyacht surfaces from fender contact. **Acrylic** (100% solution-dyed) is available in your choice of four colors (Black, Marina Blue, Cadet Gray, Charcoal).

Supple, soft, waterproof **Neoprene** (synthetic elastomer) wet-suit style is available in black as standard or in limited colors. Both cling and conform to EDW™ inflatable fender contours and are available to fit all EDW sizes.

EDW™ FENDER COVERS

Have you ever found yourself saying, *I wish someone would make...*? Trust Megafend. We listen, we visualize, and we create exceptional handcrafted products to perform those special mooring accessory tasks. ***Imagine***—

VISION

Why have a boat hook that needs maintenance and can break under stress when you can have a stronger, lighter-in-weight carbon fiber **Megafend Ultima™ Boat Hook**? Each features a 35 mm (1.39 inch) O.D. diameter shaft and can be crafted in your required length up to 16 feet. Long lengths feature 316L stainless steel marine breakaway(s) for handling or stowing ease. Order sans wraps or with wrap placements/lengths per your preference.

Mega-Vision™—

Portable lighting is mounted on rail hooks providing illumination and security lighting for megayachts while dockside, on anchor or anywhere additional lighting is needed. Anti-paparazzi use deploys lights shining down and outward to distort human vision and help deter digital cameras from seeing or capturing images inside and outside the yacht.

Stand Up Paddle Board Rack—

Two custom-sized hooks are creatively used to efficiently rail support two stand-up paddle boards. Units can be configured to hang from bulwark where needed. Have “boards” convenient, out of the way, yet ready to go quickly while at dock or anchorage.

Megafend Removable Chafe Gear

Megafend removable chafe gear wraps are available in standard and custom lengths and choices of materials to fit and reliably protect popular line sizes. Each is designed for heavy use applications, wearability and installs securely **without ties** at the point of use to create a protective wrap on lines.

- Fluffy chafe gear wrap of soft sheepskin or acrylic is used where fender lines or dock lines can rub against paint or Gelcoat surfaces.

MegaChafe™ Ultra Ballistic Nylon– a premium look with excellent wearability

Optional Black Fluffy– soft, color-fast 100% solution dyed acrylic

White fluffy style (shown left) is quality sheepskin, typically 18" long and sized to fit commonly used line diameters.

to assure long lasting durability*

ULTRA BALLISTIC CHAFE GEAR

Megafend Retail Products— available at Marina stores and online in our web retail store— cover the more generic mooring needs. The full-line includes fender hooks for popular rail styles or pipe-rail sizes, solid-core and inflatable fenders, fender covers and common sizes of removable chafe gear in fluffy or ballistic nylon. All feature the same prime quality materials as our custom line.
