

#1 Selling LED Brand

The Navy specifies the use of Dr. LED's lights...Shouldn't you?

**Dr. LED High-Quality Marine LED Products you can count on!
Designed in the USA and built to last.**

2014 Catalog

www.DoctorLED.com

The Dr. LED Story

With their extensive background in aerospace and being avid boaters themselves, the engineers at Dr. LED provide the perfect mix of experience and enthusiasm to develop high tech, durable, and energy efficient LED lighting products specially designed for the marine environment.

Their use of cutting edge designs using the highest quality components (yes, there is a difference) and thorough testing of each individual product before it leaves the factory, ensures that each Dr. LED product will provide the performance and durability that you expect.

The Dr. LED Advantage:

- US based engineering - designed in Seattle, Washington, USA.
- Extensive background in aerospace.
- Truly innovative marine quality LED products.
- US patents awarded.
- High quality components and designs.
- Each and every product tested for 2 hours at the factory.
- Specified by the US Navy, Air Force, Coast Guard, and US Government.
- First and only aftermarket 2nm LED bulbs for nav lights.

Milestones:

- 2005 First to use regulated LED bulbs in the marine market.
- 2006 First and only one to obtain USCG COLREG 1972 ABYC 2NM certified LED aftermarket replacement bulbs for navigation lights.
- 2007 First to use US made CREE high-power LEDs in the marine market.
- 2007 First to use warm white LED bulbs in the marine market.
- 2008 First to provide a single high-power bi-color LED chart light for the marine market.
- 2010 The US Navy specifies the use of Dr. LED's lights in their boats and specified by the US Federal Government with National Stock Numbers.
- 2006-2013 First to develop true 1-to-1 LED replacements for 2NM LED bulbs for navigation and interior lights (BA15, festoon S8.5, BA9S, wedge bases etc.).

Shouldn't you?

PN: 8001344-02

NSN: 5961016025452

#1 High-Power 1380 Lumen LED Light

1380+ lumen rated high-power LEDs provide the highest lumen-per-watt light, outperforming other LED lights in its class.

Designed to be mounted up to 30' above deck with aerodynamic shape.

Replaces 50W halogen spotlight.

ADC12 high purity die cast aluminum housing and lens bezel provide ample heat sinking as well as ingress protection to ensure a long operational life.

Marine grade 3-stage durable UV 3800 powder coated finish.

Ultra-long life. Highly shock and vibration resistant.

NMMA, USCG, ISO 8846 & SAE J1171 Ignition Protection Compliant.

PN: 8001344-02

Features

NSN: 5961016025452

- NMMA, USCG, ISO & SAE Ignition Protection Compliant.
- IP68, MIL-STD-810G Vibration & Shock Proof, ASTM B117 Salt Spray (Fog) Compliant.
- CE, FCC Part 15, RoHS Compliant.
- 6,000 Degree Kelvin Cool White with 1,380 Lumens (based on LED manufacturer specifications).
- 50,000 Hour Life Span Rated US Made LEDs.
- Long Service Life, Shockproof, Ultra-Rugged with no filament to burn out or break.
- Operating Temperature: -40 to +145 Degree F (Withstands temperature extremes).
- Designed in the USA.

Specifications:

Electrical:

Input Voltage: 12/24 VDC (9-35 VDC) or 12 VAC (1.5A @ 12 VDC)
 Max Input Power: 20W
 Non-Polarized Connection, Reverse Polarity Protected
 Under-Voltage and Voltage Spike Protected
 Electrically Protected Against RFI/EMC Interference
 Integrated Thermal Management

Mechanical:

3 Stage Durable UV 3800 Powdercoat
 Unbreakable Polycarbonate Lens
 ADC12 High Purity Aluminum Housing and Lens Bezel
 Low Profile Stainless Steel U Bracket Mount with 1/4" Bolt
 1M 7mm Round PVC IP68 UL2464 18AWG 300V 80C Red/Black Cable Pair
 Dimensions: 154mm (6") width, 50mm (2") height, 66mm (2.6") depth
 Weight: 516g (18oz)
 Mounting Hardware Required: one 1/4" dia. hole

Optional Accessory:

Horizontal Rail (PN: 9000319) and
 Vertical Rail (PN: 9000326) Mounts
 For 7/8" to 1 1/4" dia. rails.

#1 High-Power 600 Lumen LED Light

Built-in IP68 magnetic switch to cycle light between high/low/strobe (6Hz)/off. A key feature of the Kevin Jr. is that when installed in an inaccessible location (high on a sailboat mast for example), any remotely installed switch will automatically produce a high beam independent of the built-in switch.

600+ lumen rated high-power LEDs provide the highest lumen-per-watt light, outperforming other LED lights in its class.

Designed to be mounted up to 20' above deck with aerodynamic shape. ADC12 high purity die cast aluminum housing provides ample heat sinking as well as ingress protection to ensure a long operational life.

Marine grade 3-stage durable UV 3800 powder coated finish.

NMMA, USCG, ISO 8846 & SAE J1171 Ignition Protection Compliant.

PN: 9000470

Features

- Built-In IP68 Magnetic Switch to Cycle Light Between High/Low/Strobe (6Hz)/Off.
- NMMA, USCG, ISO & SAE Ignition Protection Compliant.
- IP67, MIL-STD-810G Vibration & Shock Proof, ASTM B117 Salt Spray (Fog) Compliant.
- CE, FCC Part 15, RoHS Compliant.
- 6,000 Degree Kelvin Cool White with 600 Lumens (based on LED manufacturer specifications).
- 50,000 Hour Life Span Rated US Made LEDs.
- Operating Temperature: -40 to +145 Degree F (withstands temperature extremes).
- Built-In Standard Camera Tripod Docking.
- Does not work with dimmers.
- Designed in the USA.

Specifications:

Electrical:

Input Voltage: 12/24 VDC (7-35 VDC) (0.8A @ 12 VDC)
 Max Input Power: 10W
 Reverse Polarity Protected
 Under-Voltage and Voltage Spike Protected
 Electrically Protected Against RFI/EMC Interference
 Integrated Thermal Management

Mechanical:

3 Stage Durable UV 3800 Powdercoat
 Tempered Glass Lens
 ADC12 High Purity Aluminum Housing
 Low Profile Stainless Steel U Bracket Mount with 1/4" Bolt
 1M 5mm Round PVC IP68 UL 20AWG 300V 80C Red/Black Cable Pair
 Dimensions: 90mm (3.5") width, 50mm (2") height, 79mm (3.1") depth
 Weight: 400g (14oz)
 Mounting Hardware Required: one 1/4" dia. hole

12/24V LED Spreader/Rail Light: Kevin Jr. X2™

Optional Accessories:

Horizontal Rail (PN: 9000319) and Vertical Rail (PN: 9000326) Mounts (7/8" to 1 1/4" dia. rails)

Bike Rail Mount

Handle

Cigarette Lighter Plug Cable

Magnetic Car Top Mount

Car Battery Cable

Colored Lens Cover

Low Profile 5/8” Red / Cool White High-Power LED Light

Two wire installation with built-in dimming and red / white light selection with only one standard external power switch.

750+ cool white lumen rated high-power LEDs provide the highest lumen-per-watt light, outperforming other LED lights in its class.

Low current draw ~1A @ 12V.

ADC12 high purity die cast aluminum housing provides ample heat sinking as well as ingress protection to ensure long life operation.

Marine grade finish.

Ultra-long life. Highly shock and vibration resistant.

NMMA, USCG, ISO 8846 & SAE J1171 Ignition Protection Compliant.

PN: 9000500

Features

- Switchable Red/White with dimming.
- By toggling an on/off switch, intensity can be set for both red and white.
- NMMA, USCG, ISO & SAE Ignition Protection Compliant.
- IP67, MIL-STD-810G Vibration & Shock Proof, ASTM B117 Salt Spray (Fog) Compliant.
- CE, FCC Part 15, RoHS Compliant.
- 6,000 Degree Kelvin Cool White with 750 Lumens (based on LED manufacturer specifications).
- 50,000 Hour Life Span Rated US Made LEDs.
- Operating Temperature: -40 to +145 Degree F (withstands temperature extremes).
- Does not work with dimmers.
- Designed in the USA.

Specifications:

Electrical:

12/24 VDC (11-35 VDC) (~1A @ 12 VDC for white light)
 Max Input Power: 12W
 Reverse Polarity Protected
 Under-Voltage and Voltage Spike Protected
 Electrically Protected Against RFI/EMC Interference
 Integrated Thermal Management

Mechanical:

Anodized Marine Grade Gold Color
 Tempered Glass Lens
 ADC12 High Purity Aluminum Housing
 Low Profile European Design
 6” 20AWG 300V 80C Red/Black Silicon Rubber Cable
 Dimensions: 133mm (~5.24”) length, 47mm (~1.85”) width, 16mm (~0.63”) tall

12/24V LED Dome Lights: Mars Dome™

Mars Dome Lights:

The Mars Dome is a general purpose, surface-mount light fixture with your choice of dual level white light or red/white lights for night use, with the added benefit of LED technology. These lights produce a warm white light and are fabricated from the highest quality components to assure long life and trouble-free use. Their patented internal circuitry provides consistent brightness and makes them immune to life-shortening voltage fluctuations. Their incredibly low power draw makes them the perfect way to reduce energy consumption on your boat. Latest high-power LED technology provides high lumen-per-watt light, out performing other dome LED lights.

Most Popular Marine LED Dome Lights in the world. Used and specified by the US Federal Government with national stock numbers (NSN).

Features

- Three-position switch (High/Off/Low) to select two warm white brightness levels, with the high level equivalent to about a 45 watts incandescent bulb.
- Red/white version has a three-position switch (Red/Off/Warm White) to select red or warm white.
- Internal circuitry provides for constant energy consumption, regardless of voltage fluctuations from the source, meaning no flickering and longer LED life White version.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Available in 5 ½" (140mm) and 6 ¾" (170mm) overall diameter.
- Multi-voltage 12 VDC or 24 VDC.
- Very low power consumption, approximately 3 to 5 watts depending on the selection.
- Lead and mercury free, and no UV output.

12/24V Under-Cabinet LED Lights: Warm-White & Red / White John™

Warm White PN: 8001696

Red/White PN: 8001719

Under-Cabinet LED Lights:

General purpose, surface-mount light fixture with your choice of dual level white light or red/white lights for night use; with the added benefit of LED technology. These LED lights produce a warm white light and are fabricated from the highest quality components to assure long life and trouble-free use. Their patented internal circuitry provides consistent brightness and makes them immune to life-shortening voltage fluctuations. Their incredibly low power draw makes them the perfect way to reduce energy consumption on your boat. Latest high-power LED technology provides high lumen-per-watt light, outperforming other LED lights.

Features

- White version has a three-position switch (High/Off/Low) to select two warm white brightness levels, high level equivalent to about a 45-watt incandescent bulb.
- Red/white version has a three-position switch (Red/Off/Warm White) to select red or warm white.
- Internal circuitry provides for constant energy consumption, regardless of voltage fluctuations from the source, meaning no flickering and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Dimensions & Weight: 8" (200mm) long, 3" (76mm) wide, 1.4" (36mm) tall. 5.3oz (150gm).
- Multi-voltage 12 VDC or 24 VDC.
- Very low power consumption, approximately 1 to 3 watts depending on the setting.
- Lead free, mercury free, and no UV output.

Part #	8001696	8001719
Description	Under-Cabinet LED Light	Under-Cabinet LED Light

12/24V Recessed LED Lights: Saturn Ring™

12/24V Warm White Spot PN: 8001641

12V Warm White Flood PN: 8001658

12/24V Red /White PN: 8001788

160+ lumens rated. Please note that when comparing brightness using lumen ratings between LED and incandescent lights, you should multiply the LED rated lumen output by about 8. This is because LED beams are mostly focused on 1/8th of a quadrant of a sphere's surface while incandescent light covers the whole sphere.

Saturn Ring MKII Cabin Lights:

The Saturn Ring MKII is a general purpose, recessed, water resistant fixture in your choice of spotlight or floodlight or bi-color (red/white) light models with the added benefit of high-power LED technology. These lights produce a warm white light and are fabricated from the highest quality components to assure long life and trouble-free service. Their patented internal circuitry provides consistent brightness and makes them immune to life-shortening voltage fluctuations. Their incredibly low power draw (0.3 A) makes them the perfect way to reduce energy consumption.

Features

- The spotlight model is equivalent to a 30W incandescent light, bright enough for reading, 180 lux @ 1M.
- The floodlight model is equivalent to a 30W incandescent light, a very good ambient light, 80 lux @ 1M.
- Internal circuitry provides for constant current draw, regardless of voltage fluctuations from the source (11 to 15 VDC), meaning no flickering and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 3.6 W – 0.3 A).
- Lead and mercury free, no UV output. Zero radio frequency (RF) emission.
- White and chrome colored trim rings included; brass colored (gold plated) trim ring sold separately.
- 3" (76.2mm) overall diameter; requires a 2" dia. (50.8mm) cut-out, 0.8" (20.3mm) deep.

12V Red.White LED Chart & Reading Light: **Black Cobra™**

PN: 9000029
NSN: 6240016128960

Bi-Color High-Power LED Chart and Reading Light

Bi-color (red/white) high-power LED chart and reading light with ultra-low current draw (0.2A @12V).

“European” styling.

#1 US Made LED: CREE LEDs.

An On/Off/On push button switch located at the base to select either warm white or off or red light output.

Ultra-long life. Highly shock and vibration resistant.

Zero radio interference emission.

Specifications

Voltage/ Draw:	0.2A @ 12VDC
Fixture Material:	Plated zinc alloy head and base, coated metal gooseneck.
Fixture Dimensions:	31 mm dia. head, 77 mm oval base, 355mm (~13”) long gooseneck.
Mounting Hardware:	Two 3 mm X 20 mm stainless steel screws included, requiring two 2 mm dia. holes, 3.2 mm dia. screws or bolts recommended.
Lens Material/Description:	Polycarbonate
Switch Type:	Push Button

Part #	9000029
Description	LED Chart / Reading Light
LED Color	White / Red
Lumen Output	75 Lumens (warm white) 20 Lumens (red)
Wattage Replacement	20 W
Voltage	12 VDC
Dimensions	31 mm (~1.2”) dia. head 77 mm (3”) oval base 355mm (13”) long gooseneck
Weight	~225g (7.5oz)

12/24V Surface Mount Underwater Light: Dave X3™
Low Profile LED Spreader Lights

White PN: 9000203
Blue PN: 9000210

Dr. LED's Dave X3 Surface Mount Underwater LED Lights:

The Dave X3 is the 2nd generation of our popular Dave surface mount underwater light. It uses the latest generation of high quality US CREE XPG LEDs with the highest lumen per watt output in the market. The polymer unibody design makes it corrosion as well as ignition proof. Ultra-rugged and shock proof.

Features

- Low profile surface mount underwater, high-power LED light.
- Small foot-print (~100mm / 4" dia.).
- 12/24 VDC (10-30 VDC) input voltage range.
- ~500 lumens (cool white) or blue, narrow beam.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Polymer unibody design.
- Very low power consumption (approximately 4 W).
- No toxic lead and mercury free, no UV output (RoHS Compliant).
- US CREE LEDs, designed to last up to 50,000+ hours.
- Designed in the USA, NMMA, USCG, ISO 8846 & SAE J1171 Ignition Protection Compliance.

Specifications:

Form Factor: 100mm diameter disk, low profile (1")
Voltage: 12/24 VDC (10-30 VDC)
Wattage: 4W (typical)
Lumen Output: 500 Lumens (for white)
Color Temperature: cool white 5,000° K (typical) or blue
Main Beam Angle: 25°
Ambient operating temperature: -10° C to +30° C
Dimensions: 100mm (~4") dia. 25.4mm (1") tall
Weight: 175gm (6.2oz)

12/24V Low Profile Through-Hull Stainless Steel Underwater LED Lights: **Neptune X6™**

Neptune Underwater LED Lights:

This 1500+ lumen Neptune Light outperforms any other LED light in the same category in terms of price and light output. Six US-made high-power LEDs provide the highest lumen-per-watt underwater light ever made. The SAE 316L stainless steel body makes it extremely corrosion proof.

Neptune X6 White
Neptune X6 Blue

PN: 9000487
PN: 9000494

Cool White (6000K)
Blue

1500+ Lumens
300+ Lumens

Features

- 5mm (~0.2") low profile and 100mm (~3.9") diameter small footprint.
- Same dimensions as our popular three LED aluminum Neptune Light.
- Six state-of-the-art 3W, US made, high-quality, high-power LEDs provide the most lumens per watt in LED technology.
- High-intensity LED light travels farther underwater for maximum visibility and truer colors.
- Instant on, no warm-up of bulb needed.
- SAE 316L stainless steel unibody.
- Long service life, shock proof, ultra-rugged with no filament to burn out or break.
- No anodes required, as housing is corrosion proof.
- Multi-voltage 12 VDC or 24 VDC.
- Input Voltage Range: 11-35VDC (2A @ 12VDC).
- Max Input Power: 25W.
- Reverse Polarity Protected.
- Under Voltage and Voltage Spike Protected.
- Electrically Protected Against RFI/EMC Interference.
- Integrated Thermal Management.
- Operating Temperature: -40 to +145 Degree F (withstands temperature extremes).
- Lens Material: 10mm tempered glass.
- Mechanical Connection: Requires one 68mm (~2 11/16") dia. hole.
- Maximum Hull Thickness: < 100mm (~3.9").

Compliance:

NMMA, USCG, ISO 8846 & SAE J1171 Ignition Protection
ABYC H-27 Side Load Test
MIL-STD-810G Vibration & Shock Proof
ASTM B117 Salt Spray (Fog)
CE, FCC Part 15, RoHS, IP68

12/24V LED Replacement Bulbs: Edison LED™ / Edison SideKick™

Medium Screw Base General Purpose Bulbs:

US-made high-quality high-power LEDs. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. These high-quality, general-purpose bulbs produce a warm white light and are the perfect way to reduce energy consumption in your boat, or even your home. The Edison LED produces a spot-type beam and are best used in directional light fixtures. The Edison SideKick produces a side-emitting beam and is best used for lights with a lampshade.

Features

- Fits E26/27 medium screw base “household” style sockets.
- Ideal for solar panel users.
- Internal circuitry provides for constant energy to LEDs regardless of voltage fluctuations from the source, meaning no flickering, optimal brightness and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- 1W US made high-quality high-power LEDs produce the equivalent of about a 30 watt incandescent bulb within the main beam - with only 1 watt of consumption.
- 3X US-made high-quality high-power LEDs produce the equivalent of about a 60 watt incandescent bulb within the main beam - with 3-5 watts of consumption.
- Lead and mercury free, no UV output.

			
Part #	8001276	8001801 (Replaces 8001283)	8001818 (Replaces 8001351)
Description	Edison 1W	Edison 3X	Edison 3X
Voltage	12V AC/DC	12V AC/DC or 24 VDC	12V AC/DC or 24 VDC

LED Replacement Bulbs: Bayonet and Bi-Pin Magnum LED™

The Magnum LED:

These bulbs come in several models and are ideal for replacing your existing incandescent or halogen bayonet or bi-pin lights. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. These high-quality bulbs produce a warm white light, and are the perfect way to reduce energy consumption on your boat. They have a long service life, are shock proof, and UV, lead and mercury-free. These bulbs are ideal for cockpit; map reading lights, emergency lights, etc. They produce a spot-type beam and are best used in directional light fixtures.

Features

- Bayonet style bulbs replace BA type (15 mm) incandescent bulbs used in many boats and RVs; available in single contact (BA15S), and double contact indexed (BAY15D) and non-indexed styles (BA15D).
- 2-pin style with 4 mm pin spacing replaces the super hot "standard" G4 and MR11 mini-reflector style halogen bulbs, commonly used in many boats and RVs. Note: check for base clearance on MR11.
- 2-pin style with 5.3 mm pin spacing replaces the hot MR16, mini-reflector halogen bulbs.
- Lead and mercury free, no UV output.
- For most reading lights.

12/24V LED Replacement Bulb: 1383 “Elongated” Single Contact Magnum LED™

PN: 9000449

This bulb is ideal for replacing your existing incandescent or halogen bayonet bulb in fixtures that require an elongated single contact bulb. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. This high-quality bulb produces a warm white light, and is the perfect way to reduce energy consumption on your boat. It has a long service life, is shock proof, and UV, lead and mercury-free. It produces a spot-type beam and is best used in directional light fixtures.

Features

- “Elongated” Bayonet style bulb replaces BA type (15 mm) incandescent bulbs used in many boats and RVs; available in single contact (BA15S).
- Lead and mercury free, no UV output.
- For most reading lights that require an “elongated” bayonet bulb.

Part #	9000449
Type	BA15S
Description	Bayonet
Connection	Single Contact
Power	2W
Lumen Output	150 Lumens
Voltage	12/24 VDC or 12 VAC

12V G4 SMD LED Disks

For reading lights, recessed lights, etc.

These G4 MR11 disks come in several models (12V or 24V) and are ideal for replacing your existing incandescent or halogen bi-pin bulbs. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. These high-quality bulbs produce warm white or blue or red lights, and are the perfect way to reduce energy consumption on your boat. They have a long service life, are shock proof, and UV, lead and mercury-free. These bulbs are ideal for cockpit lights; map reading lights, emergency lights, etc. They produce a flood-type beam and work well in many light fixtures.

Both axial (center) and radial (side) connection pins are provided. Please shear off the pins that are not needed.

Features

- High-quality marine environment US designed SMD LED disks.
- Soothing warm white or blue or red lights.
- Zero radio frequency (RF) emission, surface-mount-device design.
- Conformal coated & use of long life components, e.g. use of ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides constant current draw regardless of voltage fluctuations from the source (10 to 18 VDC for 12V models 20 to 32 VDC for 24V models), meaning no flickering and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Very low power consumption.
- Designed in the USA.

12V Mini G4 Star™
12V G4 LED Tower

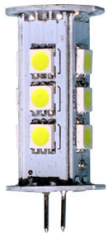

PN: 9000432
PN: 9000104

For reading lights, recessed lights, nav lights etc.

This 12V mini G4 LED bulb is ideal for replacing your existing incandescent or halogen bi-pin G4 bulbs. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. This high-quality bulb produces warm white light, and is the perfect way to reduce energy consumption on your boat. It has a long service life, is shock proof, and UV, lead and mercury-free. This bulb is ideal for cockpit lights; map reading lights, emergency lights, etc. It produces a radial 360-degree beam and works well in many light fixtures.

Features

- * High-Power LED *2 NM visibility *12 VDC *Warm White
- Soothing warm white light.
- Zero radio frequency (RF) emission, surface-mount-device design.
- Conformal coated & use of long life components, e.g. use of ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides constant current draw regardless of voltage fluctuations from the source (11 to 15 VDC), meaning no flickering and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Very low power consumption (approx. 1 watt, 0.1A @ 12 VDC).
- Lead and mercury free, no UV output.
- Designed in the USA.

12V SMD LED Replacement Bulbs

For reading lights, interior lights, Windex light, etc.

These bulbs come in several models and are ideal for replacing your existing incandescent or halogen bayonet, bi-pin, wedge base, or Windex lights. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. These high-quality bulbs produce a soothing warm white light, and are the perfect way to reduce energy consumption on your boat. They have a long service life, are shock proof, and UV, lead and mercury-free. These bulbs are ideal for cockpit; map reading lights, emergency lights, etc. They produce a flood-type beam and are best used in many light fixtures.

Please note that these bulbs are not approved for navigation use. Do not use for nav lights.

Features

- High-quality US designed SMD LED bulbs.
- Soothing warm white light.
- Zero radio frequency (RF) emission.
- Conformal coated & use of long life components, e.g. ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides for constant energy consumption, regardless of voltage fluctuations from the source (10 to 18 VDC), meaning no flickering and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 1 to 2 watts).
- Designed in the USA.

12/24V Dome Light LED Conversion Kits

These dome light LED conversion kits come in several models* and are ideal for replacing your existing incandescent or halogen dome light bulbs. Unique, cutting edge, internal circuitry and the highest quality components make Dr. LED's the longest lasting, most energy efficient LED products on the market. These high-quality bulbs produce a warm white light, and are the perfect way to reduce energy consumption on your boat. They have a long service life, are shock proof, and UV, lead and mercury-free. These bulbs are ideal for cockpit lights; map reading lights, emergency lights, etc. They produce a flood-type beam and work well used in many light fixtures.

*Two voltage models to choose from for 12 VDC and 24 VDC systems. Two light output models to choose from: two levels of warm white or warm white / red light.

Both bayonet double contact non-index (BA15D) and bi-pin connection pigtailed are provided. Bi-color models are for dome lights with two bulbs (one red and one white).

Features

- High-quality marine environment US designed SMD LED disks.
- Soothing warm white light or red light.
- Zero radio frequency (RF) emission.
- Conformal coated & use of long life components: e.g. ceramic capacitor, not low hour electrolytic.
- Long service life and shockproof.
- Ultra-rugged with no filament to burn out or break.
- Very low power consumption.
- Designed in the USA.

100-240VAC 50W LED Floodlight : Big John™

Elite M505 Professional Grade

PN: 9000296

Dr. LED's Elite M505 50W High-Power LED Floodlight:

This professional grade high-power 50W LED floodlight is specially designed as a direct replacement for most exterior floodlights. The use of a high-quality UL approved LED driver and LED is the perfect way to reduce energy consumption.

Description: 50W LED, cool white, ~6000° K color temperature, ~120 deg. beam angle, IP65 ingress rated, powder coated aluminum housing, high impact tempered glass lens, 50W high-power ceramic LED, ~4,000 lumen output, high-quality UL LED driver, oil and solvent resistant gasket, 6.5 ft. (2 meters) cable.

Features

- Flood beam, 50W LED, replaces most exterior floodlights.
- 90% lower consumption than incandescent lights.
- Starts immediately with zero warm up or delay.
- Universal line voltage: 100-240 VAC input voltage.
- 4,000 lumens, cool white, ~6000° K, 120° flood beam.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Maintenance free.
- Very low power consumption (approximately 50 W).
- No toxic lead and mercury free, no UV output.
- Designed to last up to 50,000+ hours.

Specifications:

Form Factor: Exterior floodlight

Input Voltage: 100-240 VAC 50-60Hz (Power Factor: 0.92)

Wattage: ~50W (typical)

UL Listed LED Driver (UL and EMC Compliance)

Lumens: ~4,000 (typical) Color Temperature: cool white ~6000° K

Main Beam Angle: 120°

Ambient operating temperature: -10° C to +40° C

Ambient operating humidity: 20%-80% non-condensing

Fixture Material: Powder coated aluminum

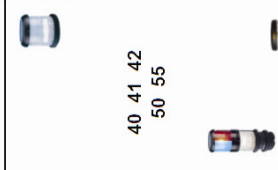

Glass: High impact tempered glass lens

Gasket: Oil and solvent resistant rubber

Dimensions: 292mm (11.5") length, 220mm (8.7") width, 78mm (3.1") thickness

Weight: 3.6kg (8lb)

Navigation Light LED Replacement Bulbs: **Polar Star™** With 2NM Certified Light Engines

2 NM Aqua Signal series 40 and series 25 nav light LED replacement bulbs:

Red Polar Star 40 MKII*
Bi-Color Polar Star 40

White Polar Star 40 MKII*
Tri-Color Polar Star 40 MKII

Green Polar Star 40 MKII*
Bi-Color Polar Star 41

Bi-Color Polar Star 25

(White Polar Star 25 replaced by new 39-44mm Festoon Star)

*2NM USCG COLREG 1972 ABYC A-16 Certified

The 40 & 25 Series NAV LED Bulbs:

These LED bulbs are specially designed as direct replacements for most of the incandescent navigation lights available on the market such as those from Aqua Signal® (series 40, 41, 42, 50, 55) as well as the ones from Attwood®, Hella®, Perko® and several other manufacturers. These high-quality bulbs are the perfect way to reduce energy consumption on your boat with a current draw of only about 0.1A @ 12V. They are especially well-suited for mast mounted lights, as their incredible reliability will mean an end to frequent climbs up the mast to replace nav light bulbs.

Features

- White, red, green, bi-color (red / green) and tri-color (red / green / white).
- Internal circuitry provides for constant current consumption, regardless of voltage fluctuations from the source (11 to 15 VDC), meaning no flickering and longer LED life.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Conformal coated & use of long life components: e.g. ceramic capacitor (not low hour electrolytic capacitor).
- LED bulbs satisfy all brightness, distance (2 NM), and arc requirements set forth by the US Coast Guard for vessels less than 50 m (165 ft.) in length.
- Very low power consumption (approximately 1 W).
- Lead and mercury free, & no UV output.

Series 40

2NM Single Color Index Models (For Aqua Signal series 40, 41, 42, 55 etc.; Perko 200 (Fig. 0375), Hella 2984, 2986, 2988, etc.)

NOW with SMD LEDs

Navigation Light LED Replacement Bulbs: **Hex GE90 Star™**
H2492 Star™

PN: 9000425
 PN: 8000067

One-to-one 2NM replacement for Perko Bulb Fig. 337 and Trade #68, #90, #94, #1004 etc. bulbs for nav and reading lights.

One-to-one replacement for
 Perko Bulb Fig. 337
 Trade #68, #90, #94, & #1004
 bulbs.

The Hex GE90 Star NAV LED Bulb:

This LED bulb is specially designed as a direct, one-to-one, replacement for the incandescent navigation anchor lights available on the market such as those from Perko and other manufacturers.

This high-quality bulb is the perfect way to reduce energy consumption on your boat with a current draw of only about 0.12A. This is especially well-suited for mast mounted lights, as their incredible reliability will mean an end to frequent climbs up the mast to replace nav light bulbs.

Works on Perko Series 0120, 0170, 1301, 0337, 0362, 0371, 0455, 0466, 1134, 1137, 1209, 1311, 1330, 1400, 1401, etc.

Features

- Bayonet 15mm double contact non-index (non-offset) configuration
- #1004, #90 etc. bulb replacements (one-to-one replacement)
- For 2NM nav lights
- * High-Power LED *2 NM visibility 12VDC
- Conformal coated & use of long life components: e.g. ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides for constant energy consumption, regardless of voltage fluctuations from the source (10 to 15 VDC), meaning no flickering and longer LED life
- Long service life, shockproof, ultra-rugged with no filament to burn out or break
- Very low power consumption (approximately 1 W)

Single contact model works on Hella 2492 anchor light.

Part #	9000425	8000067
Description	2NM anchor light	2NM anchor light
Replacement	#68, #90, *94, #1004 bulbs (one-to-one)	Hella 2492
Bulb Type	Double contact non-index	Single contact
Voltage, Lumen Output	12 VDC, 90 Lumens (15W eqv.)	12/24 VDC

Navigation Light LED Replacement Bulbs: **Polar Star 20™**

PN: 8001849

12 VDC 2NM 9mm single contact miniature bayonet LED replacement bulb for navigation & deck lights.
Replaces aqua signal series 20 nav light bulbs and aqua signal series 25 deck light bulb

aqua signal series 20

9mm Miniature Bayonet Bulb

Finally, a true one-to-one LED replacement bulb for incandescent navigation lights using 9mm miniature bayonet bulbs. This single contact bayonet LED bulb is specially designed as a direct replacement for many navigation and deck lights. It works with aqua signal series 20 nav lights and aqua signal series 25 deck lights. This high-quality high-power LED bulb is the perfect way to reduce energy consumption on your boat with a current draw of only about 0.1A. Its incredible reliability means an end to frequent climbs up the mast to replace navigation light bulbs.

PN: 8001849 Features

- Replaces 9mm miniature bayonet bulbs.
- Replaces aqua signal series 20 nav bulbs and aqua signal series 25 deck light bulb.
- * High-Power LED *2 NM visibility *12 VDC *Warm White
- Zero radio frequency (RF) emission, surface-mount-device design.
- Conformal coated & use of long life components: e.g. ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides constant current draw regardless of voltage fluctuations from the source (10 to 18 VDC), meaning no flickering and longer LED life.
- Long service life, shockproof, and ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 1 W).
- Lead and mercury free, no UV output.
- Designed in the USA.

Part #	8001849
Description	2 NM 9mm miniature bayonet LED bulb
LED Color	Warm White
Replacements	aqua signal series 20 nav light bulbs and aqua signal series 25 deck light bulb
Voltage	12 VDC
Current Draw	0.1 A
Lumen Output	60 Lumens (10W eqv.)
Dimensions	~28mm (1.1") length 12mm (0.47") width

aqua signal series 25 deck light

Replaces bulb trade # 53, 57, 181, 1416, & 1816.

Replaces Ancor bulb # 520053, 520057, 521126, 521416, 529337, & 529355.

Navigation Light LED Replacement Bulb: P338 Wedge Star™

Perko Bulb Fig. 338 LED replacement for popular Perko pole lights

PN : 9000371

The P338 Wedge Star NAV LED Bulb:

This LED bulb is specially designed as direct replacement for most of the incandescent navigation anchor/steaming lights available on the market such as those from Perko and other manufacturers.

This high-quality bulb is the perfect way to reduce energy consumption on your boat with a current draw of only about 0.06 A. This is especially well suited for many wedge based nav lights.

**LED Replacement for
Perko Bulb Fig. 338**

Works on Perko Series 0238, 0239, 1236, 1273, 1274, 1281, 1283, 1284, 1440, 1445, 1450, 1451, 1452, 1455, 1456, 1460, 1461, 1465, 1470, 1604, 1607, 1622, 1634, 1637, 1656, etc.

Features

- Wedge base configuration
- Perko Bulb Fig. 338 replacement (a one-to-one replacement)
- For 2NM white nav lights
- * SMD LED *2 NM visibility 12 VDC
- Zero radio frequency (RF) emission
- Conformal coated & use of long life components: e.g. ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides for constant energy consumption, regardless of voltage fluctuations from the source (10 to 15 VDC), meaning no flickering and longer LED life
- Long service life, shockproof, ultra-rugged with no filament to burn out or break
- Very low power consumption (approximately 0.72 W)

Part #	9000371
Description	For 2NM Anchor / Steaming Light
Replacement	Perko Bulb Fig. 338
Bulb Type	Wedge Base
Voltage:	12 VDC
Lumen Output:	60 Lumens (10W eqv.)
Current	0.06 A

Navigation Light LED Replacement Bulb: 31mm Festoon Star™

PN: 9000173

12 VDC 2NM nav light festoon LED replacement bulb for combination masthead & anchor lights.
Replaces Perko Bulb Fig. 71 & Ancor # 529102

Short Festoon LED Bulb:

Finally, a true one-to-one LED replacement bulb for incandescent navigation lights with small festoon bulbs. This short festoon LED bulb is specially designed as a direct replacement for many combination masthead & anchor lights. It works in many Perko lights such as series 1123, 1124, 1125, 1178, 1181, 1183, 1184, 1196, 1197, etc. This high-quality high-power LED bulb is the perfect way to reduce energy consumption on your boat with a current draw of less than 0.1A. Its incredible reliability means an end to frequent climbs up the mast to replace navigation light bulbs.

Features

- Replaces pointed festoon bulbs.
- Replaces Perko bulb # 0071DP0CLR (Perko bulb fig. 71) and Ancor bulb #529102.
- * High-Power LED *2 NM visibility *12 VDC *Warm White
- Zero radio frequency (RF) emission, surface-mount-device design.
- Conformal coated & use of long life components: e.g. ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides constant current draw regardless of voltage fluctuations from the source (10 to 18 VDC), meaning no flickering and longer LED life.
- Long service life, shockproof, and ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 1 W).
- Lead and mercury free, no UV output.
- Designed in the USA.

Part #	9000173
Description	2 NM 31mm festoon LED bulb
LED Color	Warm White
Replacements	Perko Bulb Fig. 71 (0071DP0CLR) & Ancor # 529102
Voltage	12 VDC
Current Draw	0.1 A
Lumen Output	60 Lumens (10W eqv.)
Dimensions	~31mm (1.2") long 12mm (0.5") dia.

Selection Guide:

Brand	Series	Mfg. Bulb No.	
Hella	2010	78202 8GM 993 406-001

Attwood	7200 series: 7208, 7212, 7220, 7250, 7251, 7252, 7254, 7255, etc.		

Note:

This LED bulb is polarized. Just rotate it 180 degrees (upside down) to reverse contacts' polarity if it does not light up.

Navigation Light LED Replacement Bulbs: 39-44mm Festoon Star™

12 VDC 39-44mm Festoon Star™ PN: 9000241

Replaces Perko Bulbs Fig. 69 & 70

24 VDC 39-44mm Festoon Star™ PN: 9000357

Replaces Perko Bulb Fig. 67 and Ancor # 522129

Festoon LED Bulbs:

Finally, true one-to-one LED replacement bulbs for incandescent navigation and interior lights with festoon bulbs. These festoon LED bulbs are specially designed as direct replacements for many navigation as well as interior lights. They work in many Perko lights such as series 0120, 0170, 106, 108, 109, 110, 111, 259, etc. They also work on aqua signal series 25, Forespar ML-2, as well as Hella series 3562 * 8505. These high-quality high-power LED bulbs are the perfect way to reduce energy consumption on your boat with a current draw of only about 0.1A. Their incredible reliability means an end to frequent climbs up the mast to replace navigation light bulbs.

Features

- Replaces 39mm to 44mm pointed and dimpled festoon bulbs.
- 12 VDC Replaces Perko bulbs # 0069DP0CLR (Perko bulb fig. 69) and #0070DPxCLR (Perko bulb fig. 70).
- 24 VDC Replaces Perko bulbs # 0067DPxCLR (Perko bulb fig. 67) and Ancor #522129.
- * High-Power LED *2 NM visibility *12 VDC or 24 VDC *Warm White
- Zero radio frequency (RF) emission, surface-mount-device design.
- Conformal coated & use of long life components, e.g. ceramic capacitor (not low hour electrolytic capacitor).
- Internal circuitry provides constant current draw regardless of voltage fluctuations from the source, meaning no flickering and longer LED life.
- Long service life, shockproof, and ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 1.5 W).
- Designed in the USA.

Navigation Light LED Replacement Bulbs: Festoon Star™

2NM nav. light festoon LED replacement bulbs

For aqua signal series 25 side lights

Green Festoon Star™

Red Festoon Star™

The Festoon Star LED Bulbs:

These LED bulbs are specially designed as direct replacements for most festoon incandescent navigation light bulbs, available on the market such as those from Aqua Signal®, Hella® (3562 series), Lalizas®, Perko®, and several other manufacturers. These high-quality high-power LED bulbs are the perfect way to reduce energy consumption on your boat with a current draw of only about 0.1A. They are especially well-suited for mast mounted lights, as their incredible reliability will mean an end to frequent climbs up the mast to replace nav light bulbs.

White Festoon Star (PN:8001566) has been replaced by 39-44mm Festoon Star™ PN:9000241 (12 VDC) and 39-44mm Festoon Star™ PN:9000357 (24 VDC).

Features

- Replaces 39 mm to 44 mm long pointed festoon bulbs
- 44 mm dimpled festoon bulbs (single color aqua signal series 25 nav lights)
- White, red, or green
- * High-Power LED *2 NM visibility *12 VDC
- Internal circuitry provides for constant energy consumption, regardless of voltage fluctuations from the source (10 to 30 VDC), meaning no flickering and longer LED life
- Long service life, shockproof, ultra-rugged with no filament to burn out or break
- Very low power consumption (approximately 1 W)
- Lead and mercury free, no UV output

Part #	8001573	8001580
Description	2 NM Festoon	2 NM Festoon
LED Color	Red	Green
Voltage	12 VDC	12 VDC
Dimension	32mm (1.26") dia.	32mm (1.26") dia.

Notes:

These are polarized bulbs; just rotate the bulb 180 degrees to reverse polarity.

White Festoon Star (PN: 8001566) has been replaced by 39-44mm Festoon Star™ PN: 9000241 (12 VDC) and 39-44mm Festoon Star™ PN: 9000357 (24 VDC).

100-240VAC 70W Halogen PAR Bulb LED Replacement: **Elite PAR30-7D**

Dimmable with #1 U.S. Brand CREE LEDs Inside

PN: 9000197

Dr. LED's Elite PAR30-7D High-Power Spotlight:

The PAR30-7D, a universal line voltage medium screw base LED PAR bulb, is especially designed as a direct replacement for most 50W - 90W PAR halogen bulbs. The use of high-quality US-made high-power LEDs is the perfect way to reduce energy consumption. It has a standard medium screw base and works just like your regular PAR bulbs.

Model: Elite PAR30-7D PN: 9000197

Description: PAR30 warm white, 3000K, 80+ CRI, 30-degree beam angle.

Features

- PAR30 narrow beam, only 12W, replaces most 70W halogen PAR bulbs.
- Universal line voltage: 100-240 VAC, dimmable.
- Medium screw base (E26 / E27).
- 700 lumens, warm white, 80+ CRI at ~3000° K, 30° beam.
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 12 W).
- No toxic lead and mercury free, no UV output (RoHS Compliant).
- US made LEDs, designed to last up to 50,000+ hours.
- Designed in the USA.

Specifications:

Form Factor: PAR30 Narrow

Base: Medium Screw Base E26 / E27

Voltage: 100-240 VAC 50-60Hz

Wattage: ~12W (typical)

Lumens: ~700 (typical)

Color Temperature: warm white, ~3000° K (typical)

Main Beam Angle: 30°

Color Rendering Index (CRI): 80+

Ambient operating temperature: -10° C to +40° C

Ambient operating humidity: 20%-80% non-condensing

Dimensions: 95mm (3.75) dia., 99mm (3.9") long, 73mm (2.9") long excluding the E26 base

Weight: 262gm (9.2oz.)

100-240VAC 60W Replacement LED Bulb: **Elite LB60 A19**

PN: 9000180

Universal voltage 60W equivalent incandescent replacement LED

Elite LB60 A19:

This universal line voltage medium screw base LED bulb is specially designed as a direct replacement for most 40W to 60W incandescent bulbs. It is a high-quality, high-power LED bulb that is the perfect way to reduce energy consumption in your home with energy consumption of only about 7.5W. It comes with a standard medium screw base and works just like your regular bulbs.

Model: Elite LB60 A19, Part No.: 9000180
Description: A19 warm white, 3000K,
80+ CRI, 180 degree beam.

Features

- Replaces most 60W incandescent bulbs.
- Universal line voltage: 100-240 VAC.
- Medium screw base (E26/E27).
- Long service life, shockproof, ultra-rugged with no filament to burn out or break.
- Very low power consumption (approximately 7.5 W).
- No toxic lead and mercury free, no UV output (RoHS Compliant).
- Designed in the USA.
- NOT DIMMABLE. This bulb does not work with electronic dimmers.

Specifications:

Form Factor: LB60 A19

Base: Medium Screw Base E26/E27

Voltage: 100-240 VAC 50-60Hz

Wattage: ~7.5W (typical)

Lumens: ~320 (typical)

Color Temperature: warm white ~3000° K (typical)

Main Beam Angle: 180°

Color Rendering Index (CRI): 80+

Ambient operating temperature: -10° C to +40° C

Ambient operating humidity: 20%-80% non-condensing

Dimensions: 60mm (2.375) dia.

Weight: 152g. (5.4 oz.)
