Adding a Multi-Hub

If there are no unused "Device Ports" on the Multi-Hubs already installed, before adding additional accessories or gauges to the network another Multihub must be added.

Parts order list for basic installation:

Quantity	Description	Part Number
1	Command Link Plus® Gateway Kit	MAR-GTWAY-KT-00
1	Pigtail Harness	See List ¹

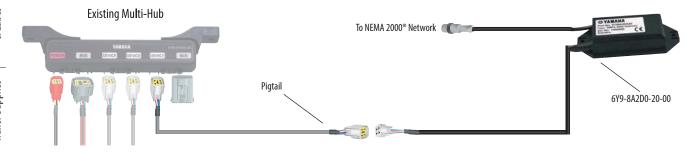

¹Main Buss Harnesses

1 ft.	6Y8-82553-01-00
10 ft.	6Y8-82553-50-00
15 ft.	6Y8-82553-11-00
20 ft.	6Y8-82553-21-00
25 ft.	6Y8-82553-31-00
30 ft.	6Y8-82553-41-00

¹Pigtail Harnesses

Adding a Gateway

Adding a Gateway to the Digital Network requires one open "Device" port. If no open port exist, a Multi-Hub must also be added.

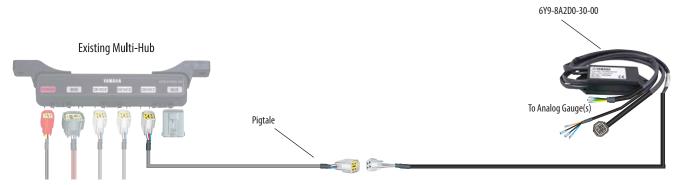

Parts order list for basic installation:

Quantity	Description	Part Number
Qualitity	•	
1	Command Link® / Command Link® Plus Gateway	6Y9-8A2D0-20-00
1	Pigtail Harness	See List1

Adding a AGI (Analog Gauge Interface)

Adding a AGI to the Digital Network requires one open "Device" port. If no open port exist, a Multi-Hub must also be added.

Parts order list for basic installation:

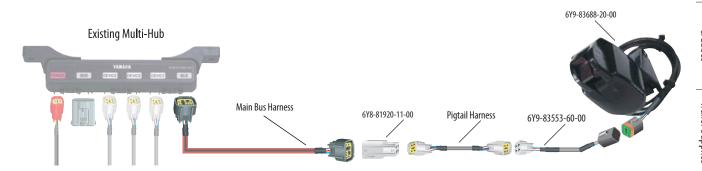

Quantity	Description	Part Number
1	Command Link® / Command Link® Plus AGI	6Y9-8A2D0-30-00
1	Pigtail Harness	See List ¹

¹Pigtail Harnesses

1 ft.	6Y8-82521-01-00
2 ft.	6Y8-82521-11-00
3 ft.	6Y8-82521-21-00
6 ft.	6Y8-82521-31-00
9 ft.	6Y8-82521-41-00
12 ft.	6Y8-82521-51-00

Adding a Multisensor

Adding a Multisensor to the Digital Network requires one open "BUS" port. If no open port exist, Refer to the diagram on the next page (The "Bus" ports maybe come full with a CLP network installed on a second station).

Parts order list for basic installation:

Quantity	Description	Part Number
1	Command Link Plus® Multisensor Kit	MAR-3DCER-KT-00
1	Main Bus Harness	See List 1

¹Main Buss Harnesses

1 ft.	6Y8-82553-01-00
10 ft.	6Y8-82553-50-00
15 ft.	6Y8-82553-11-00
20 ft.	6Y8-82553-21-00
25 ft.	6Y8-82553-31-00
30 ft.	6Y8-82553-41-00

Adding a Multisensor to the Digital Network requires one open "BUS" port. When no open port exist refer to this diagram.

Command Link® Plus Display with Cover

The Command Link Plus Display features a 5" full-color, high resolution LCD display that can be configured to display multiple combinations of information and views based on operator preference both for the outboard(s) and critical systems on the boat. This means the boat's operator can, at a glance, easily and quickly view vital statistics. There's even a special screen to set and monitor Yamaha's Variable Trolling RPM mode.

Replacement Bezel: 6Y9-83512-00-00 Replacement Display Cover: 6Y9-87278-00-00

Command Link® Plus / Command Link® Round Gauges

Yamaha's integrated information systems are simple, streamlined and sophisticated. These new multi network gauges make the rigging process simple as well by working in both Command Link Plus and Command Link networks.

Round Tachometer: *6Y8-8350T-20-00* Round Speedometer: *6Y8-83500-20-00*

Command Link® Gauges

Yamaha's Command Link Integrated Information System is simple, streamlined and sophisticated. It's the perfect blend of innovative technology and reliability you've come to expect from Yamaha, providing many features and functions.

Tachometer - 6Y8-8350T-01-00*

Speedometer - 6Y8-8350S-01-00*

Speed / Fuel Combo Gauge - 6Y8-83500-01-00*

Fuel Management Gauge - 6Y8-8350F-01-00*

^{*} Part number is for gauge(s) only.

Digital Multifunction Tachometer

Accurate information is available to let you fine tune settings to achieve the best overall efficiency and performance for operating conditions. Designed for optimum visibility and long-term durability. Displays: engine rpm, trim angle, oil level, warning lamps, overheat warning lamp, hour meter for trip (reset able) and total operating hours.

6Y5-8350T-83-00*

Digital Multifunction Speedometer

Accurate information is available to let you fine tune settings to achieve the best overall efficiency and performance for operating conditions. Designed for optimum visibility and long-term durability. Displays: Speed, trip, time, fuel, low fuel warning-flashes on the lowest bar, battery voltage reading-displays battery output $(10\sim16 \text{ volts})$ and flashes the readout if the output falls below 12 volts.

6Y5-83570-S5-00*

Digital Multifunction Fuel Management Meter

Accurate information is available to let you fine tune settings to achieve the best overall efficiency and performance for operating conditions. Designed for optimum visibility and long-term durability. Displays: Fuel consumption, fuel economy (using speedo or GPS input for readings), fuel contamination warning (when deluxe fuel/water separator is used), engine synchronization (for dual engine applications).

6Y5-83500-F1-00*

Pro Series II[™] Tachometers

Yamaha's Pro Series II quality instrumentation provides you with high accuracy, and easy readability in virtually all conditions. Distinctive appearance will complement any dash. Direct faceplate illumination on gauge allows for easy night-time viewing. Warning indicators included in the gauge face.

> White Face - 6Y7-83540-90-00* Black Face - 6Y7-83540-80-00*

Pro Series II™ Speedometer (0-75MPH)

Yamaha's Pro Series II quality instrumentation provides you with high accuracy, and easy readability in virtually all conditions. Distinctive appearance will complement any dash. Direct faceplate illumination on gauge allows for easy night-time viewing. Displays KMH and MPH.

> White Face - 6Y7-83510-10-00* Black Face - 6Y7-83510-00-00*

Multifunction Gauge Kits

Multifunction Single Engine Tachometer Kit

Multifunction One Gauge Kit: 6YR-W0035-E1-00

Kit Includes:

Qty	Description	Part Number
1	Multifunction Tachometer (~ 2004 Engines)	6Y5-8350T-83-00
1	Trim and Oil Harness (~ 2004 Engines)	68F-82553-80-00
1	Gauge Harness, 2 Fuse	6Y5-83553-N0-00
1	Wire Harness Cap, Male	6R8-82582-00-00

NOTE:

With the -90 Multifunction tachometer and its related kits discontinued, dealers can use a -83 (2004 and prior tachometer) with adaptor 6Y5-85335-00-00 on a 2005 and later engine.

The -83 tachometer has two trim and oil harness connections for the 2004 and prior engines. It can still be used on 2005 and later engines with adapter harness 6Y5-85335-00-00. The -82 tachometer is available in some rigging kits or as an individual gauge. More information is available in tech bulletin 2006-006.

Multifunction Single Engine Fuel Management Kit*

2	Clamp	90465-10098-00

*For twin engines add one (1) 6Y5-85752-02-00

General Information

Controls

Command Link® Plus Control Boxes

Yamaha's line of Command Link Plus Digital Electronic Controls are perfect for new V6 Offshore outboard models, as well as the new F350 with Command Link Plus compatibility. With the same mounting dimensions as Command Link controls, they all offer virtually effortless throttle and shift functions, highly-polished chrome handles, and a built-in redundancy system for added reliability. Like all Command Link DECs, a separate Electronic Control Unit (ECU) is included for each outboard – a huge advantage over some competitive models. And thanks to 'plug-and play' convenience, adding a second station control is a breeze. Additionally, all multiple engine Command Link DECs feature automatic engine RPM synchronization. The Quad engine control box synchronizes the port and port center engines together and the starboard and starboard center engines together. All main station Command Link Plus DEC binnacle control boxes offer second station compatibility. DEC Control Boxes *MUST* be ordered through outboard sales.

Single Engine Flush Control 6X7-48206-10-00

Single Engine Binnacle Control 6X6-48205-45-00 Second Station Control 6X6-48205-54-00

DEC Control Boxes **MUST** be ordered through outboard sales.

Mechanical Control Boxes

Classic style and function combined with Yamaha's high standards. The perfect line up of control boxes for mechanical controlled engines.

704 Standard Control Box

Top-mount binnacle control with a sleek, rounded look that is sure to please today's boater. The 704 allows for effortless, one-hand operation of the throttle and shift of an outboard. Intuitive designs place a thumboperated, engine trim/tilt switch comfortably on the handle, and feature easily accessible neutral warm-up controls and externally adjustable throttle friction. Standard painted finish.

Single Engine: 704-48205-B1-00

704 Premium Control Boxes

Top-mount binnacle control with a sleek, rounded look that is sure to please today's boater. The 704 allows for effortless, one-hand operation of the throttle and shift of an outboard. Intuitive designs place a thumboperated, engine trim/tilt switch comfortably on the handle, and feature easily accessible neutral warm-up controls and externally adjustable throttle friction. Stylish chrome finish.

Single Engine: 704-48205-P1-00

Twin Engine: 704-48207-P1-00

Mechanical Binnacle Spacers

Designed to raise the 704 Binnacle Control to provide more clearance for the lever in idle and full-throttle positions.

Standard Single Flat Spacer: 704-48293-00-00

Standard Twin Flat Spacer: 704-48293-10-00

Premium Single Flat Spacer: 704-48293-20-00

Premium Single Angled Spacer: MAR-SHIM8-63-00

Premium Twin Flat Spacer: 704-48293-30-00

Premium Twin Angled Spacer: MAR-SHIM8-64-00

Triple Binnacle Control Box

This uniquely designed triple control box allows for one hand operation for easier maneuverability. The unique triple control box has a built-in water drain tube for added reliability & long term durability. Easy access cable connection location for faster & easier rigging.

Premier II™ Control Cables

Yamaha is pleased to offer Premier II cables. They offer an ultra-low-friction splined inner core. The design allows tighter tolerances resulting in reduced end play. We highly recommend the use of Premier II cables for boats with several applications and long cable lengths, on dual-station boats, and on any boat for unrivaled smoothness.

Command Link Plus® Main Switches

Single Engine Main Station Switch

Yamaha's Command Link Plus key panels offer the latest in technology and durability, with a new ergonomic key design and new functionality. The single engine switch is the only Command Link Plus key switch to use the conventional key switch connector. Three position switch.

6X6-82570-31-00

Twin Engines Main Station Switch Kit

The Twin Engine Main Switch Kit offers the latest in technology energizing the ignition system of multiple outboards with only one key. Optional "All Start" switch can be added for additional convenience. (Kit includes Main Switch Panel 6X6-82570-40-00 and Twin Start / Stop Panel 6X6-82570-60-00.)

6X6-W0035-50-00

Components

Triple Engines Main Station Switch Kit

The Triple Engine Main Switch Kit offers the latest in technology energizing the ignition system of multiple outboards with only one key. Optional "All Start" switch can be added for additional convenience. (Kit includes Main Switch Panel 6X6-82570-50-00 and Triple Start / Stop Panel 6X6-82570-70-00.)

6X6-W0035-60-00

Quad Engines Main Station Switch Kit

Yamaha's Command Link Plus key panels offer the latest in technology and durability, with a new ergonomic key design and new functionality. Four keyed alike switches help keep things simple and straight foward. (Kit includes Key Switch Set 6X6-82570-M1-00, Lanyard Panel Assembly 6X6-82570-V0-00, Key Switch Harness 6X6-8258A-L0-00, and Stop Switch Harness 6X6-8258A-U0-00)

MAR-QUAD1-KT-00

All Start / Stop Switch

Allows twin or triple engines to be started successively (to prevent high amperage draw on the starting battery) or stopped simultaneously with the touch of a single button. For convenience and protection, engines cannot be started while running. The All Start / Stop switch can be installed on the main station of triple or twin engine installations only.

400 and 800 Series Key Replacement Cover

Key covers are weather resistant and branded with the Yamaha name. Replacement keys come without a cover.

676-82577-00-00

Worn, damaged, or missing switch cap covers can allow moisture into the main switch and lead to ignition switch failure. For use with switches using the 400 and 800 series keys.

Components

Command Link® and Command Link® Plus Harnesses

DEC (Digial Electronic Control) Main Harness

The DEC 16 pin main harness works for both Command Link® Plus (CLP) and the current Command Link® systems. The DEC main harness connects the engine to the main station control box. One per engine is required when rigging.

20 ft <i>6X6-8258A-00-00</i>	33.5 ft <i>6X6-8258A-30-00</i>
23 ft <i>6X6-8258A-10-00</i>	39 ft <i>6X6-8258A-40-00</i>
26 ft <i>6X6-8258A-20-00</i>	

Main Bus Harness

The Main Bus Harness is used in Command Link® (CL) and Command Link® Plus systems. The harness has one 6 pin connection on each end and is used to connect multi hubs into the network.

1 ft 6Y8-82553-01-00	20 ft 6Y8-82553-21-00
10 ft 6Y8-82553-50-00	25 ft 6Y8-82553-31-00
15 ft 6Y8-82553-11-00	30 ft 6Y8-82553-41-00

Pigtail Bus Harness

The Pigtail Harness is used in Command Link® and Command Link® Plus systems. The harness has one 4 pin connection on each end and is used to connect gauges and other items into the network.

1 ft 6Y8-82521-01-00	6 ft 6Y8-82521-31-00
2 ft 6Y8-82521-11-00	9 ft 6Y8-82521-41-00
3 ft 6Y8-82521-21-00	12 ft 6Y8-82521-51-00

8 ft. Power Lead Harness

The 8 ft. Power Lead Harness connects power from the key switch to the multi hub for gauges and other components. The harness is used in Command Link and Command Link Plus systems.

6Y8-83553-01-00

Multi-Hub Assembly

The Multi-Hub is used in both Command Link and Command Link Plus system to allow devices to connect into the network with 1 power supply connector, 2 main BUS connectors, and 3 device connectors.

6Y8-81920-01-00

In-Line Hub Assembly

The In-Line hub is used in both Command Link and Command Link Plus system. The hub works great with the Multisensor or in a simple Command Link installation. Connects a pig tale harness to a main bus harness.

6Y8-81920-11-00

Grey Main Bus Connection Cap with Resistor

During the installation and rigging process, the number of multi-hubs required may result in unused connector positions. One resistor cap is included with a multi-hub assembly.

6Y8-85371-01-00

Red Power 2 Pin Connection Cap

During the installation and rigging process, the number of multi-hubs required may result in unused connector positions. In most installations only one multi-hub will have a used power connection. The rest will require a protective cap.

6Y8-82582-01-00

White Pigtail 4 Pin Connection Cap

During the installation and rigging process, the number of multi-hubs required may result in unused connector positions. The 4 pin cap covers any unused device ports on the multi-hub

6Y8-82582-11-00

Command Link Plus Second Station Primary Harness

The CLP second station primary harness connects the main station control box with the second station control with the help of a secondary harness. The primary harness has one 6 pin connector, one 4 pin connector, and one 3 pin connector on each end. One second station primary harness is required per engine when rigging a second station. For use with CLP control boxes.

Second Station Primary Harness Adaptor

The CLP and original DEC second station controls use a different style 3 pin connector on the primary harness. The adaptor harness will allow the use of a CLP control box for the main station and an original DEC control on the second stations. Perfect for the customer looking to re-power.

6X6-8258A-K0-00

CLP AGI / Gateway Harness

The .3 ft. harness connects a Pigtail Harness to either the AGI or a Gateway. The harness has a wrap of green tape and a male 6 pin at one end with a female 4 pin at the other.

6Y9-83553-50-00

CLP Multisensor Harness

The Multisensor harness has a female 6 pin connector on one end and a male connector on the other. The .7 ft. harness connects a Pigtail Harness to the Multisensor and has a wrap of yellow tape.

6Y9-83553-60-00

CLP Display Harness

The Command Link Plus Display Harness has a 6 pin male connection on one end and a 4 pin female connection on the other. The .5 ft. harness connects a Pigtail Harness to the Command Link Plus Display and has a wrap of black tape in the middle.

6Y9-83553-40-00

Main Bus Y Harness

The Main Bus Y Harness connects the 6 pin control box lead into two main bus harnesses. This harness is used in installations with a CLP Display, Multisensor, and two stations. Please see appropriate diagram for more details.

6Y9-83553-10-00

CLP Main Bus Adaptor Harness

The adaptor harness connects the 6 pin control box lead to a main bus harness. This harness is used in installations with a CLP Display and has a 6 pin connection each end. Please see appropriate diagram for more information.

6Y9-83553-00-00

Fuel Harness for CLP

The Fuel Harness allows the vessel fuel information to be used with the Command Link® Plus Display.

6Y9-8356N-10-00

GPS Harness for CLP

The GPS Harness allows the GPS speed information from a GPS unit to be used with the Command Link® Plus Display.

6Y9-8356N-01-00

GPS / Fuel Harness for CL

The GPS / Fuel Harness allows the speed of the vessel from a GPS and the fuel system information from the vessel to be used with the Command Link® system.

6Y8-8356N-01-00

Rigging Estimate Guide (Diagrams)

Rigging omnonents

Main Station Key Switch Adaptor Harness

The Main Station Key Switch Adaptor Harness allows the use of a current key switch with a Command Link® Plus control box. One harness is required per key switch, except single engine installations.

6X6-8258A-L0-00

Single 2nd Station Key Switch Adaptor Harness

The adaptor harness allows the use of a current key switch with a Command Link® Plus control box. One harness is required per installation.

6X6-8258A-M0-00

Twin 2nd Station Key Switch Adaptor Harness

The adaptor harness allows the use of a current key switch with a Command Link Plus control box. One harness is required per installation.

6X6-8258A-N0-00

Triple 2nd Station Key Switch Adaptor Harness

The adaptor harness allows the use of a current key switch with a Command Link® Plus control box. One harness is required per installation.

6X6-8258A-P0-00

6X7 Flush Mount Key Switch Extension Harness

Used to connect main key switch that would otherwise be too far away for the control box connector to reach.

6X7-82590-30-00

Command Link® and Command Link® Plus Accessories

Y-COP®

The Electronic Control Module disables the ignition system via an operator controlled key fob. When the operator wishes to use the outboard, a simple command via the wireless key fob activates the ignition system. Two water resistant key fobs are provided with each system. The Y-COP Immobilizer system will become available for other Yamaha outboards in the future. (Replacement Remote: 6AA-86261-22-00, Replacement Unit: 6Y8-86260-11-00, Replacement Decal: 6Y8-48277-00-00)

6Y8-W0035-83-00

The optional Y-COP Immobilizer System is compatible with the following Yamaha Outboards:

F350 w/COMMAND LINK PLUS capability	F115 (from April 2010)		
V6 OFFSHORE F300, F250 and F225 Models	F90/F75 (from April 2009)		
F70	F60/50 (from April 2009)		
F40 (from October 2008)	F200 Inline		

Y-COP® CL Key Switch Harness for Twin and Triple Engine Installations

The harness has three one pin connectors to tie Y-COP into the key switches. Photo not available.

6H5-81315-00-00

Y-COP Harness for Multiple Engine Installations

The harness connects to the Key Switches, Power Supply, the Y-COP, and a Pigtail Bus Harness. This harness is required when using Y-COP in twin and triple installations with the new CLP key switches.

6Y8-81315-00-00

Power Y Harness for CLP

The Power Y Harness connects the 8 ft. Power Lead to two multi hub assemblies for use with the new CLP Display and CL gauges. Please see appropriate diagram for more details.

6Y9-83553-20-00

General Information

Rigging Estimate Guide (*Diagrams)*

Rigging Components

Electrical Components

Command Link / Command Link Plus Gateway

Yamaha's Gateways allow certain engine and boat data to be displayed on NMEA-2000® compatible displays that are external to the Yamaha system. The Gateway is for installation with a Command Link or Command Link Plus networks, such as those found with mechanical controls and/or DEC controls. (requires pigtail harness for installation)

6Y9-8A2D0-20-00

Command Link / Command Link Plus Analog Gauge Interface

The Analog Gauge Interface, or AGI, allows Command Link® Plus or Command Link® equipped boats to display selected engine and boat performance data on analog gauges, be they Yamaha or those of most aftermarket manufacturers. The AGI is for installation with a Command Link or Command Link Plus networks, such as those found with mechanical controls and/or DEC controls. (requires pigtail harness for installation)

6Y9-8A2D0-30-00

Command Link® Auto Trim Tab Retractor Interface

The trim tab retractor interface provides up to two engine analog tachometer outputs needed for some automatic trim tab retractors.

MAR-6X6DA-C0-00

Command Link / Command Link Plus Multisensor

The multisensor is utilized to provide water depth, water temperature, and water speed information to the Command Link Plus display or Command Link Gagues. This multisensor has only one plug to power the unit and send signals to the ECU. It is powered through the Command Link Plus network. (Kit Includes: InLine Hub 6Y8-81920-11-00,1 ft. Pig Tail Harness 6Y8-82521-01-00, Adaptor Harness 6Y9-83553-60-00, Multisensor 6Y9-83688-00-00)

MAR-3DCER-KT-00

Command Link Thru-hull Multisensor

The multisensor is utilized to provide water depth, water temperature, and water speed information to the Command Link gauges. This multisensor was developed specifically for the Command Link® systems and has only one plug to power the unit and send signals to the ECU. The plug from the multisensor will not plug directly into the hub and requires a bus harness to plug it into the hub. It is powered through the Command Link® harness. The multisensor is available in two configurations:

Plastic Thru-hull: 6Y8-83688-11-00 Bronze Thru-hull: 6Y8-83688-20-00

Electronic Cooling Water Pressure Sensor

The water pressure sensor kit taps into the engine block's cooling passage and converts the pressure readings to an electrical signal that is sent to the engines' ECU. The ECU can then display this data on the tachometer. This sensor kit is optional for Command Link® Plus and Command Link®, and there are two types depending on model of the engine. These sensors plug into harness leads that are part of the engine's wiring harness. V8 engines come standard with a cooling water pressure sensor. (Replacement sensor: 6AW-8366B-01-00)

Kit for F40-F115 and HPDI: 60V-8A4L0-13-00

Kit for F150-F250, VMAX SHO®, and 4.2L Offshore: 69J-8A4L0-12-00

Thermostat Cover for VMAX SHO®

Allows the installation of sensor kit 60V-8A4L0-11-00 on VMAX SHO® engines.

6CB-1241B-01-00

Electronic Speed Sensor

The speed sensor converts the water pressure from the lower units' pitot tube to a digital signal inside the engines ECU. The ECU then displays the speed on the speedometer. The kit contains all of the components necessary to connect the sensor to the pitot hose coming from the lower unit and one kit fits all. V8 outboards do not have speedo tube required for connection to this sensor. (Replacement Sensor: 6AW-8366B-01-00)

60V-8A4L1-12-00

Display Cover for Command Link® Plus Display

Protect your CLP display with this stylish and durable cover.

30' length: *6Y5-83557-10-00* 300' length: *6Y5-83557-40-00*

Water Temperature Sender

Two wire sender for cooling water temperature gauges.

688-83591-00-00

Yamaha Engine Meters

To help you maintain your generator at proper service intervals, the intervals are pre-programmed into this meter (10 hours initial, every 50 hours thereafter). Upon reaching the specified service interval, the meter displays a flash alert for a two-hour period.

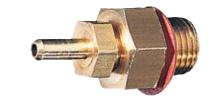

> Deluxe Hour Meter (Hour Meter Only): ENG-METER-2C-01 Deluxe Hour Meter & Tachometer: ENG-METER-4C-01

Water Pressure Adaptor

Provides most Yamaha Outboards a water-jacket tap with a hose barb to adapt aftermarket pressure gauges which use a 1/8" ID (3/16" OD) RUBBER hose.

MAR-WPRES-AD-TR

Water Pressure Sender

Includes water jacket tap, hose, and nuts for installation on most Yamaha Outboards. (Ferrule and Nut 663-83668-00-00, Gasket 90430-14115-00 for gauge side)

688-83667-00-00

Water Pressure Dampener

Installing the water pressure damper between the gauge and water tube is recommended when the pointer of analog gauge is wiggled if water pressure pulsates or to reduce a risk if water has leaked at connector end causing the gauge damage.

6Y5-83728-00-00

Speedometer Pickup Sender

The speedometer pick up can assist in high-performace applications, where the engine is mounted at elevated levels, or with the Yamaha V8 outboards without a speed pick up in the lower unit.

688-83556-00-00

Fuel Flow Sensor

Replacement sensor for use with Yamaha's fuel management and speed / fuel gauges.

Switches and Indicators

Pull Style Light Switch

Two position, On - Off switch with a classic look.

688-82520-00-00

On - Off Toggle Switch

Two position toggle switch with protective cover.

688-82526-00-00

Remote Mount Trim Switch

Place trim/tilt functions right where you want them. Connects easily to main harness using the leads provided.

688-82563-10-00

Rocker Switches

These high quality attractive switches are great for adding additional components to a customer's rig.

Switch Type	Part Number
Blower	GU1-U8022-00-00
Lights	GU1-U8029-00-00
Horn	GU1-U8011-00-00
Accessory	F0K-U8090-00-00
Bilge Pump	GU1-U8012-00-00
Stereo	F0K-U8353-00-00

Rocker Switch Installation Plates

These installation plates can help ease the installation of new rocker switches where old dash components were removed. They also add an element of professionalism to any installation.

Middle Plate: *GP1-U8572-00-00* End Plate: *GP1-U8571-00-00*

Indicator Lamp

A durable red lamp with many useful purposes. Two lead connection.

663-84301-01-00

Lamp Panel Assembly

For use with Oil Lamp Panel Assembly T9.9ELR or for use as a warning visual indicator. Has a yellow / red lead for positive voltage and a black lead for negative voltage.

6G8-83530-00-00

12 Volt Accessory Socket

Great for customers who like to use electronic gadgets or charge their cell phone on the water.

F0K-U8284-00-00

Wire Connections and Circuit Protection

The wire connectors listed below are available through Marine Rigging and Parts. For a complete wiring kit, contact K&L tools at 1-800-708-3184.

Fuel System Components

10-Micron Fuel/Water Separating Filter

They are a primary line of defense against ethanol-related fuel system issues. Highly recommended for all two stroke and four stroke EFI outboards and two stroke HPDIs. Also excellent for carbureted engines. New, improved 10-micron filter provides superior filtration ahead of the engine's onboard filters and injectors. Large filtering and water capture areas maximize filtration while maintaining adequate flow rate for larger engines.

Transom Fitting For Rigging Hose

An easy install. Just thread the Rigging Hose onto the fitting. Requires no clamp, yet provides positive engagement. Use with Rigging Grommet (sold separately) for quick, easy rigging.

Black *MAR-THRUT-RS-M2*Chrome *ABA-THRUT-RA-SM*

Rigging Grommet

Choose the grommet for your engine. Simply thread the Rigging Grommet onto the Rigging Hose and thread the Transom Fitting (sold separately) onto the other end. Provides positive engagement without clamps.

2 Stroke 115-250 *MAR-GROMM-ET-01* F150 *MAR-GRMMT-F1-50* F200-F250 *MAR-GRMMT-LG-4S* Z250, Z300 *MAR-GRMMT-Z2-50*

Other '02 \sim V4 and V6 models include the main grommet, but require the following hardware to attach the rigging hose.

Fastener **68F-42753-00-00** Clip **90601-20022-00**

Rigging Hose

High-quality hose is flexible, crush-resistant with UV inhibitors for added protection. Black, Gray, or Metallic Blue.

25' Black *ABB-RIGHS-BK-25*25' Gray *ABB-RIGHS-GY-25*25' Metallic Blue *ABB-RIGHS-BE-25*100' Black (two 50' rolls) *ABB-RIGHS-BK-50*100' Gray (two 50' rolls) *ABB-RIGHS-GY-50*

Dual Steering Cable Bracket

Strong, 7-gauge stainless construction, with aluminum steering tube. Conforms to ABYC® standards. Features a steel shield over the steering tube to provide additional protection. Fits 70–300hp engines.

ABA-DUALS-TE-ER

Replacement Tube (not shown) ABA-DUALS-TR-01

Universal Dual Steering Bracket

Pre-drilled to fit all major outboard motor brands. Features an aluminum steering tube and stainless steel bracket. Fits 70–300hp engines.

ABA-42110-00-00

Dual Steering Tie Bar Kit

Strong, stainless steel tie bar provides dual engine steering control for Yamaha outboards. Adjustable from 11" to 36". Includes necessary hardware.

ABA-DUALT-IE-BR

Outboard Steering Centering Clips

Outboard steering centering clips for use with front mounted hydraulic steering cylinders having an 8 inch total stroke length (side to side). Helps the outboard remain centered while trailered. The clips also help limit the load applied to the hydraulic system that may occur when an outboard is tilted and partially turned. The clips are quickly and easily installed over the hydraulic cylinder steering rods. Compatible with systems having an 8" total stoke length. Be sure to measure your system for compatibility prior to ordering. Remove Steering Centering Clips before boat operation. Steering ability will be extremely limited if clips are in place, which could result in an accident. Sold in pairs.

MAR-CNTRC-LP-08

Zerk Nut

Stainless steel, with high pressure O-ring seal. Attaches to steering tube to keep lubrication in, contaminants out.

MAR-ZERKN-UT-01

Remote Control Attachment Kits

Engine Accessories

The remote control kits listed below may also be listed with additional parts required to install the remote control attachment kits. For the most accurate information always refer to PartsManager Pro™.

Tiller Handles

Yamaha's Multifunction Tiller Handle combines ergonomic design, smooth shifting, fingertip controls and an extended throttle handle for virtually effortless maneuverability. Add to that Yamaha's exclusive Variable Trolling RPM Switch (VTS® F40LA through F90 models only) and a 90° throttle rotation angle, and steering is not only easier, it's more comfortable too. It's easy to see why our Multifunction Tiller Handle won an IBEX® Innovation Award.

F25 Complete Tiller Handle Assembly

Includes everything required to mount a tiller handle on F25 Outboard. 6X4-42103-04-00

Tiller Handle Main Assembly

The tiller handle main assembly requires the use of a fitting kit below to mount to a Yamaha Outboard.

6X4-42103-54-00

The fitting kits are used along with the Main Handle Assembly. They typically include the wire harness and mounting hardware.

Cowling Covers

Super heavy-duty protection for your Yamaha outboard's cowling. Constructed of ultra-durable Sur Last® solution dyed polyester fabric for the ultimate protection against fading and the elements, this non-abrasive, water resistant cover is resistant to UV, mildew and mold. The cover has a soft fabric inner liner for added paint protection, and screened on factory logos for unmatched style. Includes a snap-buckle strap and stretch cord for a snug fit.

Trailer Support

One Yamaha Motor Trailering Support will provide adequate support for the F115 \sim V6 four-stroke and all 70 \sim 300 two-stroke models while trailering. V8 models require two supports. The Yamaha Motor Trailering Support is quickly and easily installed over the port trim rod on F115 \sim F250 four-stroke and all 70 \sim 300 two-stroke models or both trim rods on the V8 models. Fits F115 \sim F350 Four-Stroke and all 70 \sim 300 Two-Stroke models with Power Trim and Tilt. Does Not work with new F115B.

MAR-MTSPT-YM-10

McGard® Outboard Lower Unit Lock Bolt

The lock is designed to secure the lower unit to the mid-section of the outboard while in storage, on the trailer, or in use. A free-spinning collar turns if attacked by gripping tools, helping protect against costly lower unit theft. Simply replace one of the standard lower unit mounting bolts with a McGard® lower unit locking bolt. Use the included special key to remove the McGard® lower unit locking bolt when removal of the lower unit is required. Stainless steel, through hardened construction. Fits Yamaha outboards F115 – F350 without 5" extension.

MAR-LWRUN-LK-00

Engine Flushers

Connects in seconds to a common garden hose to flush out harmful sand, salt, and other contaminates.

Application	Part Number

3, 4, 5, 9.9, FT9.9, 15 and all jet drive	ABB-FLUSH-JD-00
6, 8, 25-Z300HP	ABB-MOTOR-FL-SH
TRP VMAX® 150 and B115 Specially designed for nose-cone flusher	MAR-FLUSH-ER-00

Yamaha Transomplate

A great way to add style and show off your Yamaha Pride. Laser Etched with the Yamaha Logo.

F30A ~ V6 outboards: YMM-09TP0-00-01

V8 outboards: YMM-09TP0-00-02

Tilt Limiters

The tilt limiter for the new Yamaha Outboards was introduced to assist in customer satisfaction. The new limiter will help improve customer satisfaction in applications where the top cowling would come in contact with the boat at full tilt. Please select the correct tilt limiter from the charts below.

Tilt Limiter for F115, F150, and VMAX SHO® Outboards

Yamaha Propeller Descriptions

Endless Propeller Solutions By Yamaha

With all that Yamaha has to offer in regard to propellers, virtually any boat can perform at its peak. That includes yours. From large offshore boats to family and watersports boats to the fastest of bass and bay boats, Yamaha has a propeller solution that's just right for your application. Yamaha propeller solutions. Well beyond expectations.

Shift Dampener System (SDS™)

Yamaha's patent-pending Shift Dampener System uses a unique, splined rubber hub and special aft washer (cam) to distribute and absorb the forces, and the resulting sounds and vibrations, that are normally associated with shifting an outboard into gear. The result: far quieter and smoother, 'clunk free' shifting. "Amazing" is the word most-often used to describe the result. First launched on v6 and v8 outboards SDS™ is now available for Yamaha mid-range outboards using the "K" series (4.25") gearcase with Yamaha Talon™ propellers. A perfect companion to Yamaha's new F115B, SDS™ brings a new level of quiet and comfort to a much broader segment of the market, fitting Yamaha outboards from the F40 up to the F115.

Aluminum Series

Yamaha design, quality, and performance in a low-cost, lightweight propeller. A good all-around choice for your Yamaha outboard. Available in a wide variety of sizes and pitches for Yamaha outboards between 2 and 225 horsepower, in right-hand and select left-hand rotation.

Talon™

Yamaha's high-performance aluminum propeller with Shift Dampener System (SDS™) is designed specifically for Yamaha mid-range outboards. Featuring an all-new blade architecture that's perfect for pontoon, walleye, deep V and fiberglass boats, these props feature a new, replaceable SDS hub that requires no special hardware for proper operation. Talon™ propellers feature a high-efficiency, low slip design, have a 13 ½″ diameter, and are available in 9″, 10.5″, 12″, 14″, and 16″ pitches for engines using the "K" series (4.25″) Gearcase.

Dual Thrust™ Series

Yamaha's Dual Thrust propeller is the answer for heavy loads such as sailboats and pontoons. They're standard on the High Thrust T9.9, and optional on other mid-range engines using the "K" series (4.25") gearcase. They're excellent for use on Yamaha High Thrust models (T50 and T60), as well as the F70, particularly on pontoon applications. Dual Thrust propellers feature a large diameter and blade surface area, a low pitch and rake angle, and a patented oversized center tube which re-directs the exhaust away from the blades when in reverse. This helps the prop bite 'clean' water, resulting in awesome thrust and control regardless of direction.

Painted Stainless Steel Series

An excellent general-purpose choice. Stainless steel construction allows for a blade that is thinner, more efficient and more durable than an aluminum propeller, with a cost-effective, black paint coating. Available in a wide variety of sizes and pitches for Yamaha outboards between 25 and 300 horsepower, in right-hand and select left-hand rotation.

Performance Series

A proven performer on a wide array of Yamaha outboard-powered boat applications. Highly-polished stainless steel and advanced blade design offer both good looks and good performance. Available in a wide variety of sizes and pitches for Yamaha outboards between 20 and 225 horsepower, in right-hand and select left-hand rotation.

Performance Series 4-Blade

Four blades improves hole shot, acceleration, and overall 'grip' for better performance in rough water or with a high engine mounting height.

Performance XT Series

A step up from our Pro Series, designed with larger, longer blades for strength and improved performance in applications requiring high engine mounting heights, such as boats with jackplates. Available in 23", 25", and 27" pitches, right-hand rotation only.

Performance XL4™ Series

Large offshore boats, such as express cruisers and walk-around models, require massive thrust to plane and additional propeller 'grip' for maximum operational efficiency. Helping to harness the incredible power of Yamaha's 5.3L V8 outboards, these new four-bladed propellers offer outstanding acceleration, quick planing, and improved "grip" to help maintain plane at lower speeds and help eliminate ventilation, particularly in turns and following seas. They're manufactured from the highest-quality stainless steel, for maximum quality and durability. Polished to a lustrous shine, they will be available in 15" and 17" pitches and in both right and left-hand rotation. Please note these particular propellers will only fit Yamaha's line of V8 outboards, using a pressed-in style rubber hub only.

Performance XL4™ - HP Series

Lighter, high-performance offshore boats, such as open fishing-style hulls, can also benefit from the XL4's excellent acceleration, quick planing, and maximum grip of the water. For these craft, Yamaha introduces the new Performance XL4 – HP series of propellers. Offering many of the same performance characteristics of their XL4 bretheren, their advanced blade geometry is specifically designed for Yamaha V8 applications where higher speeds are enabled by a specific boat's hull design. Featuring a highly-polished stainless steel finish, they will be manufactured to Yamaha's stringent standards in 22 and 24" pitch, right- and left-hand rotation. Please note these particular propellers will only fit Yamaha's line of V8 outboards, using a pressed-in style rubber hub only.

Pontoon Performance Propellers

Don't let the name fool you! This prop is not only a perfect choice for many pontoon boat applications, but also for any boat that requires extra thrust and control for maximum performance and efficiency. Their significantly larger blade area helps provide outstanding thrust and control, with added 'grip' and reduced ventilation in turns and high trim angles. Perfect for many of today's pontoon boats, work boats, or other displacement or semi-planing craft. They're also excellent for many applications using Yamaha's F70 outboard. Manufactured of high-quality stainless steel.

Generators & Accessories

PRO Series™

An excellent performance-oriented choice for single-outboard, high-speed boats requiring "bow lift," such as mid- to large-sized bass, bay, and flats boats. Available in 17", 18", 19", 21" and 23" pitches for 60~130hp two stroke and T60 ~F115 four stroke Yamaha outboards, and 21", 23", 25" and 27" for V6 two-stroke and F150 ~F250 Yamaha four stroke outboards. Right-hand rotation only.

Reliance® Series Propeller

Reliance is CAD-designed to increase performance. Designed primarily for use with Yamaha's F150 outboard, it also provides excellent all-around performance in outboard applications. Faster at all RPM ranges and having better anti-ventilation characteristics (grip) than Yamaha's proven Painted Stainless Steel propellers in most applications, Reliance Series propellers are highly-polished stainless steel, featuring impressive cast-in naming on the barrel and excellent corrosion resistance.

HS4™ "High Seas" Propellers

Many larger boats can benefit from excellent acceleration, quick planing, and maximum 'grip' on the water. For these craft, Yamaha offers our HS4 "High Seas" line of four-bladed propellers. HS4 "High Seas" propellers are designed for certain V6 four stroke engines, with thrust to plane, planing at slower outboard speeds, and resistance to ventilation in high seas. It's all there, and they're all Yamaha. Made of high-quality stainless steel to Yamaha's exacting standards of quality and durability. Highly-polished stainless steel with cast-in naming on the barrel, they're as impressive out of the water as they are in the water.

Saltwater Series II™

A powerful choice for today's larger offshore boats, Saltwater Series II propellers are a highly-polished, larger diameter design. Aggressive rake and extra cupping on the blades provides superior midrange fuel efficiency, along with excellent anti-ventilation characteristics. For offshore fishermen, that translates to longer cruising range and better handling in rough seas. Also available with the SDS Shift Dampening System.

Saltwater Series XL®

For use exclusively with the new V8 5.3L four stroke Yamaha outboards. Designed to harness the awesome power of these outboards and turn it into massive amounts of thrust, Saltwater Series XL propellers have more diameter and 21% more blade area that even our largest Saltwater Series II™ propellers. This helps the F350 generate up to 45% more thrust than 250hp-class outboards, and provides large offshore boats with plenty of power to plane, acceleration, and top-end speed. Also available with the SDS Shift Dampening System. (NOTE: deduct two inches of pitch for same or similar performance when converting non-SDS XL propellers to SDS-equipped Saltwater Series XL propellers)

Small Hub Series

A highly-specialized propeller designed for specific applications using 60hp – 200hp outboards. Features a smaller, "exhaust-over-the-hub" design, allowing the outboard to develop rpm quicker for faster hole shots.

TRP

With two counter rotating propellers and 60% more blade surface, TRP provides transom lifting performance like no other lower unit. The twin polished, stainless steel propellers add more grip for outstanding handling, greater thrust and unmatched hole shot. TRP's crowning achievement, counter rotating propellers, virtually eliminate steering torque, providing smooth steering even at high jack plate and trim positions. The increased prop area and counter rotation provides the distinct advantage of planing boats quickly by lifting the transom up on top of the water which helps to reduce bow rise during hole shot. TRP provides excellent shallow water starts, quicker acceleration and outstanding control.

VALCACIO E DE CONTROL DE CONTROL

V MAX® Vented Series

Our ultimate performance propeller for bass, flats, and bay boat, two stroke outboard applications. Designed for more acceleration and higher top-end speed than either the Pro Series or Performance XL Series, they also provide superior handling and "grip", not to mention added strength. Perfectly matches our 3.1 and 3.3 Liter V MAX® two stroke powerhouses for legendary V MAX® speed and handling.

V MAX SHO® Series Propellers

To properly harness the awesome power of Yamaha's new V MAX SHO® four stroke outboard, Yamaha offers the V MAX SHO® Series of propellers. Perfect for bass, flats, and bay boats powered by the new V MAX SHO® outboard, these props are purposely designed for awesome acceleration, maximum top-end speed and incredible performance and handling when mated to these outboards. Made of the highest-quality stainless steel and featuring a highly-polished finish with cast-in naming on the barrel.(NOTE: Two stroke outboards used in bass, flat, and bay boat applications should be equipped with V MAX Vented Series propellers).

Weedless Propellers

A propeller designed to help keep pesky vegetation in the water and off your customers propeller and prop shaft. The weedless propeller was made for those who run in the weed infested waters in search for the fish that others dare not go after. Weedless propellers with a 91/4 diameter are available in the Aluminum Series, while the 91/8 diameter weedless design is available in painted stainless steel. See the chart below for application information.

Plastic Propellers

A cost effective alternative for metal propellers. Ideal for those who run in debris filled water or those looking for a price point propeller. Available for the 2 HP two stroke or the T9.9 four stroke.

Turbo Propeller Descriptions

Information

Rigging Estimate Guide (Diagrams)

Components

Accessories

Maintenance

Fusion 4

"Four-blade performance for specialty hulls" Excellent combination of strong acceleration and top-end performance for specialty high-horsepower sterndrive or outboard applications, such as "stepped" offshore hulls and some flats boats. Also excels on jack plate equipped high-horsepower outboard bass or bay boats. Advanced design features very aggressively raked, progressive pitch blades with through-hub, vented exhaust. Four blades help resist ventilation and propeller slip in heavy and/or following seas.

FX4

"Four-blade benefits for midrange outboards" Improved bow and stern lift, acceleration, and load carrying ability for 3 and 4 cylinder outboards; provided by its 4-blade design featuring progressive pitch and high rake angle. Helps quickly develop engine RPM and reduce steering torque. Excellent for flats or shallow water boats using 70-130hp, 3 and 4 cylinder outboards with 4.25" gearcases. Works well on a broad range of smaller boats and applications.

"Total performance for Super High Output four stroke outboards" Excels in hole shot, acceleration, top speed, and handling; all at true tournament loads. Designed specifically for ultra-high-performance four stroke outboards like Yamaha's V MAX SHO®. Advanced design lifts the entire boat, dramatically decreasing drag and increasing performance. It provides very minimal bow rise, critical during oftencrowded tournament blast-offs. Steering torque and operator fatigue, normally associated with high engine mounting heights, is greatly reduced. Now with pressed in hub for added durability.

Hot Shot

"Turbo performance for smaller outboards" Offers reduced slip, enhanced durability, better resistance to ventilation, increased performance, and improved fuel efficiency compared to some older aluminum designs. Specifically for smaller horsepower outboards from 18hp~70hp (depending on manufacturer), using the same highefficiency design of the larger Turbo® propellers. Increased performance and durability compared to aluminum propellers. 10 1/8" diameter propellers have pressed-in hubs. 10 1/2" and 11 3/4" diameter propellers use Guardian SQ-Lok™ system.

Lightning

"High performance prop for high performance boats" Excellent speed, handling, and bow lift characteristics. Ideal for boats featuring higher engine and drive mounting heights, such as bass and flats boats; particularly those featuring older, heavier designs. Also works well in tri-log pontoon boat applications using V6 outboard power. Lighting's thick blades increase strength, longevity and durability. Aggressive pitch, high rake angle and large diameter. Designed for Mercury®, Johnson®/Evinrude®, Suzuki® and Yamaha V6 and Johnson®/Evinrude® V8 outboards. Thick blades increase strength, longevity and durability.

Offshore I & II

"Exclusively designed for outboard powered offshore boats" Superlative load carrying ability and transom and bow lift for large, heavy offshore boats using outboard power. Provides outstanding speed and fuel efficiencies at cruise RPM, while reducing ventilation and slip normally caused by rough water and/or following seas.

Excellent for 200 - 300hp V6 offshore-type applications in single or multiple engine configurations. Offshore II propellers also work well in sterndrive applications. Offshore I = 4-blade design. Offshore II = 3-blade design.

Pontoon 1

"Extra thrust and added control" Outstanding thrust and control on outboard powered (twin-log) pontoon boats, deck boats, sailboats and utility/work boats, for increased acceleration and maneuverability. Resistant to ventilation, particularly in turns and at high engine trim levels. Features increased trailing edge cup, lower rake, and a larger diameter than typical propellers. Excellent for use with 3 and 4 cylinder outboard applications with 3.5" or 4.25" gearcases. Use on twin-log pontoon boats and some deck boats, sailboats, and utility/work boats where extra thrust, maneuverability, and control are needed. Ideal for many applications using Yamaha's F70 outboard.

Quest™

"Muscle and might for your midrange outboard" Combines outstanding acceleration and load carrying abilities for midrange outboard engines using the intermediate size gearcase (4.25"). Stays "hooked up" in turns and at high engine trim angles, and helps allow the outboard to achieve and sustain proper RPM throughout the power band. Quest™ propellers are very well suited for 15′-18′ utility/work boats and various applications using Yamaha's F70 outboard, due to their lower rake angle and advanced blade design. Available with 3 or 4 blades. Excellent for 3 and 4 cylinder outboard applications using an intermediate (4.25") gearcase. Very well suited for smaller utility/ work boats and Yamaha F70 applications.

Turbo 1

"Turbo's most popular propeller" Enhanced bow lift, excellent performance, and handling characteristics for medium-to-heavily loaded boats. Also excellent for use on high performance, high horsepower pontoon boats with triple logs and lifting strakes (approximately 150hp and above). Makes a great all around propeller. Features advanced blade geometry with progressive pitch, increased blade rake angle and trailing edge cup. Vented blade design for fast hole shot, acceleration and "time-to-plane". Turbo's most popular and best "all around" performance propeller.

Turbo 2+2

"Performance four-blade for deep-drive applications." Improved hole shot, acceleration and ability to effectively power heavier loads on boats using sterndrives or large V6 outboard power with drive units that typically operate while deeply submerged during on-plane operation. Through-hub exhaust and an advanced blade design mean true performance for water sports or family boating.

Turbo 2+2 OT

Turbo 2+2 OT props combine quick hole shots with rapid acceleration and holding power. An over-and-through the hub exhaust design allows the prop to spin up faster at hole shot than complete thru-hub exhaust designs. Four blades helps acceleration and provides additional "grip" over three-bladed propellers. Turbo 2+2 OT props also combine great bow lift with the ability to carry tournament loads to speed, due to their aggressive pitch and high rake angle. 4.75" gearcase, 13 ¾" diameter, right-hand rotation, pitches 18",20",22",23",24",25",26"

TXP™

"Totally Exciting Performance for high-speed hulls" Excellent high-horsepower, high-speed propeller for very light, high-speed boats, particularly those using high engine-mounting heights or a hydraulic jack plate and having naturally greater bow lift "built-in". More aggressive pitch, a higher rake angle and more aggressive cupping than our Lightning model makes TXP™ an excellent prop for "surface piercing" applications. The TXP™ features an advanced blade design that helps create minimum steering torque for less steering effort and operator fatigue.

> งenerators & Accessories

TXP™ OT4

"Furious four-blade performance for high-speed boats" Faster hole shots and quicker acceleration, through the use of an over-and through-hub exhaust design which helps the engine develop RPM rapidly. Very aggressive pitch, high rake angle, large diameter and more advanced trailing edge blade cupping makes these props excellent for "surface piercing" applications. Excellent high-horsepower, high-speed propeller for very light, high-speed boats, particularly those using high engine mounting heights or a hydraulic jack plate and having naturally greater bow lift "built-in". Advanced blade design helps reduce steering torque.

Ultima 4

"Power, lift and thrust" Enhanced performance, bow and transom lift and load carrying ability. Resists ventilation and slip, particularly in turns and high engine trim levels. Excellent propeller for flats boats and other applications with high enginemounting height needing stern lift at hole shot and during acceleration. Suitable for V6 outboards utilizing a high engine-mounting or operating height, including those with jack plates. • Excellent propeller for bay and flats boats due to stern lift at hole shot and during acceleration.

Vector

"Big power for deep drives" Faster hole shots and improved planing, with excellent bow lifting characteristics and good performance in rougher water on heavy boats using fully submerged sterndrives, particularly those with twin engines using counter rotation. Large diameter and greater blade area also works well on heavier 22'-27' boats. Specifically for sterndrives like MerCruiser® Bravo® where the props ride fully submerged. Also works well on heavier 22'-27' boats, particularly with twin engines using counter rotation.

What does the Yamaha propeller series mean?

The propeller series simply relates to the gearcase diameter. See the chart below for more information.

Propeller Mark	Model	Gear Case Diameter	Spline Count
А	2	1.75"	Shear Pin, no Spline
BS	F2.5	2.00"	9
В	4, 5	2.00"	9
BA	4, 5, F4, F4A, F6A	2.00"	9
N	6, 8, F6, F8	2.25"	7
R	T8, T9.9	2.50"	8
J	9.9 ~ F20	9.9 ~ F20 2.50"	
F	20~30, F25	3.00"	10
G	40~55, T25~F60	3.50"	13
K, KL	60~130, T50~F115	4.25"	15
M/T, ML/TL	150~300, F150 ~ F300 (4.2L V6)	4.75"	15
X, XL	F300/F350TR (V8)	5.25"	17

How to Pick a Propeller

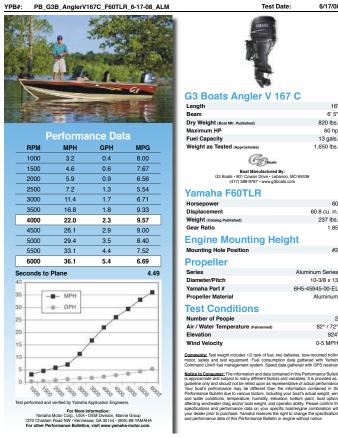

Propellers

When it comes to 'proper propping', there's no magic bullet or one particular prop that perfect for all boat types and engine applications due to the litany of performance variables, but there are ways to 'hone in' on what you need. As a general rule, the correct propeller will allow your engine to reach the upper portion of the WOT (wide open throttle) range specified by the manufacturer without exceeding it, with a normal-to-heavy load. For example, if your outboard says WOT is 5000-6000 rpm, you need a prop that will allow your engine to turn between approximately 5700 and 6000 rpm with your average-to-heavy load in the boat. Be sure to account for things like fuel, full bait and/or live wells, batteries, passengers, and all gear, including safety gear like anchors, ropes, etc.

To begin, check Yamaha's Performance Bulletins on our website: http://yamahaoutboards.com/owner-resources/performance-bulletins.

Choose the type of boat most similar to yours (or the one you want), and note what propeller is listed. Next, check out the propeller solutions applicable to your particular horsepower Yamaha outboard in our propeller charts located in the propellers section of our marine website's landing page http://www.yamahaoutboards/propellers/picking-a-propeller (there's a great deal of other great information in here, too!). Look for the same series name and pitch of propeller as the Performance Bulletin, then adjust the pitch depending on weight and altitude (heavier weight or higher altitude, pitch down...light or low, pitch even or slightly up). Each inch of propeller pitch is equal to approximately 150-200 rpm.

Yamaha Performance Bulletin

Don't see a Performance Bulletin for the same type boat as what you've got? Look on the outside barrel for the pitch or remove the prop and look on the inside of the hub for the propeller 'size', then consult the charts and adjust the pitch accordingly.

Propeller Terminology

Pitch

Pitch is the distance (in inches) a particular prop would theoretically travel in one full revolution, as if traveling through a solid. A lower pitch will have better hole shot and "pushing power" but a lower top speed, while a higher pitch prop will provide less acceleration, but a greater potential for higher top speeds. The correct propeller will allow your engine to reach the upper portion of the WOT range specified by the manufacturer with a normal-to-heavy load (without exceeding it). Each inch of pitch is equal to approximately 150 +/- 50 RPM.

Diameter

Diameter means the total width of the "circle" at the blade tips as the propeller spins. A larger diameter pushes more water and reaches deeper into the water, so they're typically used on large, heavy boats or ones with high engine mounting heights. A smaller diameter is usually used on lighter weight boats, where the prop operates lower in the water or when a gain in engine RPM is desired.

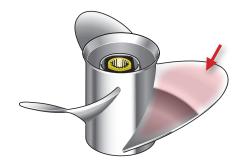

Number of Blades

Three-bladed propellers are the most common, offering good overall performance, top speed, and efficiency for most applications. Four blades characteristically provide increased acceleration, enhanced bow- and stern-lift, and reduced ventilation. However, four blades typically mean more drag on the engine, resulting in lower top speeds and different handling characteristics.

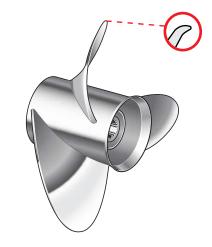

Blade Surface Area

Blade surface area refers to the total surface of the blades. The more blade surface area a prop has the more water it pushes, for better hole shot and increased planing efficiency. Too much can create significantly more drag, however, potentially restricting engine RPM and causing negative boat-handling issues.

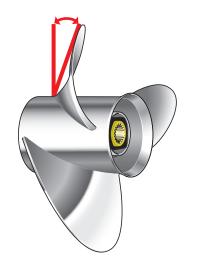

Blade Geometry

Blade geometry refers to the actual shape of the blade (or ear). By manipulating the blade's shape, diameter and pitch progression, different performance characteristics are created for each different type and style of propeller.

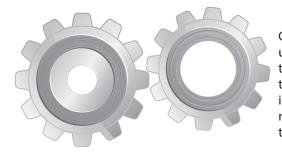

Cup

Cup is the small curved lip on the blade tip and/or trailing edge. Used in proper amounts, cup helps reduce ventilation and propeller slippage, allowing for higher mounting heights and greater bow lift. Too much cup, however, will cause excessive steering torque and bow lift and limit the engine's ability to develop and maintain proper RPM at a certain pitch.

Rake

Rake is the angle of the blades in relation to the propeller's barrel, or center, and is expressed in degrees. A high rake propeller is best suited for high engine mount applications by helping reduce ventilation and increasing bow lift. Too much rake, however, strains the engine, decreases hole shot and can produce negative performance and handling results. A propeller with a low rake angle will cause less strain on the engine, resulting in potentially better hole shot and higher WOT operating rpm.

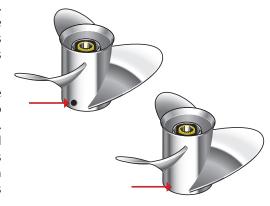

Gear Ratio

Gear ratio on a marine engine refers to the gears used in the lower unit, much like an automobile's transmission. The higher the ratio, the more pushing power the engine will produce. The lower the ratio, the more top speed the engine can potentially generate. It's important to choose a propeller that allows the engine to operate near the upper end of the manufacturer's recommended wide-open throttle (WOT) RPM under normal loads and conditions.

Ventilation

Ventilation is when air is drawn in around the propeller blades. Normally, this causes a gain in rpm, but a loss of speed, since the propeller blades are not biting clean water. This most usually occurs during hard cornering or in certain water conditions, such as following seas.

Controlled ventilation can be beneficial, though, in helping the engine gain rpm during hard acceleration. This is engineered into certain propellers, and is most-usually used on two stroke outboards. An example of this is the small holes in the side of the propeller barrel which allow exhaust to intentionally be drawn in around the blades at hole shot. This helps two stroke engines generate the higher rpm they need for proper hole shot performance. Four stroke engines typically don't need them.

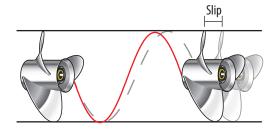

Cavitation

Cavitation occurs when pressure on the water across the blade's surface is reduced to the point of becoming water vapor, forming bubbles. If these bubbles burst, they can cause a cavitation burn which can deteriorate the propeller's surface and cause negative performance issues. As this condition can cause an increase in engine rpm, it's often confused with ventilation.

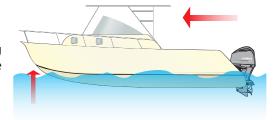

Slip

Slip is the amount of wasted energy a particular prop generates, meaning that the actual distance traveled in one full propeller revolution is less than its pitch measurement. It is normally expressed as a percentage of inefficiency. A certain amount of slip is engineered into each line of propellers to create different performance characteristics.

Hole Shot

"Hole shot" refers to rapid acceleration of the boat, from a standing rest or very slow speed until just on-plane. This is when the engine and the propeller work their hardest.

Propellers for Two Stroke 2-15, and Four Stroke F2.5-F20

Model	Series	Diameter	Pitch	Hub	Part Number**

Hubs for Turbo Propellers

Guardian SQ-Lok™ Hub System

A square hub is required for proper installation of Turbo® propellers. Turbo proudly recommends the Guardian SQ-Lok™ Hub System. Guardian SQ-Lok™ hubs are designed to take the punishing power and exhaust heat today's modern marine engines deliver. Unlike some other brands, they feature heavy-duty construction and a nylon center core (drive adaptor) with a molded-in interlocking brass spline insert for extra strength and durability. They're easy to install or replace, and come with the necessary hardware to help get you on the water fast. Demand tough. Demand convenient. Demand a Guardian SQ-Lok™ hub system.

Propeller Accessories

Prop Lock

Helps protect your propeller investment. Easy-to install and cost effective. Does not interfere with operation (i.e., motor can be used with a lock installed). Suitable for use on regular and counter rotating props. Fits 40 ~ 90

MAR-PROPL-CK-01

Propeller Cover

Constructed of 600D, solution-dyed polyester for durability and fade resistance

MAR-PROPB-AG-BK

Prop Wrench

Designed to fit the dimensions of your Yamaha V4 and V6 outboard prop nut. Has a 9/16-inch square opening on the reverse side to open garboard drain plugs.

MAR-PROPW-RN-CH

TRP Front Prop Wrench

Designed to fit both propeller nuts on the D150 and DX150 models. (Not shown)

65N-28161-00-00

SDS Spacers

Required for installing a SDS propeller on engines with non SDS propellers installed or equiped with non a SDS spacer in the engine crate.

> V8: 6AW-45997-10-00 V6: 6CE-45997-00-00 F150: 6CE-45997-00-00

Two Piece Thrust Washer:

Used in place of a standard thrust washer on most VZ and VF engines.

99999-03848-00

Why Yamaha Oil Filters?

Customers come to your dealership for the service they trust.

Why risk that on a aftermarket filtration element and cardboard filter ends? Yamaha oil filters are constructed with molded high quality media for long life and superior filtration.

Electric Oil Pump Strainer

Used on all HPDI engines between the engine oil tank and the electric oil pump.

68F-13440-00-00

Remote Oil Tank Filter

Remote oil tank filters are regularly missed during yearly service. Replacing the filter during the service can help prevent issues later down the road.

Remote Mounted Fuel Filters

10-Micron Fuel/Water Separating Filter

They are a primary line of defense against ethanol-related fuel system issues. Highly recommended for all two stroke and four stroke EFI outboards and two stroke HPDIs. Also excellent for carbureted engines. New, improved 10-micron filter provides superior filtration ahead of the engine's onboard filters and injectors. Large filtering and water capture areas maximize filtration while maintaining adequate flow rate for larger engines.

Assemblies

Assembly Stainless Steel Head MAR-SPRTR-HD-SS
Assembly Stainless Steel Head 3/8" Fittings MAR-SPRHD-38-SS
Assembly Aluminum Head MAR-SEPAR-AT-OR

Elements

Spin-On Filter Only *MAR-FUELF-IL-TR*Bulk pack of 12 *MAR-FUELF-LT-12*

Filter Heads

Aluminum Filter Head 12 Pack *MAR-FLTHD-AL-12*Stainless Steel Filter Head 12 Pack *MAR-FLTHD-SS-12*Stainless Steel Filter Head 3/8" Fittings 12 Pack *MAR-FHDSS-38-12*

mini-10™

Assembly Aluminum Head *MAR-MINIF-LT-AS*Spin-On Filter only *MAR-MINIF-IL-TR*

Yamaha Remote Filter

Assembly includes aluminum mounting head, spin-on element, metal bowl, and water sensor probe. Requires Yamaha Multifunction Fuel Management Gauge for water detection indication.

Assemblies

60 GPH with water sensor *MAR-24560-00-00*90 GPH with water sensor *MAR-24590-00-00*90 GPH clear bowl without water sensor *MAR-SEPAR-AC-LR**

Elements

4-Stroke Carburetor Repair Kits

F2.5 - 69M-W0093-00-00

Kit Includes:

Qty	Description	Part #
1	Gasket, Float Chamber	69M-14984-00-00
1	Float	69M-14385-00-00
1	Pin, Float	6A1-14386-00-00
1	Screw, Pan Head	98580-03006-00
1	Valve, Needle	6L2-14392-00-00
1	Screw	69M-14991-00-00
2	Screw, Pan Head	98580-04010-00
1	0-Ring	2T4-14397-00-00
1	Gasket	69M-14536-00-00
1	Valve	69M-24523-00-00
1	0-Ring	69M-24533-00-00
1	Screw, Lever Fitting	69M-24535-00-00

F4 (03~06/2008) - 67D-W0093-01-00

Kit Includes:

Qty	Description	Part #
1	Float	68T-14385-00-00
1	Pin, Float	67D-14386-00-00
1	Valve, Needle	67D-14546-00-00
1	Gasket, Float Chamber	67D-14984-00-00
1	Gasket	6J8-14995-00-00
2	Screw, With Washer	97980-04112-00
1	Gasket	67D-14536-00-00

F4 (~-02) - 67D-W0093-00-00

Kit Includes:

Qty	Description	Part #
1	Float	67D-14385-00-00
1	Pin, Float	67D-14386-00-00
1	Valve, Needle	67D-14546-00-00
1	Gasket, Float	67D-14984-00-00
1	Gasket	6J8-14995-00-00
2	Screw, With Washer	97980-04112-00
1	Gasket	67D-14536-00-00

F4, F6 (09/2009~) - 6BX-W0093-00-00

Kit Includes:

Qty	Description	Part #
1	Float	6BX-14985-00-00
1	Gasket, Float Chamber	6BX-14984-00-00
2	Screw	6BX-14592-00-00
2	0-Ring	4JH-14562-00-00
1	Valve, Needle	6BX-14546-00-00
1	Pin, Float Arm	6BX-14548-00-00
1	Clip	6BX-14937-00-00

F6 (04/2007~06/2008) F8, T8, F9.9, T9.9 (04/2007~) - 6AU-W0093-00-00

Kit Includes:

Qty	Description	Part #
2	Screw, With Washer	97980-04112-00
1	Float	6AU-14385-00-00
1	Pin, Float	67D-14386-00-00
1	Valve, Needle	68T-14546-00-00
1	Gasket, Float Chamber	6AU-14984-00-00
1	Gasket	6J8-14995-00-00
1	Gasket	67D-14536-00-00

F6, F8, T8 (~04/2006) - 68T-W0093-00-00

Kit Includes:

Qty	Description	Part#
1	Float	68T-14385-00-00
1	Pin, Float	67D-14386-00-00
1	Valve, Needle	68T-14546-00-00

Cam Roller

Cam rollers can wear over time. Stocking a few will help ensure your customers get the quick service they need. Used on most two strokes from 9.9 HP up.

Don't forget the WR No. 2 grease for the driveshaft splines when reinstalling the lower unit after water services.

WR No. 2 Grease

Provides water resistance, rust protection, lubrication and heat resistance. Specially designed for four stroke oil pump seals, drive shaft splines and drive shaft bushing area. For four stroke and two stroke applications.

Oil and Lubes POP Material

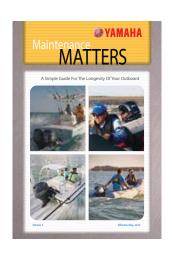

YAMALUBE® Marine Performance

There are many reasons you chose a Yamaha Outboard. Performance, Technology, Durability, and an enjoyable boating experience you can look forward to thanks to Yamaha's legendary reliability. Using Genuine Yamaha oils and maintenance parts along with a regular maintenance schedule can help your customers get the most out of their engines and their boating experience.

Yamaha offers a variety of material to help you convey the importance of proper maintenance and the advantage of Genuine Yamaha parts, most at little or no cost to you.

YAMALUBE® Counter Mats: *LIT-MRPCN-GM-AT*Ethanol Defense Brochures: *LIT-ETHDF-NS-12*Maintenance Matters Brochures: *LIT-MNTMT-RS-12*Yamaha Oil Bottle Display: *LUB-BOTTL-DS-PL*

Yamalube® 2M-Two Stroke for Outboards

NMMA® TC-W3®-Certified, 2M premium two stroke blend delivers superior lubrication and anti-wear/anti-rust protection for outboard engines operating in demanding marine environments. Provides the highest level of protection on the market. Semi-synthetic oil with an exclusive additive blend works to guard against ring stick and carbon build up, while special additives minimize wear. This oil is designed for the most grueling conditions two stroke outboards face. Whether it's extended full-throttle operation, engine- punishing "out of the hole" acceleration, or hour after hour of trolling, this oil can take it. With its extreme level of performance, Yamalube 2M offers the best everyday protection, too. Not recommended for WaveRunner® Personal Watercraft or Sport Boats.

Oils & Lubes

YAMALUBE 4M FC-W® Full Synthetic SAE 5W-30

Group IV fully synthetic oil offers our best outboard lubrication and performance, and it's FC-W[®] rated by the National Marine Manufacturers Association (NMMA®). Contains all of the benefits of mineral oil based Yamalube 4M, with increased lubricity for lower friction levels and potentially improved fuel economy. Specific marine additives help combat rust, corrosion, varnish, and wear; all while providing high levels of bearing protection, resistance to foaming, and lubrication.

Yamalube 4M FC-W® for Four Stroke Outboards

In order for an oil to be approved by the NMMA® to hold its highest rating for marine engine oils, FC-W® (Four Cycle – Water cooled) it must pass a multitude of tests. Passenger car oils don't pass these tests, which is why it's important to use NMMA®-Certified Yamalube 4M FC-W®. Automotive oils do not usually run at 6000 rpm. Yamaha Outboard engines were designed to run at full throttle (5500 to 6000 rpm) all day long. At this speed it is critical that engine oil not foam. Foaming reduces lubricity which can lead to wear and over time this can lead to failure. Yamalube 4M FC-W® has the best blend of anti-foam technology available.

15 Liter Oil Extractor

This extractor is designed to extract fluids from inaccessible or confined areas. It is ideal for oil changes. To measure how much you have extracted, each calibrated line on the wall is about one liter with a total capacity of 15 liters.

SBT-15LEX-TR-10

Flexible Oil Spout

This flexible, easy-pour spout helps with pouring engine oil from 1 gallon, 2.5 gallon and engine oil quart containers.

ACC-SPOUT-GA-LN

Ratio Rite®

Provides measures for 16:1-50:1 mixtures, and cc./oz./pt. for fills.

ABA-RATIO-RI-TE

Cable Luber

Lubricate control cables easily. Simply attach to control cable and spray lubricant (Lubezall) into cable luber.

ACC-111110-43-12

What's Good for the Environment Can Be Bad for Your Engine.

Ethanol-enriched (E-10) fuels help to improve air quality, which is why the federal government has mandated their increased use. However, unlike fuels of the past, E-10 fuels are known to absorb moisture, either from the air or from standing water in the bottoms of fuel tanks. They also generate corrosive sulfate salts that can attack metal components in a fuel system, clogging filters and resulting in other performance issues. Because of these known weaknesses, E-10 fuels require special care and treatment, whether your engine is in constant use or in storage. The Yamalube Care Products line includes formulations that help combat the potential harmful side-effects of E-10 fuels, ensuring high performance, lower ownership costs and a long life for your Yamaha.

Ring Free PLUS

Exclusive, synthetic PLUS formula provides superior deposit control; cleaning fuel injectors, carburetors, intake valves, intake ports and combustion chambers. Contains metal filmers to help protect fuel system components like silver solder, copper, aluminum and steel from the corrosive affects of ethanol sulfate salt.

32 oz. Bottle (Qty. 6*) *ACC-RNGFR-PL-32* 12 oz. Bottle (Qty. 12*) *ACC-RNGFR-PL-12*

Fuel Stabilizer & Conditioner PLUS

Strongly recommended for E-10 fuels, this alcohol-free formula helps prevent fuel oxidation and phase separation. Use continuously to help keep fuel fresh, potent and free from gum and varnish for up to one year of storage. Its metal filmers provide extensive protection for steel and aluminum components.

32 oz. Bottle (Qty. 6*) *ACC-FSTAB-PL-32* 12 oz. Bottle (Qty. 12*) *ACC-FSTAB-PL-12*

Grease

Molybdenum Disulfide

This extreme-pressure grease lubricates high loads at various speeds. Non-corrosive, it's water-resistant, exhibiting low-friction properties that protect against wear and galling in difficult operating conditions.

10 oz. Tube (Qty. 12*) ACC-MOLDM-GS-10

Marine Grease

Especially formulated to resist wash-off and extreme heat and pressure, and prevent corrosion and rust. (NLGI® 2) Lithium soap based.

10 oz. Tube (Qty. 12*) ACC-GREAS-10-CT

14 oz. Cartridge (Qty. 10*) ACC-GREAS-14-CT

Multi-Purpose Grease

Specially formulated to resist extreme pressure, water and corrosion. (NLGI® 2)

1 lb. Tub (Qty. 6*) ACC-MLTPR-GR-00

3 oz. Multi-Purpose Grease Gun

One-hand operation. Includes one multi-purpose grease cartridge.

ACC-GREAS-EG-UN

Uses 3 oz. Refill Cartridges ACC-GREAS-RE-FL

WR No. 2 Grease

Provides water resistance, rust protection, lubrication and heat resistance. Specially designed for four stroke oil pump seals, drive shaft splines and drive shaft bushing area. For four stroke and two stroke applications.

90790-74046-00

^{*} Ordered individually with a minimum order quantity

Power Trim & Tilt

Premium formula is nonfoaming and resists heat and pressure found in power trim, tilt and power steering systems for smooth operation. Meets Yamaha factory requirements.

> Quart Bottle (Qty. 12*) ACC-PWRTR-MF-32 10 oz. Tube (Qty. 12*) ACC-PWRTR-MF-10

Marine Lower Unit Gear Lube HD

Special formulation required for use in V8 F300-F350 V6 VMAX SHO® 200-250, and 4.2L Offshore gearcases. (Not recommended for use in any other Yamaha outboard.)

> Quart Bottle (Qty. 12*) ACC-GLUBE-HD-QT Gallon Bottles ACC-GLUBE-HD-GL 5 Gallon Pail ACC-GLUBE-HD-05

Yamabond® Adhesives

Yamabond® 4 Marine

This silicone-based liquid gasket fills gaps to prevent leaks. Pressure and oil resistant.

3 oz. Tube ACC-BOND4-MA-00

Yamabond® 5

Coat mechanical joints with this liquid gasket before assembly to prevent leaks.

2.5 oz. Tube ACC-YAMAB-ON-D5

Yamabond® 6B

Has high viscosity and excellent swelling, and works effectively for joint surfaces that have a larger clearance.

3.5 oz. Tube ACC-YAMAB-ND-6B

Yamabond® 7

High-strength, synthetic rubber adhesive formulated for grips, throttle pipes and lever handles, without damaging rubber.

10 gram Tube ACC-YAMAB-ON-D7

Yamabond® 14

Yamabond 14 is a solventbased thread lock. Vibration and impact-resistant, it locks screws, bolts and threaded fasteners. Works great with plastic and metal.

200 grams ACC-YAMAB-ON-14

Yamabond 1386

Used for camshaft caps on four stroke outboard engines.

15 ml Bottle ACC-YAMBD-13-86

Loctite®

668™ 19 GM

Extreme application anaerobic retaining adhesive. (Can use in place of Loctite ® 648™ Threadlocker)

ACC-QKSTX-66-80

Loctite® Gasket Maker™

Gasket Maker™ is a non-corrosive, anaerobic sealer designed primarily for use on aluminum, iron and steel flanged mating surfaces. (S518) 50 ml Tube

ACC-LCTE5-18-31

248™ MD 9 GM

Medium strength anaerobic threadlocking material. (Can use in place of Loctite® 242™ Threadlocker)

ACC-QKSTX-24-80

268™ HI 9 GM

High strength anaerobic, thixotropic, thread-locking material. (Can use in place of Loctite® 271™ Threadlocker)

ACC-QKSTX-26-80

561™ PST® 19 GM

A single-component, high-viscosity, low strength, acrylic thread-locking adhesive. (Can use in place of Loctite® 567™ PST® Sealant)

ACC-QKSTX-56-10

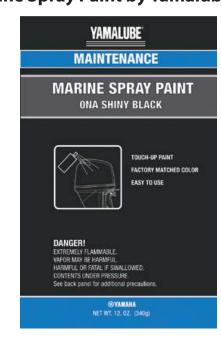

Marine Spray Paint by Yamalube

Marine Spray Paint by Yamalube

A high-quality, factory-matched spray paint for touch-ups or full overcoat application. This durable enamel coating will provide good performance in the rigors of the marine environment. For the best results with any surface that needs to be painted, surface preparation is very important. Note that paint may fade over time on an outboard motor exposed to the elements over time, so the factory-fresh color supplied in this can may not match older paint exactly. Therefore, the application area may need to be larger to provide for proper feathering and blending of the colors.

Yamaha Internal Engine Cleaner

For dealer purchase only. The best product offered by Yamaha for carbon removal. Ordered by case, 1 on order equals 6 bottles.

Quart bottle (Qty. 6*) ACC-CLEAN-D1-00

Carburetor Cleaner Dip

Use this concentrated solution with water as a dip for cleaning metal that has been varnished by old gasoline. Also removes dirt, grime and gum.

Quart Bottle (Qty. 12*) ACC-CARBC-LE-NR

EFI Engine Storage Fogging Oil

Equally distributes fogging oil to cylinders in EFI engines with single-throttle bodies, protecting pistons, cylinder walls and valves from moisture, salt water and combustion acids for up to 1 year of storage.

Quart Bottle (Qty. 6*) ACC-STORR-IT-32

Stor-Rite Engine Fogging Oil

Lubricates and protects internal engine components. Critical for proper winterization and during extended storage periods.

12 oz. Can (Qty. 12*) ACC-STORE-RI-TE

Combustion Chamber Cleaner

Use to remove carbon and other contaminants from cylinders, pistons, rings and valves. A great inclusion into your seasonal maintenance. Clean engines last longer.

13 oz. Can (Qty. 12*) ACC-CMBSN-CL-NR

LubezAll

This popular lube is back and completely reformulated. Now an aerosol synthetic grease with PTBE, it's a high quality multipurpose lubricant.

11 oz. Can (Qty. 12*) ACC-LUBZA-LL-00

Brake & Contact Cleaner

Use this product to clean off brake dust from critical brake components and quickly clean parts leaving them residue free.

13 oz. Can (Qty. 12*) ACC-BRKCT-12-00

Battery Terminal Cleaner & Protector

This strong water-based cleaner with acid-alkali indicator removes corrosive build-up on battery terminal posts to help increase power output and extend battery life. Simply rinses off with water and leaves terminals coated with a residual protective film.

13 oz. Can (Qty. 12*) ACC-BATTC-LN-PR

^{*} Ordered individually with a minimum order quantity

Components

External Engine Cleaner

Powerful engine degreaser and engine cleaner powers off grease, mud and grime. Safe on most rubber, plastic and painted metal surfaces.

15 oz. Can (Qty. 12*) ACC-ENGCL-NR-00

Yamashield™

Designed to create a non-conductive shield on surfaces that are exposed to the elements. This shield will reduce the effects of moisture on metal components and electrical connections. (Replaces Boeshield T-9® Protectant and Lubricant ACC-T9SPR-AY-00)

13 oz. Can (Qty. 12*) *ACC-YAMSH-LD-00*

Precision Parts Cleaner

Designed to meet all the demands of a fast-drying, powerful cleaner. Formulated to remove oil, grease, and other contaminants. Quickly and easily cleans engine parts, internal and external components, ignitions, electrical components, spark plugs, or any use where a fast-drying cleaner that leaves no residue is needed.

12.5 oz. Can (Qty. 12*) ACC-PPCPT-CL-NR

Silicone Spray Protectant & Lubricant

General-purpose lubricant that helps to protect metals against rust and corrosion. Conditions and protects neoprene, rubber and other surfaces from environmental effects.

11 oz. Can (Qty. 12*) ACC-SLCNS-PR-AY

Hand Cleaner

This hand cleaner powers through dirt, grease, and grime to give your hands a smooth clean feeling. Also available in a one-gallon bottle, for use with our wall mounted dispenser.

Metric Tool Kit

This handy metric tool kit contains the following: combo wrenches (8, 10, 12 and 14mm), 8" adjustable wrench, locking wrench, 4-way Phillips/standard screw driver, Allen wrenches (#3, #4, #5 and #6), spark plug wrench, spark plug gap gauge, black electrical tape, WD-40°, tire pressure gauge, zip ties, wire, rag and a handy zippered storage case.

ABA-METRC-00-00

DMX™ Fanny Pack Tool Kit by CruzTOOLS®

This is the ultimate off-road tool kit. Complementing the long list of tools and other items is a stout and functional pouch using a super-tough 5040 denier nylon shell, top grade hardware and zippers, plenty of storage including a unique mesh cash and document pocket and key clip. The large assortment of tools was selected specifically for trail use. With the DMX[™], you're ready to roll!

ACC-0SS58-40-64

RoadTech™ M3 Metric Cruiser Tool Kit by CruzTOOLS®

The RoadTech™ M3 is aimed at cruisers but it's equally at home on touring bikes, sport bikes, standards and quads. Put this in your fork bag, tank bag, or saddlebag and you'll be ready for just about anything the road will throw at you. The comprehensive tool set comes in a convenient roll-up pouch and includes mini ratchet and sockets, combination wrenches, locking pliers, adjustable wrench, 6-in-1 screwdriver, LED flashlight, tire gauge, hex keys, and much more!

ACC-0SS58-40-65

Wrench Set

This high-quality wrench set is precision-crafted from special alloy steel for strength and finished in a polished nickel-chrome for corrosion resistance and a distinctive look. Five-piece set includes 8, 10, 12, 14 and 17mm combination wrenches and a convenient tool bag. Set carries the Yamaha lifetime warranty.

DBY-ACC58-41-52

Pliers Set

This three-piece set includes side cutters, needle nose, and standard pliers. Each tool is built with control, comfort, power, and durability in mind. Cold forged from special alloy steel for increased strength from top to bottom. Features include contoured handles with comfortable grips that give you the leverage you need, joints that are positioned close to the cutting edge, making it easier to cut heavy wire with less fatigue, and tapered blades that give you more power around the joint and more control at the tip. Set carries the Yamaha lifetime limited warranty.

Grip Nose Pliers

These pliers are a great addition to every toolbox. The unique monster-like teeth on the end of the jaws are shaped to grip damaged screw heads for easy removal. It is also ideal for gripping the back side of the rivets to prevent spinning when drilling them out. The rubberized grips are comfortable and cold forged jaws mean these pliers are built to last.

MTS-TLSKT-01-07

PowerDrive™ Sliding T-Driver with 8-Piece Socket Set by CruzTOOLS®

The PowerDrive™ Sliding T-handle set Includes a 3/8" tip driver, 8, 10, 12, 14, and 17mm sockets, 5 and 6mm hex bits and a #2 Phillips screwdriver bit. A socket clip that attaches to the driver keeps the sockets in order and a rugged vinyl pouch keeps the tools protected.

ACC-0SS58-40-67

3/8" Drive Metric Hex Bit Socket Set by CruzTOOLS®

The CruzTOOLS® metric hex socket bit set handles virtually all of the hex needs for powersport vehicles. The set includes a rail with handle to ensure sockets remain organized no matter where you are. Sizes are shown in a "reverse" laser imprint for easy identification. The eight piece socket set includes all the sizes you'll need ranging from 2.5mm through 12mm.

ACC-0SS58-40-63

Outback'r M14™ Metric Multi-Tool by CruzTOOLS®

Function, space, and value converge in this nifty unit! You'll get 14 tools - four hex keys (3, 4, 5, and 6mm), two screwdrivers, a socket driver with 8, 10, and 12mm sockets, 13 and 14mm open-end wrenches, and three spoke wrenches – all in a nine ounce unit that's only 3.5" long. Except for the sockets, there are no loose pieces to put together for operation and at only 3.5" long it is very compact.

ACC-0SS58-40-66

T-Handle Allen Set

Allen T-handle set comes with 2.5, 3, 4, 5, and 6mm sizes. Also comes with a vinyl carrying pouch.

ABA-THNDL-AL-ST

Screwdriver Set

All of the screwdrivers in this five-piece set are made of heat-treated alloy steel to prevent chipping and rounding of the tips. The bi-mold rubberized grips are comfortable and allow you to maximize torque. Set includes two flathead and three Phillips tip screwdrivers. Set carries the Yamaha lifetime warranty.

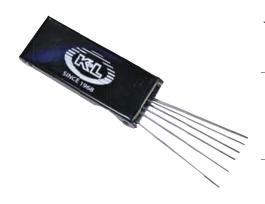

DBY-ACC58-41-51

Jet Cleaning Tool

These precisely machined rods are sized to allow you to clean out carburetor jets without causing damage. A very handy tool for regular carburetor maintenance.

MTS-TLSKT-04-03

Oil Filter Wrench

This stamped steel, chrome plated filter wrench makes removing oil filters a breeze. Simply place the wrench over the end of the filter and turn it using either a 3/8" ratchet or 17mm wrench. Two sizes will cover all of your Yamaha spin-on style filters. For 3FV and 5GH Yamaha Oil Filters

MTS-TLSKT-02-09

Yamaha Roll Cart

This handy roll cart lets you move easily around your bike while you are putting on your Yamaha accessories. Conveniently holds your tools while you work.

The only silicone based wipes in the market, they shine tires for that showroomnew look. Use on plastic to help restore that luster. Not for use on tire treads.

(Qty. 1*) ACC-YAMAS-HN-00

Windshield and Visor Cleaner

A special cleaner/polish for all smooth plastic surfaces like windshields. This product is able to dissolve oils, grease, and insect matter from windscreens. Leaves a super slick surface. 8 oz. Bottle

(Qty. 10*) ACC-PLASP-OL-11

^{*} Ordered individually with a minimum order quantity

Yamaclean® Carpet Cleaner

Gently foams away soil, oil, and grease from vinyl, fabric, and carpet. Treat problem areas or the entire carpet. Spot cleaning should not leave rings on fabric.

12 oz. Can (Qty. 12*) ACC-YAMAC-CT-CR

Spray Polish

This quick detailer will restore a lustrous shine to paint, chrome, glass and smooth plastics like visors, windshields, and gauges. Gives textured plastics, rubber and vinyl a beautiful satin finish. Anti-static properties repel dust and dirt to keep that shine.

14 oz. Can (Qty. 12*) ACC-SPRAY-PL-SH

Yamaclean® Vinyl Dressing

This one-step formula restores and protects vinyl, rubber, plastics and leather. When dry, it leaves a transparent and water repellent gloss coating that isn't slippery. Its UV protection also helps to prevent drying and cracking.

32 oz. Bottle (Qty. 12*) ACC-YAMAC-VN-DR

VAMALUSE SENTIAL SE

Detailing & Trailer Supplies

Yamaclean® Ammoniated Glass Cleaner

This streak-free formula cleans grease, dirt, and water spots on glass, mirrors, and many other hard, washable surfaces. The aerosol spray allows for quick application.

16 oz. Can (Qty. 12*) ACC-YAMAC-GL-CR

Yamaclean® Spray Wax

Forms a slick, shiny polymer barrier that causes water to bead on contact. It also reduces the ability of dirt and grime to adhere to the surface, helping to maintain the shine.

12 oz. Can (Qty. 12*) ACC-YAMAC-SP-WX

Yamaclean® Pro-Wash Spray

Yamaclean Pro-Wash Spray is a biodegradable vehicle spray wash that removes grime and soil. Rinses clean and helps keep your boat looking new.

32 oz. Bottle (Qty. 12*) ACC-YAMAC-PW-SP

Yamaclean® Wash & Wax Concentrate

Concentrated Yamalube Wash & Wax is a premium, high sudsing wash-and-wax formula. Its superior cleaning and rinsing properties minimize streaking and spotting to leave a super-bright, clear shine.

16 oz. Bottle (Qty. 12*) ACC-YAMAC-WH-WX

Yamaclean® Deodorizer

This deep penetrating, fast acting deodorizer leaves areas of your boat clean and fresh. Eliminates odors on fabrics, carpets, and upholstery including stale smoke rather than covering them up. Also reduces allergens from pets and dust mites.

32 oz. Bottle (Qty. 12*) ACC-YAMAC-DE-ZR

Yamaclean® Bilge Cleaner

Effortlessly dissolves oil, grease, gasoline, and sludge, removing odor causing elements without scrubbing. Safe for fiberglass, wood, and metal boats and requires no scrubbing.

32 oz. Bottle (Qty. 12*) ACC-YAMAC-BG-CL

* Ordered individually with a minimum order quantity

Yamaclean® All Purpose Cleaner

Removes most grease, oil, blood, mildew, soap scum, bird and spider droppings, scuff marks, pet stains, dust, pollen, fingerprints, food/beverages, sea salt residue and more, leaving surfaces clean for optimum brilliance.

32 oz. Bottle (Qty. 12*) ACC-YAMAC-AP-CL

Yamaclean® Hull Cleaner

Formulated specifically to remove light corrosion, dirt, and grease from fiberglass boat hulls. Its combination of modern surfactants and builders effortlessly remove most water stains, algae, mold, rust stains, oil, scum lines and light oxidation.

32 oz. Bottle (Qty. 12*) ACC-YAMAC-HL-CL

Simichrome® Polish

Polishing paste for chrome, aluminum, silver, brass or any metal.

1.76 oz. Tube (Qty. 6*) ACC-11000-19-01

Sticker-OFF!™

This product removes tough-to-get-off residues, particularly the ones left by sticker adhesives. 2 oz. Bottle (Qty. 6*) *ACC-STICK-OF-11*

Sticker-ON!™

Decals are easy to apply with Sticker- $On^{\mathbb{M}}$ application spray. Sticker- $On^{\mathbb{M}}$ lets you position decals before they permanently adhere to the surface of the unit. Dries quickly, too.

Led Trailer Light Kit

Upgrade your standard incandescent trailer lights with these waterproof LED lights. Includes four sonically sealed mini LED amber marker lights (designed to use the standard 2-prong plug), a stainless steel identification light bar with three sonically sealed red LEDs, plus two red Aero Pro LED taillights with all weather molded plastic housings and durable lenses. Taillights include stop, turn, tail, rear clearance, rear reflex, side marker, as well as side reflex stop functions, and the driver's side also includes a license plate illuminator. Designed to use existing trailer wiring. Includes four 3M™ Scotchlok® connectors and a butt connector. Installation instructions included.

SBT-TRLRL-ED-09

Speedy-Hitch Camera System™

Speedy-Hitch camera makes backing up a trailer safe and hassle free. With Speedy-Hitch wireless camera, hitching a trailer becomes a one-person task. Line up ball and hitch perfectly every time. Now you can easily see what's behind you when backing your truck, auto, or trailer. This portable camera can be used for marine, motorcycles, RVs, snowmobiles, SUVs, ATVs, and camper trailers. Speedy-Hitch Camera is great for reversing trailers into tight storage places. For even easier backing of a trailer use the "Reverse Image" button on the monitor. When you press the reverse image button the image you see in the monitor is now reversed. This can make backing easier because what direction you turn the steering wheel is the direction the trailer goes. Speedy Hitch camera works day and night with infrared technology. Installation requires no wiring because it is wireless. Both the camera and monitor include rechargeable batteries. The camera has a magnetic mount so no screws or fasteners are necessary. Stick it to your bumper, tailgate, or on the trailer itself. Remove when finished and store in carrying bag. The monitor features full color LCD 960 x 240 image. Two rechargeable lithium batteries, carrying bag and 12-volt charger are included. SBT-HITCH-CA-M0

Stainless 1/2"-5/8" Sleeved Barbell Lock

Master Lock® stainless steel barbell style receiver lock offers high security and a product that can withstand the elements. The barbell receiver lock has hardened receiver pins for increased sheer strength and a precision 4-pin tumbler locking mechanism resists picking. The stainless steel locking head with a covered key way offers ultimate corrosion resistance and protection from moisture, dirt, and grime. Fits 1/2" and 5/8" receiver holes.

(Qty. 4*) MSL-1480D-AT-10

Stainless 5/8" Extended Length Receiver Lock, 3-1/8"

Master Lock® Stainless Steel barbell style receiver lock features a Swivel Head™ design f or easy access when locking and unlocking. This lock also has an extended length shackle (3-1/8" wide) that fits wider receivers for late model trucks including Ford® F-350®, Toyota® Tundra®, GM® Silverado®, Sierra®, and trucks equipped with HD towing packages. The barbell receiver lock has hardened receiver pins for increased sheer strength and a precision 4-pin tumbler locking mechanism resists picking. The stainless steel locking head with a covered keyway offers ultimate corrosion resistance and protection from moisture, dirt, and grime. Fits 5/8" receiver holes.

(Qt y. 4*) MSL-1469D-AT-10

Stainless Adjustable Coupler Lock

Master Lock® Adjustable Trailer Coupler lock for latch- style couplers prevents tow away theft and keeps coupler latch secure while towing. The stainless steel lock and shackle, and covered keyway prevent rust and corrosion. Shackle adjusts to fit coupler latch widths of 5/8" (most standard couplers), 1", and 2".

(Qty. 4*) MSL-2847D-AT-10

Chrome Swivel 1/2"~5/8" Sleeved Bent Pin Lock

Master Lock® bent pin receiver lock features a Swivel Head™ design for easy access when locking and unlocking. Yamaha Deluxe 2-Foot Transom Ties

Quality transom tie downs with an attractive price. Similar to what is supplied from the factory on Yamaha boats, these transom ties are made of 2" wide, weather-resistant polypropylene webbing with heavy-gauge, zinc-plated hardware and rubber coated "J" hooks to protect the transom of your boat. Oversized handle makes for easy locking and unlocking. Sewnon hook-and-loop fasteners help secure the loose end of the strapping. Excellent for securing your Boat to the trailer at an affordable price. Sold in pairs.

SBT-TRNSM-TD-08

Yamaha Cam Buckle Tie Downs

1" x 6' tie downs with 1" cam lock buckle. Straps are rated for 400 lb. working and 1200 lb. break strength. (Sold in pairs.)

Black *ACC-0SS58-40-27*Blue *ACC-0SS58-40-28*

Yamaha Ratcheting Tie Downs

1" x 6' tie downs with 1" rubber handle ratchet. Straps are rated for 400 lb. working and 1200 lb. break strength. (Sold in pairs.)

Black *ACC-0SS58-40-29*Blue *ACC-0SS58-40-30*

3000 lb. Retractable Bolt-On Transom Tie Downs (2" x 4')

Erickson's new retractable ratchet solves the problem of excessive webbing. With this innovative tie down, only the webbing needed to secure the load is unrolled from the spring-loaded compartment. Once installed, the strap is then tightened like a normal ratchet. When not in use a strong return spring rolls the webbing up, similar to a seat belt or tape measure. Storage is so simple - no more piles of straps and webbing.

SBT-STERN-RS-11

Tie Down Extensions

Tie down extensions help to secure tie downs. Sold in pairs.

Short (9"), Black with White Yamaha lettering *ABA-EXTEN-KT-YZ*Long (15¾"), Solid Black *ABA-TDEXT-EN-00*

Boat Sand Stake Kit

If you would like to anchor your Yamaha boat on a sandy beach, simply screw the stake into the sand, remove the handle, and attach the 25 feet of heavy-duty rope. A storage bag is also provided.

MAR-SANDS-TK-KT

Yamaha Heavy-Duty Boat Anchor Kit

This anchor kit is specifically designed with the larger boats in mind. This kit includes an 11-lb., vinyl-coated anchor and chain which helps prevent corrosion as well as scratched hulls. A 100-foot rope with a snap hook is included along with a convenient storage bag.

MAR-ANCHR-KT-00

Complete Folding Grapnel Anchor Kit

This complete anchor system is in a class by itself. The 3-1/3 pound 4-fluke folding anchor will hold in mud, sand, gravel, and rock. It's designed for temporary mooring of small boats, sailboats, personal watercraft, inflatable boats, canoes, and float tubes. The anchor is coated to protect finishes. The durable nylon storage case is padded for added protection and to dampen noise while the anchor is stowed. Fits under most boat seats. The 25 ft. long marine-grade rope, with an in-line buoy, is spliced to the anchor and a heavy-duty stainless steel snap hook.

Wrap It Up!™ Rope Wraps, 3 Pack

We've all struggled with organizing extension cords, hoses, and wires. People with boat slips know the challenges of managing utility cords. WRAP IT UP!™ to the rescue! You'll find 100's of uses for these 12" long hook and loop wraps. The hook and loop fasteners are sewn to durable 12" x 1" webbing and reinforced with a bar tack at each end. A cord is sewn onto WRAP IT UP!™ for hanging items from peg hooks.

Set of 3 SBT-WR123-00-09

1~2 Rider Tube Tow Rope

This tube tow rope has two sections, giving you the option to be either 50 or 60 feet behind the boat depending on wake and water conditions. The prestretched, UV-resistant 7/16" diameter 16-strand rope exceeds the 2375 lb. break strength required by the WSIA f or 2-rider tubes. A rope keeper is included for convenient storage.

Blue *MAR-TUBER-OP-06* Red *SBT-TUBER-OP-10*

Airhead® 2 Rider 2-Section Tube Rope

This tube tow rope has 2 sections, giving the option to tow the tube either 50 or 60 feet behind the boat depending on wake and water conditions. The prestretched UV-resistant 7/16 inch diameter 16-strand rope exceeds the 2375 pound break strength required by the WSIA for 2-rider tubes. A rope keeper is included for convenient storage.

SBT-AHTR2-20-00

Airhead® Deluxe 4- Rider Tube Tow Rope

This heavy-duty 16-strand 9/16 inch x 60 foot tube tow rope is rated at 4150 pounds tensile strength! Engineered to pull the big 3 and 4-rider tubes, this rope will stand the test of time. It has a unique Rasta color scheme with a 6-inch loop spliced at each end. A rope keeper is included for tangle free storage.

Tubes

Airhead® Viper™ 3-Person Cockpit Tube

Cockpit-style towable. Bottom is shaped like a boat hull for a great ride. Viper™ is especially popular with children who can sit comfortably on the inflated floors inside the cockpits. 30-gauge bladders are completely encased in durable double-stitched nylon. No exposed PVC. Striped nylon wrap handles have neoprene knuckle guards for comfort. EVA "Indy Cap" covers the Boston valve.

Red/Black/White. SBT-AHVIF-30-09

Fiji Float™ Water Lounge Chair

Stay cool floating in a pool or lake, sitting on the comfortable mesh seat of the Airhead® Fiji Float™. Tether it to your boat or tie two or more Fiji Floats™ together using the side mounted rope anchors.

SBT-AHFF1-00-09

Airhead® Aruba Lounge™

The Airhead® Aruba Lounge™ is a comfortable pool and lake lounge with a mesh panel between the pillows at each end. Lie down and stay cool suspended in the water by the comfortable mesh panel. Your drink will be close at hand in the molded drink holder.

SBT-AHAL1-00-09

Airhead® Bimini™ Lounger II

Relax on the water in comfort with Airhead®'s newly improved Bimini™ Lounger II. There are only 3 air chambers to inflate, not 6 or 7 like the other brands! Float with your legs dangling in the water, or stretch them out on the folding inflatable leg rest. There's a cup holder for your cool drink and a zippered storage compartment for sun tan lotion and other necessities. The inflatable backrest ensures unparalleled comfort. Durable nylon construction with a heavy-gauge PVC bladder inside. 38" x 60" (deflated with leg rest extended).

SBT-AHBL3-00-10

Yamaha Torpedo Tube

Climb on, hang on and have some serious fun! The Yamaha Torpedo Tube is built to last; the 30-gauge PVC bladder is completely covered in double stitched 840D nylon, with no exposed vinyl. It has two deluxe handles with neoprene knuckle guards and seat pads. The Boston valve is easily accessible, for quick inflating and deflating. Size: 76" long x 44" wide. Designed for 1 or 2 riders up to a total of 340 lb.

SBT-TOR PE-DO-11

Yamaha U-Shaped Tube

Carve turns with a tube? With this steerable, 1-rider tube, simply lean in the direction you want to turn and pull on the opposite handle. The plastic fins sewn onto the side of the cover do the carving. It is so much fun that you'll want to ride it all day long! You just might be able to, since it's so easy to reboard with the open back design, a feature that little ones and tired adults really appreciate. Tube is fully covered with rugged 840D, double-stitched nylon cover, making it torsionally rigid to respond to rider's commands. Tube is 48" x 50" and equipped with four deluxe nylon-covered handles with neoprene knuckle guards. Designed for 1 rider up to 170 lb.

SBT-USHAP-ED-11

Airhead® U-Lounge™

Connect 2, 3, 4 or more U-Lounge™ together for a lake or pool party! You and your friends will stay cool, no matter how hot the weather, floating in the comfortable mesh seat. Keep a cool drink close at hand in the molded cup holder. Quality built from heavy gauge PVC. Dimensions: 44" x 32" x 12" Yellow/Red.

SBT-AHUL1-P0-10

Airhead® Matrix™ 3-Person Tube

The Airhead® Matrix™ V-3 tube offers fast and fun action on the water. When riders shift their weight to the sides it responds instantly, rolling way up the edge and cutting across the wake. It includes 6 deluxe handles with EVA-molded knuckle guards for a sure grip and 2 oversized neoprene pads that help protect knees and elbows. Designed for 3 riders.

Airhead® Storm II™

Airhead® Storm II™ is truly a state of the art towable. No other 2 rider towable provide this unparalleled combination of excitement, stability and comfort. Storm's™ wide wingspan and thick front profile allow it to glide effortlessly across big wakes. A neoprene seat pad is provided for each rider. Nylon wrapped handles with neoprene knuckle guards ensure a great grip. The durable RF welded 30 gauge PVC bladder is fully covered by rugged double-stitched 840 denier nylon. When it's time to relax, STORM II™ doubles as the world's most comfortable floating lake couch! 86" x 75" (deflated).

SBT-AHST2-00-10

Airhead® Cool Island™

The Airhead® Cool Island™ is the perfect place to chill out or party with friends. You can choose between tanning the roomy sun deck or cooling with a splash in the mesh area. Four drink holders and a sundry holder for storing suntan lotion and other small items are conveniently located between the wet and dry areas. The boarding platform makes it easy to climb onto, even from deep water. Three handles attached to the sides make for easy carrying and anchoring. Designed for up to 6 adults.

SBT-AHCI1-00-09

Airhead® Hot Shot™

Come on hot shot, show us what you've got! If you like air time, you won't be disappointed! Hot Shot™, Airhead®'s 57 in. (deflated) round deck tube is one hot ride, built to last and a great value. The rugged PVC bladder is completely covered with a double-stitched nylon cover. The thin profile makes it easy to climb onto from the water. Hot Shot™ has 4 deluxe handles with neoprene knuckle guards and is equipped with a Boston valve for quick inflating and deflating.

SBT-AHHS1-00-10

Airhead® Slice®

You'll really slice up the water with this 58 in. diameter (deflated) low profile towable! Peak performance is guaranteed with Slice's topside neoprene panel, 4 nylon-wrapped handles and neoprene knuckle guards. The durable 30-gauge virgin PVC bladder is fully encased by a double-stitched nylon cover with a reinforced internal tow harness. Slice™ is equipped with a super-convenient Kwik-Connect™ for easy hook-ups and a Boston valve for fast inflating and deflating. It's easy to climb onto SLICE™ from the water; it's tapered to only 6" high at the back. Designed for 1 or 2 riders.

SBT-AHSL4-W0-10

Airhead® Rebel™ Tube Kit

Just about everything you'll need for a super fun day on the water is in the box! Rebel™ is a 1 rider, 54 inch diameter deck tube with four deluxe handles and neoprene knuckle guards. It's equipped with a Boston valve for your inflating and deflating convenience. The heavy gauge PVC bladder is fully covered by rugged double stitched nylon. Features include a triple reinforced tow harness, drain vents and boarding straps. Airhead's® best portable 12-volt pump is included and will inflate Rebel™ quickly and effectively. A color-matched 16 strand tube tow rope is also included.

SBT-AHRE1-00-10

Airhead® Blast® Donut Tube

You'll have a real blast on Airhead® Blast®! The four neoprene knuckle guards and deluxe nylon covered handles provide a sure and comfortable grip. The heavy duty virgin PVC bladder has electronically welded seams and a Boston valve for quick inflating and deflating. Blast® has a double-stitched nylon cover, reinforced internal tow harness, and a self-draining floor vent. You'll love the eye catching graphics on this 1 rider 54" round towable!

SBT-AHBL1-00-09

Airhead® Super Slice®

Airhead's™ high performance rider low profile deck tube, will take your breath away! It's got an oversized topside neoprene body panel and 6 deluxe handles with neoprene knuckle guards, an Airhead® exclusive. The 30-gauge virgin PVC bladder is fully encased by a rugged double-stitched nylon cover. Super Slice™ is equipped with a heavy duty Kwik-Connect™ and Boston valve for the ultimate in convenience. It's tapered in back to only 6 inches, for easy boarding from the water. 70" diameter (deflated size).

Airhead® Combo Water Ski

Perfect for skiers who need a stable ride and want to advance their skills, AIRHEAD's® combo water skis are a great value for the recreational water skiing family. These 67" rim molded combo water skis are designed to accommodate many different skill levels. The tunnel shaped bottom, wide tails and mild rocker provide easier starts, smooth turns, and better stability. The durable composite construction and fiber glass reinforced nylon fins ensure years of service. Dual density slide-type adjustable bindings fit adult siz es 5~12.

SBT-AHS12-00-10

Airhead® St-150 Trainer Water Skis

These 48" wood trainers make learning to ski fun for beginners less than 100 lb. The double handle rope assembly, removable crossbar and ties at the tail make it easy to start and control. The adjustable bindings fit child size 12 to adult size 5. Fiberglass reinforced nylon rudders increase stability and tracking.

SBT-AHST1-50-10

Airhead® U-Ski™

Kids have fun and ski with confidence from the get go with AIRHEAD's® U-SKI™ U-shaped trainer. They take to it like a duck to water! It's really easy for kids to get up on and very sturdy, even at idle speeds. It's like a cross between a sled and trainer skis, made of durable bamboo. Kids love the fun graphics, the easy-to-grip handle, and most importantly, the gentle ride.

SBT-AHUS1-00-10

Yamaha Kneeboard

This Yamaha kneeboard is light weight, stable, and responsive. Its traditional V-shape design provides fast responses, smooth fluid turns, and big air off the wake. The contoured EVA kneepad has deep knee wells and reinforced toe areas. The 3" wide adjustable strap is cushioned for comfort.

SBT-KNEEB-RD-10

Airhead® Magma™ Kneeboard

You'll love the easy rail-to-rail transitions, consistent arc though turns and effortless spins! MAGMA™ has massive rocker, beveled edges and a unique bottom shape for a smooth, fluid, forgiving ride. Great for all riding levels. Features the AIRHEAD's® EZ UP Hook for effortless starts and easier access to the rope handle.

SBT-AHKB2-00-10

Yamaha Wakeboards by Hyperlite®

The State Series is a shape that you don't have to learn how to ride, it will perform comfortably for all ability levels and styles. The State is shaped differently from edge to edge, helping the rider compensate for the awkwardness of edging , jumping , and landing on a toe-side edge. Our subtle 3-stage rocker provides a great pop off the wake while maintaining a smooth carve. The State is a great board for both riders getting into the sport or those who are looking for advancement in their skills. Wakeboard comes with Hyperlite's® Remix Binding. Yamaha graphics on both sides of boards.

12-Volt Air Pump

This high-volume (290 liters/minute) 12-volt portable air pump inflates and deflates towables, boats, pools, mattresses, and beach toys quickly and effectively. Most pumps on the market don't put out this kind of air pressure and volume (9.6 cu. f t./min. 0.8 psi). The universal valve fittings fit all popular valves. For added convenience, the cigarette lighter/12-volt power port plug is equipped with a 10' long power cord.

MAR-12VPU-MP-06

Airhead® 120 Volt Hi-Pressure Air Pump

A Pressure Release Valve is included to limit pressure to 1.4 psi for preventing over-inflating towables, pool toys and other vinyl and nylon c overed inflatable items. Four universal valve fittings fit all popular valves and lock onto the hose. For added convenience, there's a carry handle and a 10' long power cord. Draws 6.1 amps /730 watts. Volume is 460 liters/minute.

SBT-AHP12-0H-10

Airhead® High Pressure 12V Inflatable Pump

The AIRHEAD® High Pressure 12-Volt Air Pump is the perfect pump for inflating your towables while out on your boat , or any where that you don't have 110v current. AIRHEAD's® new 12-Volt High Pressure Air Pump with Pressure Release Valve produces three times the pressure of other 12-volt air pumps. Adapters are provided for all popular valves including s tem, Boston, Leafield, Bravo, Halkey-Roberts®, and more. A removable pressure-release valve limits the output to 1.4 psi, the perfect inflation pressure for towables. Hook this powerful pump directly to your car, truck, or boat battery with the alligator clips connected to a 10' power cord – it draws too many amps to plug into a cigarette lighter. Volume: 410 liters/min. Draws 28 amps.

SBT-AHP12-HP-09

Airhead® Double Action Pump

Perfect For "Topping off" Towables This double action pump inflates and deflates towables, kayaks, boats, airbeds, and other inflatables. It delivers a continuous stream of air on both the up and down strokes. Simply turn the release valve counterclockwise and you 're pumping air only on the downstroke. This is a great option when your inflatable is almost full and there's back pressure. Four universal valve fittings are included to fit Boston valves and stem valves. The accordion-style hose stretches to 5' long and interlocks to the pump, so that it doesn't f all off while you're pumping. Volume is 2 liters/stroke. Very effective for "topping off" large towables in the boat, since peak pressure is an impressive 14 psi.

SBT-AHP10-00-10

Inflatable Multi -Valve

The multi-valve consists of two Boston valves with different thread patterns on the bottom and a Schrader® valve. One of the Boston valves will fit the thread pattern of your inflatable, no matter what brand. Use the Schrader® valve to inflate quickly at a gas station or with an air compressor. Alternatively, screw off the Schrader® valve and inflate the Boston valve with Yamaha 12-volt Air Pump (MAR-12VPU-MP-06), sold separately.

MAR-MLTVA-LV-06

Airhead® Multi -Valve

Inflate with Speed & Flexibility AIRHEAD® MULTI-VALVE consists of two Boston valves with different thread patterns on the bottom and a Schrader® valve with cap. One of the Boston valves issure to fit the thread pattern of your inflatable, no matter what brand. The Boston valves have a square base, which is much easier to turn than a round base, especially with wet hands. Use the Schrader® valve to inflate your inflatables at a gas station or with an air compressor. Alternatively, screw off the Schrader® valve and inflate the Boston valve with an AIRHEAD® air pump. All components are bright red and green, so they're easy to find.

SBT-AHMV1-00-10

Vinyl Repair Kit

This kit includes a 1-ounce tube of the best commercial-grade vinyl cement available and four 2"-round vinyl patches.

MAR-VNLRE-PR-KT

Airhead® Boot Goo™

It's easy to slide into tight water-ski and wakeboard bindings with AIRHEAD® BOOT $GOO^{\mathbb{M}}$. It saves time and reduces wear and tear to bindings. BOOT $GOO^{\mathbb{M}}$ dissipates as soon as you hit the water for maximum performance. 16 oz. bottle with squirt top

Active Subwoofer by Wet Sounds™

The Active Powered subwoofer line brings Wet Sounds performance technology to the marine environment in a complete all-in-one package. This complete solution is designed with a 500 watt, Class-D high efficiency amplifier in a reinforced fiberglass-sealed enclosure. The Active 10 will bring the bass thumping power on the boat with minimal current draw to keep the party rocking on the water.

SBT-HTAS1-00-13

JL Audio® Slampak™ Interior Audio System

Contains everything needed to deliver years of high-quality audio in your Yamaha boat. The kit includes two pairs of MX-Series-6.5" coaxial speakers, one MX-Series 10" subwoofer, a 600-watt six-channel amplifier, and a wired remote level control. All are marine-grade components, and the kit also includes the full wiring harness, all hardware and detailed installation instructions.

SBT-JLINT-00-13

HT-2 Full Range Class D Amplifiers by Wet Sounds®

Wet Sounds™ Hydro-Tech™ Series Marine Amplifiers are designed to be a complete solution for every type of extreme marine application. The Hydro-Tech amplifiers use superior performance circuitry by utilizing Class Power Supplies. These amplifiers have extreme power output packed inside a small chassis, thermal overload protection, flexible crossovers, optional elevated feet, extended inputs. Hydro-Tech™ amplifiers are a well balanced match for all of the Wet Sounds™ products.

2-Channel: SBT-HT200-00-13

4-Channel: SBT-HT400-00-13

6-Channel: SBT-HT600-00-13

JBL® Marine Amplifiers

These amplifiers have a fully marinized circuit board to keep salt and corrosion away from the critical circuit paths. Comes equipped with an onboard 12 dB electronic crossover to provide tuning options for systems of any size. The variable bass-boost circuit provides additional bass tuning to optimize performance, regardless of location. Its low-profile heatsink allows for installation in tight spaces. The large-gauge barrier strips allow easy hookup and use of larger-gauge premium power, ground, and speaker cable. Professional installation recommended.

4-Channel Amplifier This amp has 145 watts at 2 ohms, 60W RMS x 4 channels at 4 ohms and less than or equal to 1% THD + N.

2-Channel Amplifier

SBT-MA600-40-07

This amp has 160 w atts at 2 ohms, 60W RM S x 2 channels at 4 ohms and less than or equal t o 1% THD + N. SBT-MA600-20-07

WS-420 4-Band Para Metric Equalizer With 2-Zone Operation

The WS-420 Equalizer is a state-of-the-art equalizer designed to provide amazing control and flexibility of your marine audio system. The WS-420 gives you independent control of your tower speakers as well as independent control of your in-boat speakers. The Wet Sounds™ talk-back microphone allows the boat driver to communicate with the rider or other boats in the area. By pushing the button on the microphone, the system will automatically mute the music playing from the tower speakers and allow you to use your tower speakers as a PA system. Once the butt on is released, the tower speakers will begin to play again at the level they were at. Additionally, the WS-420 includes Wet Sounds™ exclusive Boat Link™. Boat Link [™] gives you the ability to link up with other WS-420-equipped boats for the ultimate party cove experience.

SBT-SW420-00-11

Syndicate Series Full-Range Marine Amplifiers

Wet Sounds™ Syndicate Series Marine Amplifiers represent the highest performing marine audio amplifiers on the market, with advanced technologies like Class H and Class G/H power supplies for high power with less current draw and less heat. Microprocessor-controlled, forcedfan cooling. Full polished stainless steel chassis for true marine grade, with conformal-coated PCB boards, advanced microprocessor protection circuit for under/over voltage, thermal overload and short protection, flexible crossovers for both high pas s and low pass use on full range models, and matched power ratings to drive all Wet Sounds™ speakers.

Syndicate 4: Full Range 4-Channel Amplifier Stereo @ 4 Ohms = 125 x 4 watts RMS; Stereo @ 2 Ohms = 200 x 4 watts RMS; Mono @ 4 Ohms = 400 x 2 watts RMS SBT-SYN4A-00-11

Syndicate Micro: Full Range 2-Channel Class H Amplifier Stereo @ 4 Ohms = 200 x 2 w atts RMS; Stereo @ 2 Ohms = 350 x 2 watts RMS: Mono @ 4 Ohms = 700 x 1watts RMS SBT-SYNMI-NI-11

6-1/2" Full Range Speakers 100 Watts

Battery Chargers and Battery Switches

Yuasa® Automatic 12V 1.5 Amp 5-stage Battery Charger

Superior 5-stage charging technology. This high-power unit provides error-proof operation to fully charge low maintenance absorbed glass mat (AMG) batteries and conventional lead-acid batteries. Provides up to 16 volts to enable recovery of sulfated batteries during pre-qualification stage. Spark-free operation and steal construction for durability. 3-year limited warranty from manufacture.

YUA-12015-01-00

Yuasa® Automatic 900mA 12V Battery Charger

The industry's most powerful plug-in wall charger. Combining the latest technology and a host of user-friendly features, this compact, high-power unit provides optimum amperage return and is designed to fully charge and maintain conventional batteries and low maintenance absorbed glass mat (AGM) batteries. Three level charge cycle reaches 14.4 volts peak, then automatically switches to float, AC power LED indicator and 12-ft output cord. 2-year limited warranty from manufacture.

YUA-12009-01-00

OptiMate® 4 Battery Charger

A truly diagnostic 0.8 amp battery optimizer for 12V lead-acid batteries (sealed maintenance-free, gel, or filler caps). Like OptiMate® models, the microprocessor-controlled OptiMate® 4 can save neglected batteries and is even more effective with its new dual-stage "Recovery" and "Turbo Recovery" desulfating action. Sealed waterproof enclosure is ideal for snowmobiles and watercraft and also has special cables and bushings for ultra-cold temperatures down to -.40° F. New shape includes wall mounts, and now shows current display, hourly testing plus 24/7 maintenance. Recommended for all 12V lead-acid batteries up to 75Ah.

DBY-ACC-ACC51-70-01

Adaptor that allows OptiMate® 4 and OptiMate® 3+ connection sets to hook up to connectors (white plastic) on the older OptiMate® III model.

ACC-OPTIM-3P-AD

Replacemeent Fused Eyelet Connection Set Weatherproof, permanent connector (with 15A fuse). Hook up your battery quickly and easily when not use. For use with OptiMate® 4 and OptiMate® 3+ battery chargers. Adapter (ACC-OPTIM-3P-AD) required for use on older OptiMate® III model. DBY-ACC56-23-81

Battery Tender® Water Proof 800

This compact battery charger has all the charge characteristics of its cousin, the Battery Tender® Junior. It incorporates highly efficient surface mount technology electronic components. The interior is completely encapsulated, protected from shock, vibration, and moisture by an electrically insulating, thermally conductive, flame retardant, synthetic epoxy resin compound. It's tough, affordable, and a strong, innovative battery charging solution. This charger is no larger than a standard computer mouse yet packs 800 milliamps of pure constant current charging power. Coupled with a brain (IC chip), the charger will constantly monitor, charge, and then maintain your battery even while totally submersed underwater! Perfect for all outdoor types of watercraft, boats, motorcycles, ATVs, or any where water is a threat. Charges 12V @ 800mA.

SBT-BTWP8-00-11

Water Proof Power Tender® Plus

This waterproof battery charger is shock and vibration resistant, lightweight (less than 4 lb.), and compact. Designed f or either portable operation or permanent mounting. Charges and maintains flooded and se led batteries, including maintenance free, AGM, and lead acid batteries. The Float/Maintenance function maintains batteries at proper storage voltage without the damaging effects that can be caused by trickle chargers. Charges 12V @ 5A.

SBT-CHGPT-ND-12

Battery Tender Junior

Trickle Charger with a Brain. Features Include: Lightweight/ compact size Ideal for hard-to-fit spots Fully automatic 2-stage lead-acid battery charger Solid-state two-color LED indicates state of charger Spark-proof Reversepolarity protected 12-foot output cord Quick connect harness

ACC-CHGJR-BT-12

Battery Tender Plus

Fully charges and maintains battery at proper storage voltage. Temperature compensation. Powder-coated aluminum chassis. Spark proof. Built-in 72hour timer will protect a marginal battery from overcharging. Charges as fast as a 3-amp charger using only 1.25 amps. Reserve polarity protected. Complete 3-step charging program. Quick-connect harness. Five-year manufacturer's warranty.

ACC-CHGBT-TN-12

Optimate® 1 Battery Charger

Never have another dead battery! The OptiMate® 1 Charger can be left plugged into any vehicle's 12-volt battery all season long. Charges all battery types. Comes standard with clip type lead and weatherproof permanent adaptor for quick and easy conect/disconnect. LED's for power on, charging, and charged battery states. 2 year warranty from the manufature.

Marine Dual Battery Kit

This kit is a must-have when adding additional electronics to your boat (stereo upgrades, bars, etc.). This kit comes complete with a BEP Marine® Battery 7015™ Battery Switch, a BEP Marine® Voltage Sensitive Relay (VSR), and a GIL Marine® Composite Battery Box plus all necessary wiring and hardware. This kit will allow you to keep one battery isolated at all times for reserve purposes. The VSR will allow the engines to charge battery #1 until it is topped off at 13.7 VDC, then automatically switch over to battery #2 to charge it. Turn the knob on the battery switch to select using battery #1 by itself, battery #2 by itself, or both batteries together in parallel. You can also switch off battery current altogether. Professional installation recommended. Marine batteries not included. Fits any single battery boat with room for another group 24 battery.

Magma® Pow'rgrip™/ LeveLock® Adjustable Rod Holder Mount

Just when you thought it couldn't get any better, this mount adjusts and locks in place at both ends. Magma® joined their LeveLock® Adjustable Fish Rod Holder Mount with the Pow'rGrip™ Adjustable Fish Rod Holder Mount. This allows the Pow'rGrip™ portion of the mount to adjust to any size rod holder and lock in place, while the LeveLock® portion of the mount adjusts and locks your Magma® rectangular grill. This patented mount is the strongest, most corrosion resistant, most versatile mount in the industry.

SBT-NWPTM-NT-11

Padded Grill & Accessory Carrying/Storage Case

Conveniently store and transport your grill and accessories in one of Magma's® new padded carrying cases. Designed to store all of your grilling gear in one space-saving location. This bag is out fitted with a large storage compartment for a grill, pockets for storing a serving shelf, griddle, and fish/veggie tray. Includes an additional side pocket for storing up to two 1-lb. propane canisters and two control valve/regulators. Additional features like thick padding for maximum protection and heavy-duty carrying handles and strap make this a must-have for every grilling enthusiast. With the same quality and craftsmanship you've come to expect, once again Magma® has just what you've been looking for.

Yamaha Kidney Shape Table

Want to upgrade your stock table to a larger size? This big table offers more functionality, with a kidney shape so it is easy to maneuver around it, yet it still fits in the stock storage location on your Yamaha Boat. It also has three cup holders instead of two as on the stock table. Designed as a direct replacement, this table is made of the same acryliccapped ABS material as the stock table, and uses the same hardware. Requires transfer of the pedestal base from the stock table.

SMA-LICPL-SL-00

Speedy-Hitch Camera System™

Speedy-Hitch camera makes backing up a trailer safe and hassle free. With Speedy-Hitch wireless camera, hitching a trailer becomes a one-person task. Line up ball and hitch perfectly every time. Now you can easily see what's behind you when backing your truck, auto, or trailer. This portable camera can be used for marine, motorcycles, RVs, snowmobiles, SUVs, ATVs, and camper trailers. Speedy-Hitch Camera is great for reversing trailers into tight storage places. For even easier backing of a trailer use the "Reverse Image" button on the monitor. When you press the reverse image button the image you see in the monitor is now reversed. This can make backing easier because what direction you turn the steering wheel is the direction the trailer goes. Speedy Hitch camera works day and night with infrared technology. Installation requires no wiring because it is wireless. Both the camera and monitor include rechargeable batteries. The camera has a magnetic mount so no screws or fasteners are necessary. Stick it to your bumper, tailgate, or on the trailer itself. Remove when finished and store in carrying bag. The monitor features full color LCD 960 x 240 image. Two rechargeable lithium batteries, carrying bag and 12-volt charger are included.

Yamaha Boat Starter Kit

Boat Starter Kit

Here's a convenient way to get started with supplies you need for your Yamaha Boat. Kit provides four U.S. Coast Guard Approved/UL Listed PFDs that are adjustable to fit most adults (sizes small to large), plus an approved Type IV throwable flotation device, and a generously sized nylon case to store them in when you aren't boating. Kit also includes a 3.5-oz. air horn and an easy-to-pack first aid kit. For your docking needs, the kit has two black Yamaha 24" Boat Contour Fenders, two No-Slip Fender Straps (shown attached to cleats, not included), and four white 15-foot dock lines. Accented with the Yamaha logo.

Here's a convenient way to get started with supplies you need for your boat. Designer Doggy Life Jacket by Paws Aboard®

Paws Aboard Pet Life Jacket and Designer Pet Life Jackets provide ultimate buoyancy and high visibility to keep pets safe on the water. Constructed to provide buoyancy, along with a cozy secure fit, the Paws Aboard Pet Life Jackets features an advanced breathable mesh underbelly for proper draining and drying, which provides your dog more comfort and healthier conditions than traditional pet life jackets, which can cause heat exhaustion and chafing. New reflective strips for maximum visibility. Bright colors and unique designs Handle on top for quick and easy grabbing Adjustable nylon straps Quick-release buckles Heavy-duty yet more comfortable Velcro fastening system around the belly and neck to keep securely fastened.

Training Dummy Toy by Paws Aboard®

Playing with the Training Dummy Toy by Paws Aboard your dog will agree that this is the coolest fetch-toy. Easy grip allows your pup to fetch and carry the toy in-and-out of the water. Made from marine-grade rope and heavy-duty nylon to withstand the elements. 10" base with 10.5" rope for tugging fun.

SBT-23000-00-12

The Doggy Boat Ladder provides a great way for you to enjoy the water with your pet. This unique dog ladder is also an excellent choice as a boat ramp for use with arthritic, older, or overweight pets. It provides an easy exit, so your pet reduces the risk of seriously straining or injuring joints. Your pet will find it easy to get out of the water and back aboard with this unique boat ramp. You will find it easy to carry, install, and store The Doggy Boat Ladder – no more struggling with a wet pet and running the risk of back injury. All Doggy Boat Ladders are of the highest quality and workmanship and built to last in all types of weather conditions. The Doggy Boat Ladder does float in water but should never be used as a floatation device. Paws Aboard® ladders/ramps are not designed for human use. Easy to carry and store – measures 16" x 64", and folds in half for easy storage Conveniently detaches and floats next to the watercraft when the boat ladder is needed for human use This unique dog boat ramp can be attached and removed in seconds and includes a universal grip that fits almost all boat ladders with three or more steps. The highly-durable ramp washes easily with soap and water and is UV-resistant The Doggy Boat Ladder is rust and corrosionproof.

Doggy Flags by Paws Aboard®

Grab some attention with our bright, eye-catching flags. These dog flags can be used in a variety of settings including boat, flag poles, and windows. Each flag measures 20" x 11.5". Choose from three styles and colors.

Black: *SBT-43000-00-12* Blue: *SBT-42000-00-12* Red: *SBT-41000-00-12*

Monkey Fist Rope Toy by Paws Aboard®

The Monkey Fist Rope Toy by Paws Aboard is great for water or land fetch, and will have your pet coming back for more. The high-quality rope toy is designed to allow your dog to close their mouth while swimming to help avoid choking. Made of marine-grade rope to withstand the elements. Provides hours of fun and helps keep your pooch paddling back for more!

Generators & Accessories

Generator Basics

Yamaha's legendary reliability is at the heart of our generator line up to help ensure they are there when you need them. Selecting which Yamaha Generator will meet your customer's needs can seem overwhelming until you have an understanding of some simple information and techniques.

The Yamaha Generator Model Number

Understanding the different benefits each model offers starts with an understanding of the model number. The image below shows an EF5200DE. The model code shows this is a Four Stroke Engine Generator capable of producing a maximum of 5200 watts in either 120v or 240v AC outputs and it has electric start.

Invertor Vs. Standard Generators

Both Invertor and Standard generators produce the U.S. standard 60Hz A/C power. Yamaha's Premium Generators do a great job powering standard electronics like refrigerators, pumps, electric motors, and countless other items. However,

Standard Generators Sine Wave

as the use of microprocessors in everyday electronics such as, plasma TV's, computers, smartphones, and other modern devices continue to grow the inventor series becomes more important than ever.

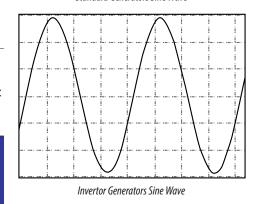

Standard generators typically rely on maintaining an engine speed of 3600 RPM to create the required 60Hz sine wave. No matter how smooth an engine runs, the RPM will always move up and down ever so slightly. This normal engine speed variation increases sine wave distortion.

Distortion in the AC sine wave powering micro processor controlled electronics can not only effect the performance of those electronics, but it can even damage them.

The invertor series is able to output a sine wave with a distortion ratio of less than 2.5%, equivalent to household electricity. A requirement of sensitive electronics with microprocessors.

The inverter series, controlled by a 16-bit microcomputer, is a Pulse Width Modulation (PWM) sine wave inverter, which means the generator's output frequency remains unchanged even when the engine speed varies and both the output voltage and the sine wave are very stable.

When fitting out a customer with a new Yamaha Generator, remember the type of power required is just as important as the amount of power required.

Propellers

Maintenance

Oils & Lubes

Trailer Supplies

Sizing a Generator

When selling a generator, it is important to select one that is capable of meeting the energy requirements of the customer. Match the rated output of the generator to the maximum anticipated power demand. Make a list of the appliances and devices or tools that you expect to operate, as well as the approximate power requirements for each device. Remember microprocessor controlled electronics will need the Invertor Series.

One of the easiest and most accurate ways to size a generator is by using the AmWatt® Hand-held Appliance Load Tester by Reliance (ACC-0SS58-40-44). The AmWatt® plugs in line with the 120V device and can handle up to 1875 watts or 15 A. After making a list of the electronic devises the customer intends to use with the generator, and ensure the load tester selector switch is in the WATTS position.

Plug the device into the load tester. Then plug the load tester into a house hold outlet and record the WATTS used by the device. Remember, some devices such as an electric motor will require additional energy at start up, as the pictures on the right show. Be sure to record the highest reading during the load test to ensure the generator can meet the requirements.

If the device has a load over 1800 Watts or a load tester is not available, locating the device model identification tag can give an accurate required load for the device. Often times the identification tag will list the voltage and the amps required. When you multiply amps and volts, the result is the load in Watts. For the device in the bottom picture the load would be, $120V \times 2A = 240 \text{ Watts}$.

If the actual load of the customer's devices cannot be measured or located, the charts in the back of this section can provide an estimate of the required output of a generator. Remember the charts are just typical requirements and the customers actual needs may be different.

Once the load of all the devices have been recorded add them all up for the total Watts requirement for the customer's needs. If any sensitive electronics are in the line up, choose a generator capable of meeting or exceeding the total Watts for the devices the customer intends to use from the Invertor Series. If sensitive electronics aren't going to be used, a generator from the Premium family can also be selected.

Finally, make sure you understand what is important to the customer. For example if they want a quiet model, try to select a generator with an "S" in the model name, such as a EF3000i**S**. If easy starting is a goal of the customer, select an electric start model. Electric start models contain an "E" toward the end of the model name like the EF12000DE.

Generators Point of Purchase Items

Creating an eye catching display can help you not only attract customers, but assist you in showing off the features and benefits of the Yamaha Generator line up.

The Generator Display Stand III can be ordered through YDS under the dealer marketing menu for a Dealer Cost \$555.00.

Generator Banners can be ordered with your regular parts order. Page 11-23 contains more information

The Invertor Series is Perfect for sensitive electronics.

AmWatt® Load Tester makes sizing a snap.

Generators & Accessories

Terms to Know

Pulse Width Modulation

Very clean and stable output with a waveform distortion ratio of 2.5% or less. This low distortion ratio means the output is cleaner than most commercial / residential power, making it safe to run sensitive computer equipment, televisions, and microchip-controlled power tools.

Peak Output

The amount of current that can be utilized for short time periods before the Thermal or Nonfuse Breakers (NFB) disconnects the output. This output level allows for jobs of short duration, requiring maximum output (tool startup).

Rated Output

The amount of current the generator can supply for continuous operation.

12 Volt DC Output

The DC output is intended only to charge a 12-volt battery. If any 12-volt devices should be connected to a 12V battery and never to the 12V plug on the generator. It is possible that a device could be damaged if it is connected directly to a generator.

Voltage and Frequency Standards

In the U.S., standard commercial electricity is delivered at 110~120 V AC, and 220~240 V AC. The electrical frequency standard is 60 cycles per second (60 Hz).

Electronic Breaker

An electronic breaker circuit housed in the control unit of Yamaha Invertor generators. When output from the control unit exceeds a specific limit, output is automatically interrupted to protect the generator from damage.

Thermal or No Fuse Breaker (NFB)

Sometimes called a Non Fuse Breaker, this device acts like a fuse to interrupt power in the event of a sudden spike or surge in current. Unlike a fuse, however, the NFB can be reset.

Smart-Throttle

Because output frequency of an Inverter Generator is unrelated to engine rpm it becomes possible to utilize a wide range of engine rpm. This feature helps quiet running by choosing the minimum engine rpm necessary for the actual electrical load. A double coil system such as on the EF1000iS makes possible a higher output even at a low rpm setting. Smart Throttle ONLY

applies to inverter models that have an electronic throttle servo motor to control engine speed.

Economy Control

Conventional generators, and in some cases inverter generators use economy control / idle. This function causes the unit to idle down when a load is not present.

(also called Economy Idle) **Ground Fault Interruption** (GFI)

Shuts down the power when a fault to ground is detected. A device that interrupts the power flowing through a GFI receptacle when a proper ground/earth ground is not present or a short were to take place - to prevent electrocution

Why Yamaha Generators

Electronics have become more a part of boating today then ever before. Almost every boat user could use a generator in one way or another. Whether it's for dock power, battery charging, to run appliances, or that beach party that was planned for weeks, boating customers need the convenience of a generator. With all the available generators on the market why would a customer want to buy Yamaha Generators?

Full Line of Accessories - Yamaha Generators offer a full line of accessories and optional parts, allowing customers to customize their generator to their needs. With other, commonly available generators, even if accessories are available they are mail order parts with no professional installation service available.

Yamaha Reliability - The same reliability that draws customers to Yamaha Outboards is available in every generator Yamaha offers. Just like an outboard, generators need to perform when the customer needs them. Worry free operation is a feature bargain branded generators can't

Generators & Accessories

Generator Overview

Inverter Series

As quiet, clean, and efficient as power gets. Yamaha Inverter technology is the way forward when it comes to light, quiet, clean, and portable power. Our high-quality inverter generators use Pulse Width Modulation to produce pure sine wave electricity. That means you have a source of electrical power that is as clean, or even cleaner, than municipal power so, unlike using cheap low quality generators, you can run computers and other electronic equipment with complete peace of mind. And Yamaha generators have advanced features to make them easy to live with and use. All models have an independent gasoline petcock, and on most models you'll find Noise Block™ technology for exceptionally quiet running as well as Smart Throttle™ for maximum fuel efficiency. With all these advantages, it will probably come as no surprise that many Yamaha generators also earn the longest engine durability rating from both the Environmental Protection Agency (EPA) and California Air Resources

Board (CARB). It's another way that Yamaha helps make your life easier, better, and brighter now and in the future.

Premium Series

Yamaha power will be there when you need it. There's something to be said for experience. We've been building generators for more than 30 years now, and we've learned a few things along the way. Number one among them is that when you need power, you want the reliability of a Yamaha generator. Whatever your intended primary use, a big reason to own a generator is for emergency backup power at home. Advanced generator technology and features, quality materials and construction, and more than 30 years of doing things right add up to power that's there when you need it.

Generators & Accessories

Inverter Series

There's no excuse to be caught without power when the 28-pound, easy-to-carry EF1000iS is so easy to own. The EF1000iS is so compact and unobtrusive you'll enjoy using it almost anywhere: Noise Block design technology keeps it nice and quiet. And it's so efficient, thanks to Smart Throttle, that this little generator will run up to 12 hours on just 0.66 gallon of gas—easily powering up small appliances, computers, TVs and satellite systems with clean power from Yamaha's Pulse Width Modulation Inverter system. It even comes with cables for recharging 12-volt batteries.

The EF1000iS is ideal for:

- · Charging Batteries
- Small Electronics
- Emergency Power with Limited Space

Generators & Accessories **EF2000iS**

The ingenious EF2000iS is powerful, portable, and retrocool. It delivers maximum output with minimum effort. Weighing a mere 44 compact pounds, it features an extra large handle for easy transport to your campsite, work site, fishing spot—almost anywhere. Fitted with Yamaha's most technologically sophisticated muffler, it's whisper quiet. And if you need extra juice, the EF2000iS has you covered—a convenient parallel function lets you connect two generators to deliver up to 30 maximum amps. Meets U.S. and CARB environmental standards; it's the way to power up responsibly.

EF2000iS / EF2000iSCH Quick Specs

The EF2400iSHC. HC stands for High Current, which means extra power to help start your motor-driven electric devices. This model uses Yamaha's powerful 171cc overhead-valve engine, contains all the latest Yamaha Inverter technology and puts out 2400 maximum watts of clean, pure power—enough juice to crank up a high-efficiency 13,500 BTU RV air conditioner. All in a package that weighs a mere 75 pounds! Which means the new EF2400iSHC is not only super quiet, but highly portable as well.

The EF2400iSHC is ideal for:

- Air Conditioners
- Small Electronics / TV's
- Emergency Power with Limited Space

Generators & Accessories **EF2800i**

There's a bunch of power and big-time features built into this compact 68-pound Inverter generator. Rated at 2800 maximum watts of output, this generator has an exceptional power output to weight ratio. Pulse Width Modulation produces high-quality, clean electricity that's ideal for powering computers and electronic appliances. Other features include AC and DC output, Smart Throttle that matches engine speed to current draw for delivering optimal fuel economy, an Oil Watch Warning System and AC non-fuse thermal breaker circuitry and the list goes on. We're talking big, reliable power in a small package.

EF2800i Quick Specs

Powerful and super-quiet, this recoil-start generator features Noise Block, our unique sound-reduction system that provides unbeatable noise dampening; Smart Throttle load-sensing rpm control that offers greater fuel efficiency and noise reduction by automatically adjusting engine speed to match the load; Inverter System with Pulse Width Modulation (PWM) control that lets you safely run products with built-in microcomputers, or microcomputer-controlled electric tools; plus Yamaha's unmatched quality with standard three-year warranty. All of which make it the best value in the 3000-watt class.

Generators & Accessories *EF3000iSE* & **EF3000iSEB**

Get ready for clean, quiet power. Lots of it. Because the EF3000iSE and EF3000iSEB are two of the world's most technologically advanced inverter generators. Both feature Yamaha's performance enhancing features, including Inverter Technology, Noise Block, Smart Throttle, Pulse Width Modulation, Oil Watch Warning System (for preventing engine damage) and built-in wheels for smooth, easy portability. Both offer an incredible 19-hour run time at one-quarter load. Plus, the EF3000iSEB goes one step further with Yamaha Boost Technology™ for an extra boost of power to start up big air conditioners and heavy-duty power tools. It's the perfect choice for House Boats or travel trailers.

EF3000iSE / EF3000iSEB Quick Specs	
Туре	Brushless Inverter
Rated Voltage	120V
Frequency	60 Hz
Maximum AC Output	3000 watts
Rated AC Output	2800 watts
Maximum AC Current	25 amps @ 120V
Rated AC Current	23.3 amps @ 120V
DC Output	12 amps @ 12V
Displacement	171cc
Ignition System	T.C.I.
Starting System	Electric
Overall Length	26.8 in
Overall Width	17.5 in

Air Filter	7TD-E4461-00-00 & 7TD-E4451-00-00

The EF4500iSE picks up where our extremely successful EF3000iSEB leaves off, with even more power and fuel efficiency in a quiet, portable package. Designed for maximum fuel efficiency and minimum noise, its super-powerful engine allows it to run at the very low engine speed of just 2600 rpm—1000 rpm lower than other generators in its class. That slow engine speed pays off big time in reduced fuel consumption as well as less noise, vibration and engine wear. Naturally, it's got all the advanced features you expect from Yamaha, including an optional wireless remote control. The EF4500iSE truly is the ultimate boat accessory.

The EF4500iSE is ideal for:

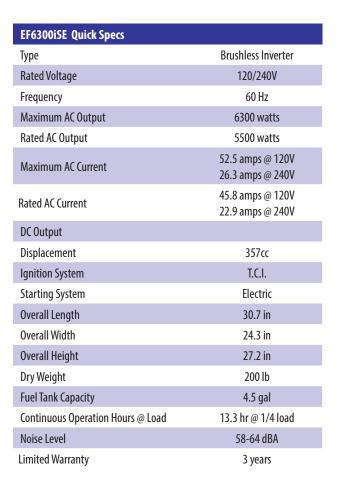

- Big Air Conditioners
- Small Electronics / TV's
- · Heavy Duty Power Tools

Generators & Accessories *EF6300iSDE*

Cranking out up to 6300 watts of pure sine wave inverter power, its fully enclosed casing makes it ultra quiet. And with sophisticated capabilities like dual 120-volt and 240-volt power, you can run almost any type of equipment with total confidence. From high-demand equipment such as well pumps, compressors and air conditioners to sensitive electronics like plasma TVs, satellite receivers and computers, the EF6300iSDE is ideal for outdoor recreation and power outage emergencies. Its excellent fuel efficiency means a run time of 13 hours at a constant one-quarter load on just a single tank of gas. Plus, its GFCI outlet and low noise level mean it's perfect for starting early or working late on the construction site making it the one workhorse you can't be without.

The EF6300iSDE is ideal for:

- Big Air Conditioners
- Small Electronics / TV's
- Heavy Duty Power Tools

Generators & Accessories

Premium Series

Rugged, lightweight and feature-packed, the EF2600 is an excellent compact generator for the home or work site, with the power to run many appliances as well as power tools. Compact and only 92.6 pounds, our smallest Premium Generator nonetheless comes with a big 2.9-gallon fuel tank (with gauge) that provides 7.8 hours of run time on a single tank of gas, along with non-fuse thermal breaker circuitry. Our Oil Watch Warning System protects the EF2600's heavy-duty 171cc engine, and a rugged rollover frame protects the outside. A mechanical governor delivers consistent engine speed for smoother power, while rubber mounts and a quiet muffler keep the noise to a minimum.

The EF2600 is ideal for:

- Power Tools
- · Small appliances
- Air Conditioners

Generators & Accessories EF7200D & EF7200DE

Go ahead and power up both 120- and 240-volt equipment with either of these new compact and powerful generators—anything from air conditioners to power drills. A rugged 358cc Yamaha engine has no trouble spinning out 6000 watts of power from the maintenance free brushless alternator, and they've got all the perks, too: Transistor Controlled Ignition helps them fire right up and run super smooth; Noise Suppressor reduces interference with TVs and radios; Oil Watch Warning System prevents engine damage; and Economy Idle reduces fuel consumption and noise. Plus, the EF7200DE adds the convenience of push-button electric start! Whichever one you choose, they're each perfect for the dock, Boat, and home backup.

Continuous Operation Hours @ Load	8.0 hr @ rated load
Noise Level	74.5 dBA
Limited Warranty	3 years

Power hungry? Just cut to the chase, and wheel in our most powerful generator: 12,000 watts should be enough to satisfy whatever you need to power up—120 or 240 volts. The EF12000DE's brushtype AVR AC alternator draws its motivation from a powerful, reliable 653cc twin-cylinder engine that'll run up to eight hours between fill-ups. We wouldn't send our flagship out there without the full complement of features: Oil Watch Warning System, Auto Voltage Regulation, Transistor Controlled Ignition, Noise Suppressor, GFI, Electric Starting and Economy Idle—you name it, this powerful generator's got it.

Yamaha Turbo Nozzle

Cleans up to 50% faster than a standard nozzle. Delivers 0° rotating spray pattern for faster cleaning. Works with many gas-powered pressure washers up to 4200 psi.

ACC-31048-00-13

Yamaha Wand Extension Kit

Extend the length of your pressure washer wand 36" for easier reaching. Includes quick-connect adapter to transform any threaded nozzle into a quick-connect nozzle. Works with many gas-powered washers up to 4500 psi.

ACC-31053-00-13

Yamaha Replacement Wand

Ideal upgrade for old or worn out spray wands. Quick-connect capable for easy attaching of all quick-connect accessories. Works with many gaspowered washers up to 4500 psi.

ACC-31049-00-13

Yamaha Nozzle Kit

Includes 0°, 25°, 40°, Soap, and 800 psi nozzles for cleaning a variety of surfaces. Heavy-duty electropolish finish for more durability and longer performance life. Includes 800 psi nozzle for safe cleaning of delicate surfaces. Works with many gas-powered pressure washers up to 4500 psi.

ACC-31055-00-13

Generators & Accessories

Engine Accessories

Maintenance

Oils & Lubes

Detailing & Trailer Supplies

Yamaha Gutter Cleaner

Fast and effective gutter cleaning. Two high-pressure water jets blast debris out and away. Directs debris and water away from the user for clean, dry operation. Quick-connect capable for easy attachment. Recommended for many gas-powered washers up to 3300 psi. Recommended for use with extension wands.

ACC-31051-00-13

Yamaha Garden Hose Adapter Kit

Quick-Connect adapter for your garden hose. Snap your garden hose directly into your pressure washer pump. Recommended for use with many gas-powered washers up to 4500 psi.

ACC-31054-00-13

Yamaha Surface Cleaner

Cleans large surfaces up to 4x faster than a standard nozzle. Rotating nozzles provide streakfree, even cleaning. 15" cleaning path for much faster cleaning. Attaches easily to any quick connect capable pressure washer. Recommended for many gas-powered washers up to 3300 psi.

ACC-31056-00-13

Yamaha Steel Braided Hose

Steel-braided construction for durability and long life. Quick-connect capable for easy attaching. 30 ft. for more reach than standard hoses. Links to existing hoses for longer reach. Recommended for many gas-powered washers up to 3300 psi.

ACC-31057-00-13

CAT Pumps® Oil

Premium Grade oil promotes better performance and longer pump life. Anti-corrosion technology keeps your pump conditioned and protected. Anti-wear stabilizers for reliable performance day after day.

ACC-31045-00-13

Yamaha Telescoping Pole

Adjustable height extends between 7 ~ 16.5'. Quick-connect capable for easy attaching. Angled wand tip for more direct contact with high surfaces. Works with many gas-powered washers up to 4200 psi.

ACC-31044-00-13

A full line of generator accessories is another great reason customers want Yamaha. With other brands bought at department stores and other chain stores accessories, if they're offered, are available through the mail with no personalized service to ensure your customer gets the parts they need. For a quick overview of some of the many accessories available for Yamaha Generators, see the charts below.

Wireless Remote Control Kit

Start your generator remotely with the wireless remote control kits. Just like remote start kit for automobiles, there is no need to face the elements to get the power of a Yamaha Generator flowing.

Fits EF4500iSE and EF6300iSDE: 7XF-Y8600-00-00

Wireless Remote Control Kit

Start your generator remotely with the wireless remote control kits. Just like remote start kit for automobiles, there is no need to face the elements to get the power of a Yamaha Generator flowing.

Fits EF3000iSE/iSEB: ACC-GNRST-50-00

Optional Parts for Wireless Remote Control Kit ACC-GNRST-50-00

Replacement Key Fob Transmitter: ACC-GNRST-30-20

Optional External Antenna: ACC-GNRST-30-10

Sidewinder™ Parallel Power Cable

Combine the power of two Yamaha EF2000iS generators. Includes polarized IP30 banana plugs, quick connection to TwinTech™ jacks on both generators, color-coded wire leads, exclusive flexible tip construction that resists breakage, rugged over-braided cable design, and a handy Velcro® mounting system. Compatible with a standard 30A RV cord (plugs directly into all 30A RV cables). Works with a pair of EF2000iS generators.

ACC-0SS55-70-01

TwinTech™ Cable

Connect two EF2000iS generators for max. 30 amps and rated 25 amps of power. Includes standard 30 amp twist-lock receptacle (NEMA® L5-30). Works with a pair of EF2000iS generators.

(For RV use, adaptor (ACC-RVADP-PL-UG) required, sold separately.)

7DK-Y8579-10-00

RV Adapter Kit

Plug has a 30A receptacle for RV use. Required if connecting the Twin Tech cable to RV.

ACC-RVADP-PL-UG

Yamaha Engine Meter

To help you maintain your generator at proper service intervals, the intervals are pre-programmed into this meter (10 hours initial, every 50 hours thereafter). Upon reaching the specified service interval, the meter displays a flash alert for a two-hour period. Works with all Yamaha gasoline generators and pumps.

Deluxe Hour Meter (Hour Meter Only): *ENG-METER-2C-01*Deluxe Hour Meter & Tachometer: *ENG-METER-4C-01*

Yamaha Generators Banners

Let your customers know you sell the best generators in the business. These eye catching 3' x 6' banner is perfect for getting the customers attention.

Red and Silver: BRI-YMGEN-RD-GN

Red: BRI-YMGEN-RD-NS

AM/WATT® Appliance Load Tester by Reliance Controls

Gives quick, accurate readout of watts or amps used by 120 volt AC electrical devices (1875 watts maximum) such as: refrigerators, dehumidifiers, space heaters, and much more. Has a 26" cord to reach remote electrical outlets. Easy amps/watts slide switch. Tester is perfect for matching appliance loads to generator power output.

ACC-0SS58-40-44

3/8" Diameter 8' Heavy Duty Steel Cable

Master Lock® 8' heavy duty steel cable, 3/8" diameter. Cable is constructed from galvanized steel with a vinyl coating to prevent scratching or marring of surfaces.

(Qty. 4*) MSL-86DAT-00-10

1/4" Diameter 6' Self-Coiling Black Cable

Master Lock® 6' self-coiling black cable, 1/4" diameter. Cable is constructed from braided steel with a vinyl coating to prevent scratching or marring of surfaces. Self-coiling for easy use and storage.

(Qty. 2*) MSL-61DAT-00-10

Armored Shackle Lock

Master Lock's® Armored hardened steel shackle defies cutting and the 1-9/16" laminated steel body for superior strength. It also has 4-pin tumbler cylinder which helps prevent picking while the shackle guard protects against bolt cutters and hacksaws. Can be used for securing trailers, cables, and chains. Fits openings ½" diameter or larger with the shackle guard in place

(Qty. 4*) MSL-37D00-00-10

Generator Maintenance Parts

Yamaha offers a complete line of maintenance parts for generators, so why compromise the legendary Yamaha reliability with aftermarket parts.

Yamalube® Products

Foam Air Filter Oil

Helps protect against dirt, dust and water. For use only with foam air filters. Minium order quantity is 4.

Pint Bottle: ACC-FOAMF-LT-ER

Bio-degradable Foam Air Filter Oil & Cleaner Kit

Kit contains a non-alcohol-based, dirt-grabbing, water resistant, supertacky filter oil and heavy-duty, concentrated detergent, specifically developed to clean foam air filters. This Air Filter Oil can only be washed out with the Biodegradable Foam Air Filter Cleaner and water. It won't wash out with gasoline, solvents or water alone. Minium order quantity is 12.

2 - 16 OZ Bottles: ACC-BIFMF-LT-KT

Air Filter Cleaner

Air Filter Cleaner is used to clean foam & fabric air filters that have been treated with petroleum based oil. Use this cleaner to clean filters treated with Yamalube Foam Filter oil. Minium order quantity is 4.

Gallon Bottle: ACC-FOAMF-CL-GL

10W-30 Golf Car and Generator Oil

Specially formulated mineral base oil and additive system for the rigors of a constant load and frequent start-ups as found with the normal operation of a Golf Car or Generator.

Quart Bottles: *LUB-10W30-GG-12*5 Gallong Bucket: *LUB-10W30-GC-05*55 Gallon Drum: *LUB-10W30-GC-55*

5W-40 Semi-Synthetic for Utility

Designed from synthetic and mineral base stocks specifically for utility ATV and Side x Side, low speed hauling and climbing that stress the engine's oil to the extreme in all seasons. Built to handle grueling off-road conditions, reduced fiction, Contains Moly, Thermal Breakdown resistance, Anticorrosion, Easy Starting provides optimum, low-temperature pump ability down to -40° F (-40° C). Minium order quantity 1 case (12 bottles).

Quart Bottles: LUB-05W40-SS-12

GENUINE YAMAHA Care & Maintenance

For Those Who Want The Good Times To Last

Reliability. It may start with a Yamaha, but it's sustained with proper care and maintenance. We offer everything you need to keep your craft and your Yamaha outboard ready to run—from the day you trailer it home to the day you trade it in on your next Yamaha.

Regular maintenance is critical for the continued proper operation of any engine. Add in the fact that an outboard operates under some of the harshest environmental conditions imaginable, and maintenance becomes even more critical. High load, high-RPM operation, extreme temperatures, high moisture, and periods of non-use all take a toll on your outboard.

Availability subject to production, stocking, and demand. Current availability can be found using YMBS (www.yamaha-dealers.com/outboards).

Boat smart from the start. Take a boating safety course and get a free vessel safety check annually for your boat. For more information, contact: United States Coast Guard Auxiliary, online at www.cgaux.org, or United States Power Squadrons, 888-for-usps, www.usps.org. Remember to always observe all applicable boating laws. Never drink and drive. Dress properly with a USCG-approved personal flotation device and protective gear.
